## Test Fire-Inspector-II Topics Pdf | Authorized Fire-Inspector-II Test Dumps

You can also set the number of International Code Council Fire-Inspector-II dumps questions to attempt in the practice test and time as well. The web-based International Code Council Fire-Inspector-II practice test software needs an active internet connection and can be accessed through all major browsers like Chrome, Edge, Firefox, Opera, and Safari. Our Desktop-based International Code Council Fire-Inspector-II Practice Exam Software is very suitable for those who don't have an internet connection. You can download and install it within a few minutes on Windows-based PCs only and start preparing for the 67 - Fire Inspector II Exam exam.

## International Code Council 67 - Fire Inspector II Exam Sample Questions (Q87-Q92):

NEW QUESTION # 87

Panic hardware is required on exit doors serving an occupant load of \_\_\_ or more in a Group \_\_\_ Occupancy

- A. 50; M
- B. 100; F
- C. 10; A
- **D. 50; A**

**Answer: D**

Explanation:

The requirement for panic hardware on exit doors is specified in 2021 IFC Section 1010.2.9 - Panic and Fire Exit Hardware.  
IFC Section 1010.2.9.1 - Where Panic Hardware is Required:

Panic hardware is required for Group A (Assembly) occupancies when the occupant load is 50 or more.

It is also required in certain Group E (Educational) and Group R-1 (Hotels and Dormitories) occupancies under specific conditions.

Why Other Options Are Incorrect?

A: 10; A - The threshold for panic hardware in Group A occupancies is 50, not 10.

C: 50; M - Group M (Mercantile) does not require panic hardware unless specifically required by another section of the code.

D: 100; F - Panic hardware is not required in Group F (Factory) occupancies at 100 occupants; the threshold applies primarily to Group A.

### NEW QUESTION # 88

Compressed natural gas (CNG) motor vehicle fuel-dispensing equipment may be installed in which of the following locations?

- A. 15 ft. from a public street.
- B. 5 ft. from an undeveloped property line.
- **C. 20 ft. from a railroad track.**
- D. 40 ft. from trolley wires.

**Answer: C**

Explanation:

Compressed Natural Gas (CNG) motor vehicle fuel-dispensing equipment installation requirements are outlined in 2021 International Fire Code (IFC) Section 2208 - Compressed Natural Gas Motor Fuel- Dispensing Facilities.

IFC 2021, Section 2208.3 - Equipment Location and Protection:

Requires that CNG dispensing equipment be installed at least:

10 feet from property lines

20 feet from public streets, highways, sidewalks, or railroads

10 feet from buildings or structures

Why Other Options Are Incorrect?

A). 40 ft. from trolley wires.

The IFC does not specify a 40-ft requirement for trolley wires in relation to CNG fuel-dispensing equipment.

B). 15 ft. from a public street.

Incorrect because IFC 2208.3 states that the minimum required distance from a public street is 20 feet, not 15 feet.

D). 5 ft. from an undeveloped property line.

Incorrect, as the minimum clearance from any property line is 10 feet, not 5 feet.

# Correct answer: C. 20 ft. from a railroad track.

### NEW QUESTION # 89

What fire-resistance rating is required for interior nonbearing walls and partitions in Type IV construction?

- A. 1 hour
- B. 1-1/2 hours
- **C. 0 hours**
- D. 2 hours

**Answer: C**

Explanation:

Fire-Resistance Rating for Nonbearing Walls in Type IV Construction

Type IV (Heavy Timber) construction, as defined by the International Building Code (IBC) 2021, Section 602.4, consists of large, solid or laminated wood members.

Interior nonbearing walls and partitions in Type IV construction are not required to have a fire-resistance rating (0 hours) unless they separate different occupancies or are specifically mandated by another code provision.

## 2. Why Type IV Does Not Require a Rating for Nonbearing Walls

The heavy timber components inherently provide fire resistance due to their large cross-section, which chars on the surface and slows fire penetration.

IBC Table 601 confirms that interior nonbearing walls in Type IV construction do not have a required fire-resistance rating.

## 3. Verification of Other Options

Option B (1 hour) - Incorrect, as Type IV does not require a 1-hour rating for interior nonbearing walls unless specific conditions apply.

Option C (1-1/2 hours) - Incorrect, as there is no code requirement for this level of rating in Type IV nonbearing walls.

Option D (2 hours) - Incorrect, as Type IV walls are not rated unless separating occupancies.

Reference Sources:

International Building Code (IBC) 2021 - Section 602.4 (Type IV Construction Requirements) IBC Table 601 (Fire-Resistance Ratings for Building Elements) ICC Fire Inspector II Study Guide (2021)

## NEW QUESTION # 90

According to the fire code, when compliance is not immediate, inspection reports of code violations must always include a description of the violation and which of the following?

- A. The mandatory court date
- B. The reinspection date
- C. Recommended corrective action
- D. The potential fines for noncompliance

**Answer: C**

Explanation:

When fire inspectors identify code violations, the inspection report must include a description of the violation along with a recommended corrective action. This ensures that the responsible party understands what steps need to be taken to bring the property into compliance.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 109.3 (Notice of Violation) IFC 109.3 requires that any notice of violation must include a description of the violation and the necessary corrective action.

The intent is to provide clear guidance on how to remedy the issue to meet fire safety standards.

2. NFPA 1 - Fire Code (2021 Edition) - Section 1.7.6 (Enforcement and Documentation of Violations) NFPA 1, Section 1.7.6.1 states that violation reports must specify the corrective action required to comply with the fire code.

Detailed Explanation of Answer Choices:

Option A (Incorrect): While a reinspection date may be provided, it is not a mandatory component of an inspection report for code violations.

Option B (Incorrect): A mandatory court date is not always required; enforcement varies depending on jurisdiction and severity of the violation.

Option C (Correct): Recommended corrective action is required in all violation reports as per IFC 109.3 and NFPA 1.7.6.1.

Option D (Incorrect): Potential fines for noncompliance are determined separately and are not necessarily included in the initial violation report.

Thus, the correct and verified answer is: C. Recommended corrective action.

## NEW QUESTION # 91

A local board of appeals may perform all of the following functions except:

- A. render interpretations of the fire code.
- B. approve alternate materials and types of construction.
- C. adopt rules and regulations for conducting its investigations.
- D. waive requirements of the fire code.

**Answer: D**

Explanation:

IFC Section 108 (Board of Appeals) outlines the board's role: it hears appeals on fire code official decisions (Section 108.1), can interpret the code (B), approve alternatives (C) per Section 104.9, and establish procedural rules (D) per Section 108.2. However, the board cannot "waive" code requirements outright (A)- it can only grant variances or approve alternatives that still meet the code's intent, not eliminate requirements entirely. Waiving implies nullification, which exceeds the board's authority; that power rests with the fire code official or legislative amendments. Thus, A is the exception.

## NEW QUESTION # 92

.....

Our Fire-Inspector-II Exams preparation software allows you to do self-assessment. If you have prepared for the Fire-Inspector-II exam, you will be able to assess your preparation with our preparation software. The software provides you the real feel of an exam, and it will ensure 100% success rate as well. You can test your skills in real exam like environment. If you are not getting the desired results, you will get 100% money back guarantee on all of our exam products.
