## C-BCSBS-2502최고품질 덤프문제모음집 최신 업데이트된 덤프

제일 빠른 시일내에 제일 간단한 방법으로 SAP인증 C-BCSBS-2502 시험을 패스하는 방법이 없나구요? PassTIP의 SAP인증 C-BCSBS-2502 덤프를 공부하시면 가능합니다. PassTIP의 SAP인증 C-BCSBS-2502 덤프는 많은 분들이 검증한 가장 유력한 SAP인증 C-BCSBS-2502 시험공부자료입니다. 덤프의 문제만 기억하시면 패스는 문제없기에 제일 빠른 시일내에 시험을 패스하여 자격증 취득이 가능합니다.

# 최신 SAP Certified Associate C-BCSBS-2502 무료샘플문제 (Q22-Q27):

## 질문 # 22

Which SAP solutions provide real-time business intelligence and reporting? There are 2 correct answers to this question.

- A. SAP Predictive Analytics
- B. SAP BusinessObjects
- C. SAP Fieldglass
- D. SAP Transportation Management

정답: A,B

## 질문 # 23

What are some key differentiators of SAP Business AI?

Note: There are 3 correct answers to this question.

- A. Predictive Analytics
- B. AI Foundation
- C. Large foundation models
- D. Embedded AI
- E. Ecosystem of Innovation

정답: B,D,E

### 설명:

The question asks for the key differentiators of SAP Business AI, which is a suite of AI capabilities integrated into SAP Business Suite to enhance business processes, decision-making, and automation. According to official SAP documentation and the provided search results, the key differentiators of SAP Business AI include its ecosystem of innovation, embedded AI, and AI Foundation. These align with Options A, C, and E, making them the correct answers.

Explanation of Correct Answers:

Option A: Ecosystem of Innovation

This is correct because SAP Business AI is distinguished by its robust ecosystem of innovation, which includes partnerships with leading technology providers (e.g., NVIDIA, Google Cloud, Microsoft, AWS, Cohere) and implementation partners to deliver cutting-edge AI solutions. This ecosystem fosters collaborative innovation, enabling SAP Business AI to integrate advanced AI models, ensure interoperability, and address customer-specific needs through a network of expertise. The SAP Business AI overview on [www.sap.com](http://www.sap.com) states:

"SAP's AI strategy includes a robust partner ecosystem with synergistic collaboration, partnering with industry leaders like NVIDIA, Google Cloud, and Cohere to deliver interoperable AI agents and scalable solutions. This ecosystem enables SAP Business AI to address unique customer challenges through combined expertise and innovation." [sap.com](http://sap.com) Additionally, the SAP News Center emphasizes the role of partners in driving innovation:

"A key element of SAP's AI strategy is leveraging partners' expertise. Partners develop innovative AI solutions and extensions, enhancing the SAP portfolio with customer-specific use cases built on SAP BTP." [news.sap.com](http://news.sap.com) This ecosystem differentiates SAP Business AI by combining SAP's deep business process knowledge with external AI advancements, ensuring flexibility and rapid adoption of new technologies.

Option C: Embedded AI

This is correct because SAP Business AI is uniquely differentiated by its embedded AI capabilities, which are seamlessly integrated into SAP applications (e.g., SAP S/4HANA, SAP SuccessFactors, SAP Analytics Cloud) to enhance business processes directly within workflows. Unlike standalone AI solutions, embedded AI automates tasks, provides context-aware insights, and optimizes processes without requiring users to leave their SAP environment. The Exploring SAP's AI Strategy lesson on [learning.sap.com](http://learning.sap.com) states:

"Embedded AI Capabilities enhance SAP products by automating tasks, analyzing data, improving user experience, optimizing processes, fostering innovation, and ensuring seamless integration. Joule, a generative AI copilot, is embedded within SAP applications, offering generative AI, predictive analytics, process automation, and context-aware recommendations."

[learning.sap.com](http://learning.sap.com) For example, SAP S/4HANA uses embedded AI for predictive maintenance and supply chain optimization, while SAP Concur automates expense reporting. The SAP Business AI page on [www.sap.com](http://www.sap.com) further notes:

"Drive impact with AI grounded in your business data and embedded into every business function. ... With access to over 230 AI-powered scenarios-expanding to 400 by the end of 2025-SAP Business AI streamlines operations across finance, supply chain, and more." [sap.com](http://sap.com) This embedded approach ensures that AI is relevant and immediately applicable, distinguishing SAP Business AI from generic AI platforms.

Option E: AI Foundation

This is correct because the AI Foundation on SAP Business Technology Platform (BTP) is a key differentiator, providing a comprehensive toolkit for developers to build, extend, and run custom AI solutions tailored to business needs. It includes services like SAP AI Core, Generative AI Hub, and access to leading AI models, ensuring scalability, security, and integration with SAP and non-SAP data. The AI Foundation: SAP's all-in-one AI toolkit article on [community.sap.com](https://community.sap.com) states:

"AI Foundation is SAP's all-in-one AI toolkit, offering developers AI that's ready-to-use, customizable, grounded in business data, and supported by leading generative AI foundation models. It is also the basis for AI capabilities that SAP embeds across its portfolio." [community.sap.com/TheSAP\\_Sapphire\\_Innovation\\_Guide\\_2025](https://community.sap.com/TheSAP_Sapphire_Innovation_Guide_2025) further elaborates:

"AI Foundation is the backbone of SAP's AI technologies and provides comprehensive developer tools to build, extend, and run custom AI solutions at scale—all in one system. It simplifies AI development and operations, offering tools like the Prompt Optimizer and access to models like GPT-4.1, Claude 3.7 Sonnet, and Gemini 2.5 Pro." [sap.com](https://sap.com) This differentiates SAP Business AI by enabling businesses to create bespoke AI applications while leveraging SAP's enterprise-grade infrastructure, ensuring flexibility and governance.

### Explanation of Incorrect Answers:

### Option B: Large foundation models

This is incorrect because SAP Business AI does not primarily differentiate itself through the development or use of large foundation models (e.g., large language models or LLMs). Instead, SAP partners with leading LLM providers (e.g., Cohere, Mistral AI, Meta) to integrate their models into the SAP BTP Generative AI Hub, focusing on business-contextualized AI rather than building proprietary LLMs. The SAP Business AI article on [community.sap.com](https://community.sap.com) clarifies:

"SAP leverages a rich ecosystem of technology partner LLM offerings through SAP BTP's AI Foundation and Generative AI Hub, rather than developing SAP-specific LLMs. This approach ensures access to the latest innovations while prohibiting partners from training on customer data." [pages.community.sap.com](https://pages.community.sap.com) While SAP plans to fine-tune generic LLMs and create proprietary foundation models for structured data (e.g., SAP Foundation Model for tabular data), these are not yet a primary differentiator compared to the ecosystem, embedded AI, and AI Foundation. [learning.sap.com](https://learning.sap.com) Option D: Predictive Analytics This is incorrect because, while predictive analytics is a significant capability of SAP Business AI (e.g., forecasting demand in SAP Integrated Business Planning or predicting equipment failures in SAP S/4HANA), it is not a unique differentiator. Predictive analytics is a common feature in many AI platforms and is one of many capabilities within SAP Business AI, not a defining characteristic. The SAP Business AI documentation on [www.fingent.com](https://www.fingent.com) notes:

"SAP Business AI solutions use machine learning and advanced analytics, including predictive analytics, to gain insights into complex data. However, its differentiation lies in its integration with business processes and data, not the analytics techniques alone."

fingent.com The unique value of SAP Business AI comes from its ecosystem, embedded nature, and developer-centric AI

Foundation, rather than specific techniques like predictive analytics, which are widespread across AI solutions.

## Summary:

## The key d

The key differentiators of SAP Business Suite as ecosystem of innovation (leveraging a robust partner network for collaborative AI solutions), embedded AI (seamlessly integrated into SAP applications for process optimization), and AI Foundation (providing a scalable toolkit for custom AI development), corresponding to Options A, C, and E. Option B is incorrect because SAP relies on partner LLMs rather than proprietary large foundation models as a differentiator. Option D is incorrect because predictive analytics, while important, is not a unique differentiator compared to the broader ecosystem and integration capabilities. These differentiators align with SAP's strategy to deliver relevant, reliable, and responsible AI within SAP Business Suite, as supported by the provided search results and official documentation.

## 질문 #24

Which transformation journey is the right one for new SAP ERP customers?

- A. ACTIVATE with SAP journey
- B. ACCELERATE with SAP journey
- C. RISE with SAP journey
- D. GROW with SAP journey

정답: D

### 설명:

The question asks which transformation journey is appropriate for new SAP ERP customers, meaning organizations that are adopting SAP ERP for the first time or have minimal prior SAP experience. According to official SAP documentation and the provided

search results, GROW with SAP is the transformation journey specifically designed for new SAP ERP customers, particularly midmarket businesses or those seeking a rapid, standardized implementation of SAP S/4HANA Cloud, public edition. This makes Option C the correct answer.

Explanation of Correct answer:

Option C: GROW with SAP journey

This is correct because GROW with SAP is tailored for new SAP ERP customers, offering a streamlined, cloud-based journey to adopt SAP Business Suite, specifically SAP S/4HANA Cloud, public edition. It provides preconfigured best practices, a prescriptive methodology, and partner expertise to accelerate implementation, making it ideal for organizations starting fresh with SAP or those with simpler ERP needs. The [Showcasing the Path for Customers to Adopt SAP Business Suite](#) lesson on learning.sap.com states: "GROW with SAP supports new ERP customers in starting with SAP Business Suite, driving SAP's future growth alongside theirs. New customers always start with the public cloud. This journey provides an ever-green SAP Business Suite, always on the latest version and innovations." learning.sap.com The GROW with SAP journey is designed to help midmarket businesses or new SAP adopters modernize their ERP landscape quickly, leveraging SAP Cloud ERP and SAP Business Technology Platform (BTP) for scalability and efficiency. The [How to Get Started With GROW with SAP Journey](#) article from datalark.com further elaborates: "GROW with SAP is a digital transformation journey tailored to help mid-market businesses that aspire to enhance operational efficiency. ... Customers purchase one of the new SAP Business Suite packages (e.g., SAP Finance Base), then expand by adding further lines of business. ... GROW with SAP allows mid-market businesses to streamline their ERP journey to SAP Business Suite implementation." datalark.com Key features of GROW with SAP include standardized workflows, prebuilt content, and the SAP Activate methodology, which ensure a fast time-to-value without the complexities of legacy system migrations. This journey is particularly suited for greenfield implementations, where customers can start with a clean core and adopt cloud-native innovations like SAP Business AI from the outset.

Explanation of Incorrect Answers:

Option A: RISE with SAP journey

This is incorrect because RISE with SAP is designed for existing SAP ERP customers, particularly those with complex, on-premise landscapes (e.g., SAP ECC or SAP S/4HANA on-premise) looking to transition to the cloud, either via SAP S/4HANA Cloud, private edition or public edition. It is not tailored for new SAP customers who lack an existing SAP ERP footprint. The [RISE with SAP](#) page on [www.sap.com](http://www.sap.com) states:

"RISE with SAP is a guided transformation journey designed for SAP ERP customers to quickly realize the full potential of Business Suite, supported by proven methodologies, advanced tools, and expert guidance."

RISE with SAP is tailored for existing SAP ERP customers, enabling them to transition seamlessly from on-premises ERP to Business Suite while modernizing their processes and infrastructure at their own pace." sap.com

The focus on legacy system modernization and complex transformations makes RISE with SAP unsuitable for new customers starting with a clean slate.

Option B: ACTIVATE with SAP journey

This is incorrect because SAP Activate is not a transformation journey but a methodology used within transformation journeys like RISE with SAP and GROW with SAP. It provides a structured framework, templates, and best practices for implementing SAP solutions, but it is not a standalone customer-facing journey. The [GROW with SAP](#) article from datalark.com notes:

"Speed up deployment with SAP Activate. This methodology includes templates, project timelines, and best practices to ensure a smooth implementation." datalark.com Since SAP Activate is a toolset rather than a journey, it cannot be the correct choice for new SAP ERP customers.

Option D: ACCELERATE with SAP journey

This is incorrect because there is no transformation journey called ACCELERATE with SAP in SAP's official offerings. The term "accelerate" may be used in marketing materials to describe the speed of transformation (e.g., in RISE with SAP or GROW with SAP methodologies), but it is not a distinct journey. The provided search results and SAP documentation, including [Positioning SAP Business Suite](#) on learning.sap.com, do not reference an ACCELERATE with SAP journey, confirming that this is a fictitious option.

Summary:

The appropriate transformation journey for new SAP ERP customers is the GROW with SAP journey, as stated in Option C. This journey is designed for greenfield implementations, particularly for midmarket businesses or those new to SAP, providing a fast, standardized path to SAP S/4HANA Cloud, public edition within SAP Business Suite. Option A (RISE with SAP) is for existing SAP customers with legacy systems, Option B (ACTIVATE with SAP) is a methodology, not a journey, and Option D (ACCELERATE with SAP) does not exist. This aligns with SAP's strategy to support new customers with a cloud-native, scalable ERP solution, as validated by the provided search results and official documentation.

## 질문 # 25

What are some data challenges companies face that want to implement AI and insights for business transformation?

Note: There are 3 correct answers to this question.

- A. To integrate third-party applications
- B. To simplify the data landscape
- C. To harmonize data from multiple SAP applications
- D. To boost confidence in AI-generated content
- E. To access SAP Line of Business (LOB) data consistently

정답: B,C,E

### 설명:

The question asks about data challenges companies face when implementing AI and insights for business transformation, particularly in the context of SAP Business Suite. According to official SAP documentation, companies encounter significant hurdles related to data management, including simplifying complex data landscapes, accessing SAP Line of Business (LOB) data consistently, and harmonizing data across multiple SAP applications. These align with Options A, B, and E, making them the correct answers.

Explanation of Correct Answers:

Option A: To simplify the data landscape

This is correct because a complex and fragmented data landscape is a major challenge for companies seeking to implement AI and insights. Organizations often deal with siloed data across various systems, which hinders the ability to derive unified insights or train effective AI models. The Positioning SAP Business Suite documentation on learning.sap.com states:

"One of the top challenges for companies implementing AI and insights is simplifying the data landscape."

Fragmented data across on-premise, cloud, and hybrid systems creates inconsistencies that undermine AI-driven business transformation. SAP Business Suite, through solutions like SAP Datasphere, helps unify and simplify the data landscape for actionable insights. Simplifying the data landscape involves reducing silos, standardizing data formats, and enabling seamless data access, which is critical for AI applications that require high-quality, consolidated data. The documentation further emphasizes: "A simplified data landscape is foundational for AI and analytics, enabling organizations to leverage SAP Business Suite to drive intelligent, data-driven transformation." This confirms simplifying the data landscape as a key challenge.

Option B: To access SAP Line of Business (LOB) data consistently

This is correct because consistent access to SAP Line of Business (LOB) data (e.g., finance, supply chain, HR) is a significant challenge for AI and insights initiatives. LOB data is often stored in disparate SAP applications or modules, making it difficult to access uniformly for AI model training or real-time analytics.

The documentation notes:

"Companies face challenges in accessing SAP Line of Business data consistently due to the complexity of SAP systems and varying data structures across applications. SAP Business Suite addresses this by providing integrated data access through SAP Datasphere and SAP Business Technology Platform, ensuring LOB data is available for AI and insights." For example, SAP S/4HANA Cloud and other SAP applications generate critical LOB data, but without consistent access, organizations struggle to leverage this data for predictive analytics or process automation.

The documentation adds:

"Consistent access to LOB data is essential for embedding AI into business processes, enabling real-time insights and decision-making." This establishes accessing SAP LOB data consistently as a core challenge.

Option E: To harmonize data from multiple SAP applications

This is correct because harmonizing data from multiple SAP applications (e.g., SAP ECC, SAP S/4HANA, SAP SuccessFactors) is a critical challenge for AI-driven business transformation. Data across these applications often exists in different formats, schemas, or structures, complicating efforts to create a unified data foundation for AI and analytics. The documentation states:

"Harmonizing data from multiple SAP applications is a significant challenge for companies pursuing AI and insights. SAP Business Suite, through SAP Datasphere, provides a unified semantic layer to integrate and harmonize data, enabling seamless AI model development and analytics." SAP Datasphere plays a pivotal role by creating a business data fabric that harmonizes data for use in AI scenarios, such as those supported by SAP Business AI or SAP Databricks. The documentation further clarifies:

"Data harmonization across SAP applications ensures that AI models are trained on accurate, consistent data, driving reliable insights and business transformation." This confirms harmonizing data from multiple SAP applications as a key challenge.

Explanation of Incorrect Answers:

Option C: To integrate third-party applications

This is incorrect because, while integrating third-party applications can be a challenge in some contexts, it is not specifically highlighted as a primary data challenge for implementing AI and insights in the context of SAP Business Suite. The documentation focuses on challenges related to SAP data management, such as simplifying the data landscape and harmonizing SAP application data. While SAP Business Technology Platform (BTP) supports integration with third-party applications, the primary data challenges for AI are internal to SAP systems:

"The key data challenges for AI and insights include simplifying the data landscape, ensuring consistent access to SAP LOB data, and harmonizing data across SAP applications." Third-party integration is more of a general integration challenge rather than a data-

specific hurdle for AI implementation within SAP Business Suite.

Option D: To boost confidence in AI-generated content

This is incorrect because boosting confidence in AI-generated content is not a data challenge but rather a trust or governance issue. While ensuring trust in AI outputs is important (e.g., through explainable AI or data quality), it is not a data management challenge in the same way as simplifying, accessing, or harmonizing data. The documentation does not list this as a primary data challenge: "Data challenges for AI and insights focus on managing complexity, consistency, and harmonization of data within SAP systems, enabling a robust foundation for AI-driven transformation." Confidence in AI outputs is addressed through governance frameworks and AI ethics, not as a core data challenge.

Summary:

Companies implementing AI and insights for business transformation face data challenges, including simplifying the data landscape (to reduce silos and complexity), accessing SAP Line of Business (LOB) data consistently (to enable unified analytics), and harmonizing data from multiple SAP applications (to create a cohesive data foundation). These correspond to Options A, B, and E. Option C (integrating third-party applications) is a broader integration issue, not a primary data challenge, and Option D (boosting confidence in AI-generated content) is a governance concern, not a data challenge. These answers align with SAP's focus on unified data management for AI-driven transformation within SAP Business Suite.

## 질문 # 26

Match the challenges to their respective personas.

Retaining and engaging talent as skills requirements evolve	Delivering modernization and AI-powered innovation at the same time	Steering transformation by balancing growth and profitability	Running resilient global supply chains amidst constant disruptions	Meeting rising customer expectations	Optimizing cost, quality, availability and sustainability

정답:

설명:

\* CFO:Steering transformation by balancing growth and profitability

\* CPO:Optimizing cost, quality, availability and sustainability

\* COO:Running resilient global supply chains amidst constant disruptions

\* CHRO:Retaining and engaging talent as skills requirements evolve

\* CRO:Meeting rising customer expectations

\* CIO:Delivering modernization and AI-powered innovation at the same time

## 질문 # 27

퍼펙트한 SAP C-BCSBS-2502 시험대비 덤프자료는 PassTIP가 전문입니다. SAP C-BCSBS-2502 덤프를 다운받아 가장 쉬운 시험준비를 하여 한방에 패스하는 것입니다. 다같이 SAP C-BCSBS-2502 덤프로 시험패스에 주문걸어 보아요. 마술처럼 SAP C-BCSBS-2502 시험합격이 실현될 것입니다.

**C-BCSBS-2502 시험대비 덤프 최신문제:** <https://www.pastip.net/C-BCSBS-2502-pass-exam.html>

저희 사이트에서 제공해드리는 SAP C-BCSBS-2502 덤프를 퍼펙트하게 공부하시고 시험보시면 시험을 쉽게 패스 할 수 있습니다. C-BCSBS-2502 시험문제가 변경되면 C-BCSBS-2502 덤프도 최신버전으로 업데이트하도록 최선을 다하고 있습니다. PassTIP에서는 SAP인증 C-BCSBS-2502 시험을 도전해보시려는 분들을 위해 퍼펙트한 SAP인증 C-BCSBS-2502 덤프를 가벼운 가격으로 제공해드립니다. 덤프는 SAP인증 C-BCSBS-2502 시험의 기출문제와 예상문제로 제작된 것으로서 시험문제를 거의 100% 커버하고 있습니다. 하지만 SAP C-BCSBS-2502 패스는 쉬운 일은 아닙니다. SAP C-BCSBS-2502 패스는 여러분이 IT업계에 한발작 더 가까워졌다는 뜻이죠.

간절하게 말하는 두 예진을 바라보던 천무진의 입가에 피식 비웃음이 걸렸다. 서준은 이런 그녀에게 뜻 모를 미소를 보낼 뿐이었다. 저희 사이트에서 제공해드리는 SAP C-BCSBS-2502 덤프를 퍼펙트하게 공부하시고 시험보시면 시험을 쉽게 패스할 수 있습니다.

## C-BCSBS-2502 최고 품질 덤프문제모음집 퍼펙트한 덤프로 시험패스하여 자격증을 취득하기
