Salesforce Certified Business Analyst Exam Sample Questions (Q63-Q68):

NEW QUESTION # 63

The business analyst (0A) at Universal Containers has met with stakeholders and is using the waterfall methodology to capture requirements for Sales Cloud enhancements for a future product release.

What is the next step for the BA to take before build can begin?

- A. Get approval and signoff on the requirements.
- **B. Schedule sprint planning meetings.**
- C. Define the minimal viable product.

Answer: B

NEW QUESTION # 64

Which method should a business analyst use to show current state business flows in Salesforce?

- A. Entity Relationship Diagramming
- **B. Universal Process Notation**
- C. Storyboarding

Answer: B

Explanation:

Universal Process Notation (UPN) is a method to show current state business flows in Salesforce. UPN is a process modeling technique that shows the flow of activities and decisions using simple symbols and plain language. It can help document existing processes in a clear and concise way that can be easily understood by anyone involved in the project. Entity Relationship Diagramming (ERD) is not a method to show current state business flows in Salesforce. ERD is a data modeling technique that shows the relationships among entities using symbols and attributes. It can help design database schemas or data structures for an application.

Storyboarding is not a method to show current state business flows in Salesforce. Storyboarding is a technique to help stakeholders visualize how a solution will work by creating sketches or mockups of the user interface and interactions. It can help elicit feedback and validate requirements for a proposed solution. References: 1

NEW QUESTION # 65

Universal Containers is developing a new case management solution in Salesforce. The business analyst has started writing user stories to capture feature needs. One user story is: "The customer care representative wants to take ownership of new cases and communicate with customers so they can provide high-touch customer experiences."

Which component of the user story is "provide high-touch customer experiences?"

- A. Assumption
- B. Where
- **C. Why**

Answer: C

NEW QUESTION # 66

Universal Containers (UC) needs a Quip template to create Account plans. UC's business analyst has been tasked with documenting requirements for this initiative. During one of the business requirements gathering sessions, a sales manager notes that it's important the new template is user-friendly and only accessible to the account team.

Which option captures this requirement?

- A. Accessible by members of the account team.
- **B. Make the template user-friendly and accessible only by members of the account team.**
- C. The sales manager can make the template user-friendly.

Answer: B

Explanation:

The option that captures this requirement is "Make the template user-friendly and accessible only by members of the account team."

This option clearly states what needs to be done (make the template user-friendly and accessible) and who it is for (members of the account team). The other options are either incomplete or irrelevant. Option B does not specify what needs to be done or who it is for. Option C does not specify what needs to be done or why it is important. NEW QUESTION # 67

As a part of discovery, the business analyst (BA) at Universal Containers is trying to understand how Salesforce was implemented. What should the BA utilize to help uncover any technical constraints or potential problems in a Salesforce implementation?

- A. Reports and Dashboards
- **B. Salesforce Optimizer**
- C. Setup Audit Trail

Answer: B

Explanation:

Explanation

The tool that the business analyst should use to help uncover any technical constraints or potential problems in a Salesforce implementation is Salesforce Optimizer. Salesforce Optimizer is a feature that analyzes a Salesforce org and provides recommendations for improving its performance, security, usability, and maintenance. It can help the business analyst identify any issues or risks in a Salesforce implementation such as unused features or components, complex configurations or customizations, low adoption rates or user satisfaction scores, etc. Setup Audit Trail is a tool that monitors and logs changes made by administrators in Setup. It can help the business analyst track who made what changes and when, but not uncover any technical constraints or potential problems in a Salesforce implementation. Reports and Dashboards are tools that display data or metrics in visual formats such as charts or tables.
