RealVCE is a trusted and reliable platform that has been helping VMware vDefend Security for VCF 5.x Administrator (6V0-21.25) exam candidates for many years. Over this long time period countless VMware 6V0-21.25 exam questions candidates have passed their dream 6V0-21.25 Certification Exam. They all got help from RealVCE VMware Exam Questions and easily passed their challenging 6V0-21.25 pdf exam.

VMware 6V0-21.25 Exam Overview:

Certification Vendor:	VMware (Broadcom)
Exam Name:	VMware vDefend Security for VCF 5.x Administrator
Exam Number:	6V0-21.25
Available Languages:	English
Exam Format:	Multiple choice, Multiple select, Drag and drop
Exam Price:	\$250 USD (approximate, varies by region)
Related Certifications:	VMware Certified Professional - Network Virtualization (VCP-NV) VMware Certified Professional - VMware Cloud Foundation (VCP-VCF)
Passing Score:	300 (scaled score, VMware standard passing threshold)
Real Exam Qty:	60-70 (approximate)
Certificate Validity Period:	2 years
Exam Duration:	135 minutes
Sample Questions:	VMware 6V0-21.25 Sample Questions
Exam Way:	Online proctored or authorized test center (Pearson VUE)
Pre Condition:	Recommended: VMware Certified Professional (VCP-NV or VCP-VCF) or equivalent VMware NSX / VCF experience

The Best Valid 6V0-21.25 Learning Materials Offers Candidates Perfect Actual VMware VMware vDefend Security for VCF 5.x Administrator Exam Products

The best news is that during the whole year after purchasing, you will get the latest version of our 6V0-21.25 exam prep study materials for free, since as soon as we have compiled a new version of the study materials, our company will send the latest one of our study materials to your email immediately. The experts in our company are always keeping a close eye on even the slightest

change in the field. Therefore, we can assure that you will miss nothing needed for the 6V0-21.25 Exam. What's more, the latest version of our study materials will be a good way for you to broaden your horizons as well as improve your skills.

VMware 6V0-21.25 Exam Syllabus Topics:

Topic	Details
Topic 1	Gateway Firewall: Covers edge security devices that control and filter north-south network traffic, blocking unauthorized access at the network perimeter.
Topic 2	VMware vDefend Firewall Management: Covers day-to-day administration and management of the distributed firewall solution for securing virtualized workloads.
Topic 3	Planning Application Segmentation with vDefend Security Intelligence: Covers using the distributed analytics engine to analyze workload and network context for developing micro-segmentation policies.
Topic 4	Role-Based Access Control: Covers creating roles and groups within the security operations team to grant appropriate portal access.
Topic 5	Context Aware Firewall and Identity Firewall: Covers advanced firewall controls that use user identity and application context rather than just IP addresses and ports.
Topic 6	Private Cloud Data Center Security: Covers foundational concepts for securing workloads and infrastructure within a private cloud data center environment.
Topic 7	Advanced Threat Prevention: Covers a suite of analysis tools designed to defend against both known and unknown advanced attack vectors.
Topic 8	NTA (Network Traffic Analysis) & NDR (Network Detection and Response): Covers proactive threat detection and response using NTA and NDR capabilities to secure virtualized workloads and environments.
Topic 9	Troubleshooting: Covers verifying health status of service instances and security components, and resolving protection and performance issues.
Topic 10	Lateral Protection with vDefend Distributed Firewall: Covers implementing policy-based rules to control east-west traffic and prevent lateral threat movement across the private cloud.
Topic 11	VMware vDefend Firewall Architecture: Covers the design and components of VMware's software-defined, distributed security architecture.

VMware vDefend Security for VCF 5.x Administrator Sample Questions (Q55-Q60):

NEW QUESTION # 55

What is the difference between IDS and IPS modes in NSX?

Response:

- A. IDS only logs alerts; IPS actively blocks detected threats
- B. IDS supports only physical NIC traffic; IPS supports VM traffic
- C. IDS requires licensing; IPS does not
- D. IDS encrypts network packets; IPS decrypts them

Answer: A

NEW QUESTION # 56

Which two practices should be followed to ensure efficient rule processing in the vDefend firewall rulebase?

(Choose three)

Response:

- A. Place deny rules above allow rules when appropriate
- B. Disable all rule logging
- C. Keep all rules in a single large section
- D. Place frequently hit rules at the bottom
- E. Group rules with common sources into one section

Answer: A,E

NEW QUESTION # 57

What distinguishes a context-aware firewall policy from a traditional firewall rule?

Response:

- A. It uses only static IP ranges for access control
- B. It incorporates user identity, device posture, and application context
- C. It only filters DNS and ICMP traffic
- D. It applies policies at the switch uplink level

Answer: B

NEW QUESTION # 58

vDefend Malware Detection can be enforced on which of the following? (Select all that apply)

- A. T1 Downlinks
- B. T1 Uplinks
- C. T1 Service Interfaces
- D. T0 Downlinks

Answer: A,B

Explanation:

While Malware Prevention is heavily utilized at the Distributed (vNIC) level, it can also be deployed as Gateway Malware Prevention to secure perimeter boundaries.

In the vDefend architecture, Gateway Malware Prevention is explicitly designed to be attached to the Tier-1 (T1) Gateways. By applying the enforcement profile to the T1 Uplinks (traffic leaving the tenant zone towards the main data center/internet) and the T1 Downlinks (traffic moving between the gateway and the internal application segments), you can successfully intercept and extract files crossing your tenant or application zone perimeters for deep sandbox analysis.

NEW QUESTION # 59

What is the main advantage of using automation tools for managing distributed firewall policies in vDefend?

Response:

- A. Creates vCenter alarms automatically
- B. Enables traffic inspection without any rule configuration
- C. Increases the throughput of the ESXi host's physical NICs
- D. Reduces human error and improves policy consistency across environments

Answer: D

NEW QUESTION # 60
