## New C-S4CFI-2504 Exam Labs | C-S4CFI-2504 Examcollection Vce

When you decide to pass C-S4CFI-2504 exam, you must want to find a good study materials to help you prepare for your exam. If you decide to choose our products as your study tool, you will be easier to pass your exam and get the C-S4CFI-2504 certification in the shortest time. So do not hesitate and buy our C-S4CFI-2504 Test Torrent, an unexpected surprise is awaiting you, we believe you will prefer to our C-S4CFI-2504 test questions than other study materials. In order to let you understand our C-S4CFI-2504 exam prep in detail, we are going to introduce our products to you.

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Financial Accounting Sample Questions (Q57-Q62):

### NEW QUESTION # 57

You need to produce additional financial statements according to local GAAP requirements. Which of the following can help?

- A. Ledger group
- B. Journal entry type
- C. Functional area
- D. Profit center group

**Answer: A**

Explanation:

Comprehensive and Detailed in Depth Explanation:

Local GAAP compliance often requires parallel accounting.

\* C: Correct. Ledger groups support multiple accounting principles (e.g., IFRS vs. GAAP).

References: SAP Help Portal - "Parallel Accounting with Ledger Groups."

### NEW QUESTION # 58

Which date determines the period of the asset acquisition?

- A. Posting date
- B. Base date
- C. Asset value date
- D. Document date

**Answer: C**

Explanation:

Comprehensive and Detailed in Depth Explanation:

In SAP S/4HANA Cloud Asset Accounting, the asset value date controls capitalization timing.

C: Correct. Asset value date determines the period for acquisition posting and depreciation start.

A, B, D: Incorrect. These dates serve other purposes (e.g., document entry).

#### NEW QUESTION # 59

You are recording actions for custom process steps in a test automate. When do you press the "Read" button on the recording panel?

Note: There are 2 correct answers to this question.

- A. To capture an error message on the screen that can be used later
- **B. To capture a value in a text field that should be stored as a variable**
- **C. To capture a static label on the screen that should be checked during test execution**
- D. To capture text in a message screen that can be used for data binding later

**Answer: B,C**

Explanation:

Comprehensive and Detailed in Depth Explanation:

In SAP S/4HANA Cloud's Test Automation Tool (available via SAP Cloud ALM), the "Read" button is used during test script recording to capture screen elements for validation or variable assignment during automated test execution.

Option A (To capture an error message on the screen that can be used later): Correct. Static labels (e.g., field names or titles) are often captured to verify UI consistency or screen navigation during test runs. This ensures the test validates expected screen content.

Option B (To capture a value in a text field that should be stored as a variable): Correct. The "Read" function can extract dynamic values (e.g., an invoice number) from text fields, storing them as variables for use in subsequent steps, such as validations or inputs.

Option C (To capture a static label on the screen that should be checked during test execution): Incorrect. While error messages can be validated, the "Read" button is not typically used for this; instead, assertions or specific error-handling steps are recorded separately.

Option D (To capture text in a message screen that can be used for data binding later): Incorrect. Message screens (e.g., pop-ups) are handled differently, often via specific actions like "Confirm" or "Check Message," not the generic "Read" function.

#### NEW QUESTION # 60

Which tools does SAP provide to make it easier for customers to maintain their SAP S/4HANA Cloud systems after a release upgrade?

Note: There are 2 correct answers to this question.

- A. SAP Signavio Process Navigator Tool
- **B. Release Assessment and Scope Dependency Tool**
- C. Test Automation Tool
- **D. What's New Viewer Tool**

**Answer: B,D**

Explanation:

Comprehensive and Detailed in Depth Explanation:

Post-upgrade maintenance tools assist adaptation.

\* B: Correct. Assesses release impacts.

\* D: Correct. Highlights new features.

References: SAP Help Portal - "Release Management Tools."

#### NEW QUESTION # 61

Which tasks are mandatory before you can migrate data for a specific object?

Note: There are 2 correct answers to this question.

- **A. Predecessor objects have been migrated**
- B. You select the same migration method previously used for other objects
- **C. Permission to migrate the data has been assigned**

- D. All previous migration projects are in the "Finished" status

**Answer: A,C**

Explanation:

Comprehensive and Detailed in Depth Explanation:

In the SAP S/4HANA Migration Cockpit, data migration for a specific object requires certain prerequisites to ensure data integrity and system consistency.

\* Option A (Predecessor objects have been migrated): This is correct because SAP S/4HANA migration follows a dependency-driven approach. Predecessor objects (e.g., master data like business partners or G/L accounts) must be migrated first to provide the foundational data required for dependent objects (e.g., transactional data like open items). This ensures referential integrity and prevents errors during the migration process.

\* Option D (Permission to migrate the data has been assigned): This is also correct. Migration in SAP S/4HANA Cloud requires proper authorization, typically assigned via roles in the SAP Fiori Launchpad (e.g., the "Data Migration Specialist" role). Without this, users cannot access or execute migration tasks, ensuring security and compliance with governance policies.

\* Option B (You select the same migration method previously used for other objects): This is incorrect. The migration method (e.g., file upload, staging tables) can vary by object and project requirements. SAP does not mandate using the same method across all objects.

\* Option C (All previous migration projects are in the "Finished" status): This is not a requirement.

While completing prior projects can be a best practice, the Migration Cockpit allows parallel or independent migration projects, provided dependencies are met.

References: SAP S/4HANA Cloud Public Edition - Migration Cockpit documentation (SAP Help Portal),

"SAP Activate Methodology for Data Migration."

## NEW QUESTION # 62

.....

No matter which country or region you are in, our C-S4CFI-2504 exam questions can provide you with thoughtful services to help you pass exam successfully for our C-S4CFI-2504 study materials are global and warmly praised by the loyal customers all over the world. They have many advantages, and if you want to know or try them before your payment, you can find the free demos of our C-S4CFI-2504 learning guide on our website, you can free download them to check the excellent quality.
