

Cisco 300-425 Dumps - A Surefire Way To Achieve Success

BONUS!!! Download part of ActualTestsQuiz 300-425 dumps for free: https://drive.google.com/open?id=1wlb5m17hg-7bbodl_b_dNpqZZjwFWKOOf

Users are buying something online (such as 300-425 prepare questions), always want vendors to provide a fast and convenient sourcing channel to better ensure the user's use. Because without a quick purchase process, users of our 300-425 quiz guide will not be able to quickly start their own review program. So, our company employs many experts to design a fast sourcing channel for our 300-425 Exam Prep. All users can implement fast purchase and use our learning materials. We have specialized software to optimize the user's purchase channels, if you decide to purchase our 300-425 prepare questions, you can achieve the product content even if the update service and efficient and convenient user experience.

It is hard to pass without in-depth 300-425 exam preparation. The ActualTestsQuiz understands this challenge and offers real, valid, and top-notch 300-425 exam dumps in three different formats. These formats are 300-425 PDF dumps files, desktop practice test software, and web-based practice test software. All these three 300-425 Exam Questions formats are easy to use and compatible with all devices, operating systems, and web browsers. Just choose the best 300-425 exam questions format and start 300-425 exam preparation without wasting further time.

Exam 300-425 Course - 300-425 Associate Level Exam

You can also trust ActualTestsQuiz 300-425 exam practice questions and start preparation with complete peace of mind and satisfaction. The 300-425 Exam Questions are designed and verified by experienced and renowned Cisco exam trainers. They work collectively and strive hard to ensure the top quality of 300-425 Exam Practice questions all the time.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q321-Q326):

NEW QUESTION # 321

Campus users report a poor wireless experience. An engineer investigating the issue notices that in high-density areas the wireless clients fail to switch the AP to which are automatically connected. This sticky client behavior is causing roaming issues. Which feature must the engineer configure?

- A. Layer 2 roaming
- B. load balancing and band select
- C. Layer 3 roaming
- D. optimized roaming

Answer: D

NEW QUESTION # 322

A customer uses a Cisco Catalyst 9800 Series wireless controller to manage all of the APs for a campus network. Secure guest access is required for the guest network. A Cisco 5520 anchor controller is deployed within a DMZ. Which design approach ensures that the mobility tunnel is established successfully between the wireless controller and the anchor controller?

- A. Disable data link encryption on the anchor controller.
- **B. Run an Inter-Release Controller Mobility compatible software version on the anchor controller.**
- C. Run an Inter-Release Controller Mobility compatible software version on the wireless controller.
- D. Enable control plane encryption on the wireless controller.

Answer: B

NEW QUESTION # 323

Refer to the exhibit. An engineer must design a mobility group that has these requirements:

- * The mobility group must consist of two WLCs.
- * All WLCs must run software version 8.0 or later.
- * The WLCs must connect via an IPv4 network.
- * Two of the WLCs must be in an SSO high availability pair.

Which two configurations must be included in the design? (Choose two.)

- A. All the WLCs must run the same software version.
- B. All the WLCs must be of the same model or type.
- C. Only WLCs in an SSO high availability pair must use the same virtual IP address.
- **D. Each WLC must use the same mobility domain name.**
- **E. The WLAN SSID must be consistent across all the WLCs.**

Answer: D,E

NEW QUESTION # 324

An engineer is upgrading the legacy APs to 802.11ac Wave 2 capable APs. The existing gigabit uplinked switches provide 802.3at. Which switch limitation is a concern?

- A. high availability
- B. interface throughput
- **C. output power**
- D. collision domains

Answer: C

Explanation:

The concern with existing gigabit uplinked switches providing 802.3at is the output power limitation. 802.11ac Wave 2 APs may require more power than what 802.3at can deliver, especially for features like Multi-User Multiple Input Multiple Output (MU-MIMO).

NEW QUESTION # 325

A wireless deployment in a high-density environment is being used by vendors to process credit card payment transactions via handheld mobile scanners. The scanners are having problems roaming between access points in the environment. Which feature on the wireless controller should have been incorporated in the design?

- A. AP Heartbeat Timeout
- **B. 802.11w**
- C. Application Visibility Control
- D. RX SOP

Answer: B

Explanation:

For handheld mobile scanners processing credit card payments, security and seamless roaming are critical. The 802.11w standard,

also known as Protected Management Frames (PMF), provides enhanced security that helps prevent disconnections and issues when roaming between access points. Incorporating 802.11w in the design ensures that the scanners maintain a secure and consistent connection while moving throughout the environment.
