At QuestionsTube, you can read JN0-1103 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Juniper JN0-1103 practice questions. These free demo questions are parts of the JN0-1103 exam questions. Download and read them carefully, you will find that the JN0-1103 test questions of QuestionsTube will be your great learning materials online. Share some JN0-1103 exam online questions below.

1. Which two statements are true regarding greenfield projects? (Choose two.)

P.S. Free & New JN0-1103 dumps are available on Google Drive shared by GetValidTest: <https://drive.google.com/open?id=1MxIsgaHJHVfL543zyJXrCq-eTV0UEB>

Because of the different habits and personal devices, requirements for the version of our JN0-1103 exam questions vary from person to person. To address this issue, our JN0-1103 actual exam offers three different versions for users to choose from. The PC version is the closest to the real test environment, which is an excellent choice for windows - equipped computers. And this version also helps establish the confidence of the candidates when they attend the JN0-1103 Exam after practicing.

Juniper JN0-1103 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Campus and Branch WAN Design: This section of the exam measures skills of WAN Solutions Architects and covers considerations for designing campus or branch WANs. It includes understanding WAN connectivity functions, best practices for WAN design, performance optimization, VPN design, and implementing high availability through active• active and active• passive configurations. The section also explores Software-Defined WAN (SD-WAN) design considerations, devices, assurance models, and intersite connectivity.

Topic 2	<ul style="list-style-type: none"> • Customer Network Design Requirements: This section of the exam measures skills of Network Design Engineers and covers the foundational aspects of network design. It includes understanding Juniper's life-cycle service approach, defining proposal boundaries, and considerations for both greenfield and brownfield deployments. The section also addresses top-down network design methodologies and capacity planning to ensure scalable and efficient network infrastructures.
Topic 3	<ul style="list-style-type: none"> • Network Management or Reliability: This section of the exam measures skills of Network Operations Center (NOC) Engineers and covers design considerations for ensuring business continuity. Topics include high-resiliency design, implementing link and device-level redundancy, and utilizing technologies like Multihomed Ethernet Segment Identifier Link Aggregation Groups (ESI LAGs) and virtual chassis. The section also explores Juniper SRX firewall redundancy and best practices for campus network redundancy.
Topic 4	<ul style="list-style-type: none"> • Campus and Branch LAN Design: This section of the exam measures skills of LAN Infrastructure Specialists and covers considerations for designing wired campus or branch LANs. It addresses best practices in campus LAN design, modular design approaches, subnet and VLAN planning, and access control mechanisms. The section also introduces Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) architectures and discusses campus oversubscription ratios and design architectures.
Topic 5	<ul style="list-style-type: none"> • Data Center Network Design: This section of the exam measures skills of Data Center Network Engineers and covers considerations for general data center network design. Topics include data center design best practices, understanding traffic patterns, virtual chassis implementation, and environmental considerations. The section also delves into data center fabric architectures, benefits of IP fabric over traditional architectures, spine-and-leaf device placement, underlay and overlay design, routing protocol selection, and best practices for IP fabric scaling.

New JN0-1103 Braindumps Free - Free PDF Quiz JN0-1103 - First-grade Design - Associate (JNCIA-Design) Exam Questions Pdf

One of our outstanding advantages is our high passing rate, which has reached 99%, and much higher than the average pass rate among our peers. Our high passing rate explains why we are the top JN0-1103 prep guide in our industry. One point does farm work one point harvest, depending on strength speech! The source of our confidence is our wonderful JN0-1103 Exam Questions. Passing the exam won't be a problem as long as you keep practice with our JN0-1103 study materials about 20 to 30 hours.

Juniper Design - Associate (JNCIA-Design) Sample Questions (Q130-Q135):

NEW QUESTION # 130

A company requires a managed WAN solution that supports Layer 2 adjacency across remote offices for applications and services. What solution should be selected?

- A. FR
- B. DMVPN
- **C. VPLS**
- D. MPLS

Answer: C

NEW QUESTION # 131

You are designing a solution to allow secure communication over the public Internet for a corporate WAN deployment. For business policy reasons, all branch-to-branch traffic must first pass through the corporate headquarters. Which solution will work in this scenario?

- A. hub-and-spoke GRE VPN
- B. Layer 3 VPN

- C. fill mesh IPsec VPN
- D. hub-and-spoke IPsec VPN

Answer: D

NEW QUESTION # 132

Which two statements are correct about the Juniper Connected Security strategy? (Choose two.)

- A. It extends attack mitigation to network chokepoints.
- B. It extends attack mitigation to routers and switches.
- C. It extends security to every point of connection on the network.
- D. It extends security to all user connections.

Answer: B,C

Explanation:

The Juniper Connected Security strategy aims to integrate security across the entire network by extending protection to routers, switches, and every point of connection, ensuring that security is enforced holistically - not just at the perimeter.

NEW QUESTION # 133

Which Junos Space application can be used to store and manage events for SRX devices?

- A. Network Director
- B. Connectivity Services Director
- C. Network Management Platform
- D. Security Director: Logging and Reporting

Answer: D

NEW QUESTION # 134

Which two statements about network management are correct? (Choose two.)

- A. Fault management can discover problems before they cause downtime.
- B. Authorization validates that a user is who they claim to be.
- C. Measurement of network performance, errors, and security allows administrators to make informed decisions.
- D. Network management is added after the network is built and network designers do not need to consider it.

Answer: A,C

Explanation:

Fault management helps detect and address potential issues before downtime occurs, while measuring network performance, errors, and security metrics enables administrators to make data-driven decisions for maintaining and optimizing the network.

NEW QUESTION # 135

.....

All contents of JN0-1103 training prep are made by elites in this area rather than being fudged by laymen. Let alone the reasonable prices of our JN0-1103 exam materials which attracted tens of thousands of exam candidates mesmerized by their efficiency by proficient helpers of our company. Any difficult posers will be solved by our JN0-1103 Quiz guide. And we have free demos of our JN0-1103 study braindumps for you to try before purchase.
