

# 3V0-23.25 Exams Collection | 3V0-23.25 Testdump

The price for 3V0-23.25 learning materials is reasonable, and no matter you are a student or an employee, you can afford the expense. In addition, 3V0-23.25 exam dumps are edited by professional experts, and therefore the quality can be guaranteed. 3V0-23.25 exam materials cover most of the knowledge points for the exam, and you can master them through study. In order to let you know the latest information for the exam, we offer you free update for 365 days after purchasing, and the update version for 3V0-23.25 Exam Dumps will be sent to you automatically.

When you grasp the key points to attend the 3V0-23.25 exam, nothing will be difficult for you anymore. Our professional experts are good at compiling the 3V0-23.25 training guide with the most important information. They have been in this career for over ten years, and they know every detail about the 3V0-23.25 Exam no matter on the content but also on the displays. Believe in our 3V0-23.25 practice braindumps, and your success is 100% guaranteed!

## VMware 3V0-23.25 Testdump - Valid 3V0-23.25 Test Blueprint

Our study material is not same as other dumps or study tools, it not only has good quality but also has cheap price. We have most professional team to compiled and revise 3V0-23.25 exam question, in order to try our best to help you pass the exam and get a better condition of your life and your work. Moreover, only need to spend 20-30 is it enough for you to grasp whole content of 3V0-23.25 practice materials that you can pass the exam easily, this is simply unimaginable.

## VMware Advanced VMware Cloud Foundation 9.0 Storage Sample Questions (Q49-Q54):

### NEW QUESTION # 49

A VCF Deployment Specialist is configuring a local protection group using vSAN Data Protection for a critical CRM application. The business requires a Recovery Point Objective (RPO) of 15 minutes, with the ability to roll back to any 15-minute interval within the last 24 hours.

The specialist prepares the JSON configuration for the Protection Group schedule:

'''

```
# vSAN Data Protection Schedule Spec
{
  "scheduleType": "INTERVAL",
  "intervalMinutes": 15,
  "retentionPolicy": {
    "type": "COUNT",
    "value": [ ? ]
  },
  "snapshotConfig": {
    "quiesce": false,
    "memory": false
  }
}
```

...

To strictly meet the 24-hour SLA requirement, what integer value must be inserted into the retentionPolicy.value field?

- A. 0
- B. 1,440
- C. 1
- D. 2

**Answer: A**

#### NEW QUESTION # 50

A VI Admin is diagnosing a "Component Limit Exceeded" alert on a vSAN OSA cluster. The cluster capacity is at 50%, but several ESXi hosts have hit their 9,000 maximum component count. The admin queries the component tree for a large data warehouse VM.

...

[RVC Output: vsan.obj\_status\_report ~cluster]

Object: SQL-DW-Data (4.0 TB)

Policy: FTT=1 (RAID-1), Stripe Width = 12

Total Object Component Count: 28 components

- Replica 1: 12 Stripe chunks + 2 Concatenation chunks (Size > 255GB)

- Replica 2: 12 Stripe chunks + 2 Concatenation chunks

- Witness: 0 (No tie-breaker currently mapped)

...

Based on the RVC output and vSAN mechanics, which TWO factors directly caused this single VMDK to consume 28 metadata components? (Choose 2.)

- A. The system defaulted to a Dual-Site Mirroring topology, inherently doubling the component count.
- B. The "Stripe Width = 12" policy forced the DOM to split the initial data payload into 12 separate data components per replica.
- C. The 4.0 TB object size triggered the automated Deduplication limit, requiring 12 extra components to store the hash tables.
- D. The 255 GB maximum component size limit was exceeded, forcing vSAN to concatenate the larger stripes into additional sub-components.
- E. The "Witness" state indicates a network partition, which spawned 28 temporary components to handle the voting logic.

**Answer: B,D**

#### NEW QUESTION # 51

A SOC Analyst is reviewing the Ruby vSphere Console (RVC) output for a 12-node VCF cluster to verify Key Provider consistency.

...

[RVC Output: vsan.encryption\_info ~cluster]

Host Encryption KMS Server KEK ID

esx-01 Enabled VCF-KMS-HA a1b2c3d4...

esx-02 Enabled VCF-KMS-HA a1b2c3d4...

esx-03 Enabled <Unreachable> a1b2c3d4...

...

esx-03 recently experienced a management network partition.

Why do the Virtual Machines hosted on esx-03 continue to read and write encrypted data seamlessly despite the Unreachable KMS status shown in RVC? (Select all that apply.)

- A. The KEK is persistently cached on the physical NVMe drives; ESXi reads the key from the disk during isolation.
- B. esx-03 automatically negotiated a peer-to-peer key exchange with esx-01 over the vSAN VMkernel network to retrieve the missing KEK.
- C. ESXi stores the KEK in secure volatile memory (RAM); since the host was running when the network dropped, the key is already loaded, and standard I/O pipelines do not require active KMS polling.
- D. esx-03 disabled encryption dynamically to maintain availability during the partition.
- E. The vsan.encryption\_info command only reports the control plane status of the vCenter-to-Host linkage; the dataplane inside esx-03 functions independently of the management network.

**Answer: C,E**

### NEW QUESTION # 52

A VCF Architect is designing the automated lifecycle management (LCM) workflow for a massive 48- node vSAN ESA cluster using Dell ReadyNodes.

The design integrates vSphere Lifecycle Manager (vLCM) with the OpenManage Integration for VMware vCenter (OMIVV) Hardware Support Manager (HSM).

```
...  
# vLCM Cluster Image JSON Spec  
"image": {  
  "esx_version": "8.0 U2",  
  "vendor_addon": "Dell_Customization",  
  "hsm_package": "OMIVV_Firmware_Baseline_v4"  
}  
...
```

How does the vCenter HCL Database interact with this automated vLCM firmware remediation loop? (Select all that apply.)

- A. vLCM ignores the vSAN HCL database entirely when a Hardware Support Manager is present, relying solely on the OEM vendor's internal certification matrix.
- B. The integration requires disabling the vSAN Health Service so that the OMIVV hardware manager can assume absolute control over the RAID controller configurations.
- C. Before applying the image, vLCM queries the active vSAN HCL Database to validate that the specific NVMe firmware contained in the "OMIVV Baseline" is officially certified for vSAN ESA 8.0 U2.
- D. Updating the HCL database inside vCenter automatically flashes the new firmware onto the physical Dell servers during the next standard maintenance window.
- E. If the HCL database determines the HSM firmware baseline is incompatible, the SDDC Manager compliance pre-check will block the remediation task to prevent corrupting the storage pool.

**Answer: C,E**

### NEW QUESTION # 53

A VCF Deployment Specialist is troubleshooting a complex partition in a vSAN ESA cluster. Following a vCenter restore from backup, the cluster split into 3 separate partition groups.

The specialist uses Ruby vSphere Console (RVC) to dump the CMMDS cluster table:

```
...  
[RVC Output: vsan.cluster_info ~cluster]  
Partition Group 1: esx-01 (Master), esx-02 (Backup), esx-03  
Partition Group 2: esx-04 (Master)  
Partition Group 3: esx-05 (Master), esx-06  
[root@esx-04:~] vmkping -I vmk2 192.168.10.1 (esx-01) -s 8972 -d  
Response: sendto() failed: Message too long  
...
```

Based on the RVC topology and vmkping output, which TWO configurations are directly causing this cluster segmentation? (Choose 2.)

- A. An MTU mismatch exists on the physical switch ports for esx-04, esx-05, and esx-06; the vSAN network requires 9000 MTU end-to-end, and jumbo frames are being dropped.
- B. The restored vCenter Server pushed an outdated Unicast Agent table to the hosts, causing desynchronization in the cluster membership lists.
- C. The ESXi hosts esx-04 through esx-06 lost connectivity to the vSAN Data-in-Transit (DiT) Key Management Server, breaking the secure network channels.
- D. esx-04 is placed in "vSAN Witness" mode, which automatically isolates it from standard data partition groups.
- E. Network I/O Control (NIOC) is actively blocking the CMMDS traffic because the Shares are set to "Low".

**Answer: A,B**

### NEW QUESTION # 54

.....

If you want to get through the 3V0-23.25 practice exam quickly with less time and efforts, our learning materials is definitely your best option. One or two days' preparation and remember the correct 3V0-23.25 test answers, getting the certification will be simple for our candidates. Free trials of 3V0-23.25 Exam PDF are available for everyone and great discounts are waiting for you. Join us and realize your dream

**3V0-23.25 Testdump:** <https://www.testkingpdf.com/3V0-23.25-testking-pdf-torrent.html>

Now, our 3V0-23.25 dumps vce have received warm reception from many countries and have become the leader in this field, VMware 3V0-23.25 Exams Collection Where is a will, there is a way, There is no site can compare with TestkingPDF 3V0-23.25 Testdump site's training materials, You can trust both 3V0-23.25 practice test software and start preparing today, TestkingPDF 3V0-23.25 exam offers the money back guarantee in case you failed to pass the 3V0-23.25 exam after using the 3V0-23.25 exam product offered by TestkingPDF.

A critical security concern of IT managers is the presence of rogue 3V0-23.25 wireless access points on the corporate network, Procedure: Adding a Transaction Link With Its Code to the Favorites Folder.
