問題 #36

An NFPA document using the word "shall" indicates that the item is a

- A. recommendation.
- B. performance standard.
- **C. mandate.**
- D. guideline.

答案：C

解題說明：

NFPA uses mandatory language to indicate requirements:

"Shall" = mandatory requirement (must comply).

"Should" = advisory or recommended practice.

Therefore, when NFPA states "shall," it represents a mandate.

D). mandate (Correct): Required compliance.

A). recommendation / B. guideline: NFPA uses "should" for recommendations.

C). performance standard: Not the intent of "shall" language.

問題 #37

After a recent lighting retrofit, the measured load on the affected lighting panel is 110 amps at 277 volts. The load is constant for 100 hours each week. Assuming the power factor to be 1, what is the annual energy consumption in kWh?

- A. 15,844,400
Step-by-Step Calculation:
Power (kW) = Volts × Amps ÷ 1000 = 277 × 110 ÷ 1000 = 30.47 kW
Weekly consumption = 30.47 × 100 hr = 3,047 kWh/week
Annual consumption = 3,047 × 52 = 158,444 kWh/year
- B. 15,844.4
- C. 158,444
- D. 1,584.44

答案： C

解題說明：

The correct calculation shows an annual energy consumption of 158,444 kWh. Smaller values (A and B) underestimate by factor of 10, while D overestimates by factor of 100.

問題 #38

Fire drills in healthcare occupancies shall include the

- A. transmission of a fire alarm signal and audible alarms on each shift.
- B. evacuation of bedridden and infirmed patients to the adjacent smoke compartment.
- C. transmission of the fire alarm signal and simulation of emergency fire conditions.
- D. evacuation of patients to areas of refuge and evacuation of staff from the building.

答案： C

解題說明：

NFPA 101 (Life Safety Code, Chapter 18/19.7.1.4) requires healthcare fire drills to include transmission of the fire alarm signal and a simulation of emergency fire conditions, ensuring staff are trained to carry out emergency duties. Full evacuation of patients is not required during drills.

問題 #39

When performing an in-house renovation project in a dietitian's office, members of the project coordination team should include

- A. information technologies and finance.
- B. housekeeping and security.
- C. interior designer and supply chain.
- D. infection prevention and safety.

答案： D

解題說明：

Any renovation project in a healthcare environment—even in non-clinical spaces like a dietitian's office— requires evaluation of infection control and safety hazards. The Infection Control Risk Assessment (ICRA) process, supported by The Joint Commission and Facility Guidelines Institute (FGI) standards, mandates involvement of infection prevention and safety personnel in planning. Correct (D): Ensures compliance with infection prevention standards and staff/patient safety during renovation.

Incorrect:

A). housekeeping and security: Important for support but not primary coordinators.

B). interior designer and supply chain: Handle design and material procurement, but not regulatory compliance.

C). information technologies and finance: Important in certain projects, but not relevant for infection/safety planning.

References:

問題 #40

Which scenario is best for managing an inventory of repair parts?

- A. Purchase critical spare parts from suppliers on an annual basis.
- **B. Purchase one spare part in inventory for all patient equipment parts in use.**
- C. Purchase one spare part in inventory for each part in use.
- D. Purchase spare parts from suppliers as replacements are needed.

答案: B

解題說明:

Best practice in healthcare facilities management is to keep one critical spare part for each unique piece of patient-care equipment (not for every unit). This approach balances patient safety and risk mitigation while avoiding excessive storage costs.

A: "As needed" creates downtime risk.

B: Annual bulk purchase may leave gaps in urgent needs.

D: One-for-one spares is excessive, costly, and impractical.
