GH-100 Actual Exam Dumps - New GH-100 Test Syllabus

Taking these mock exams is important because it tells you where you stand. People who are confident about their knowledge and expertise can take these GH-100 practice tests and check their scores to know where they lack. This is good practice to be a pro and clear your GitHub Administration (GH-100) exam with amazing scores. BraindumpsIT practice tests simulate the real GH-100 exam questions environment.

Microsoft GitHub Administration Sample Questions (Q18-Q23):

NEW QUESTION # 18
What is a key characteristic of GitHub Enterprise Server (GHES) compared to GitHub Enterprise Cloud (GHEC)?

- A. GHEC offers data residency options in regions that GHES does not support.
- B. GHES users cannot integrate with external identity providers for authentication.
- C. GHES allows enterprises to have complete control over their hosting environment, including data storage and network security policies.
- D. GHES is hosted by GitHub and offers automatic scaling, while GHEC requires self-hosting.

Answer: C

Explanation:
GitHub Enterprise Server is a self-hosted product you install and manage on your own infrastructure - giving you full control over data storage, network security policies, and the underlying environment.

NEW QUESTION # 19
What is the key benefit of using a GitHub security advisory within a repository?

- A. It flags all forks of the repository as vulnerable.
- B. It allows maintainers to privately disclose, discuss, and publish vulnerabilities.
- C. It prevents users from cloning the repository until issues are resolved.
- D. It automatically reverts commits that introduced the vulnerability.

Answer: B

Explanation:
GitHub security advisories let maintainers privately disclose, discuss fixes, and then publish vulnerabilities in a controlled manner within the repository.

NEW QUESTION # 20
You discover that a secret (e.g., a token or password) was accidentally committed to a GitHub repository. What is the first step you should take to mitigate the risk?

- A. Revoke and/or rotate the secret to render it unusable, then assess whether history rewriting is necessary.
- B. Contact GitHub Support to remove the secret from all forks and clones of the repository.
- C. Delete the repository and create a new one to ensure the secret is no longer accessible.
- D. Rewrite the repository history using git filter-repo or BFG Repo-Cleaner to remove the secret from all commits.

Answer: A

Explanation:
The immediate priority is to revoke or rotate the exposed credential so it can no longer be used; once it's invalidated, you can safely proceed with history-rewriting or other cleanup steps.

NEW QUESTION # 21
When comparing fine-grained Personal Access Tokens (PATs) with classic PATs, which of the following statements is accurate?

- A. Classic PATs can be restricted to specific organizations, but fine-grained PATs cannot.
- B. Fine-grained PATs permissions can be scoped to specific repositories.
- C. Fine-grained PATs automatically renew while classic PATs require manual renewal.
- D. Classic PATs offer more permission controls than fine-grained PATs.

Answer: B

Explanation:
Fine-grained personal access tokens let you scope permissions down to individual repositories, whereas classic PATs grant access across every repo the user can reach.

NEW QUESTION # 22
What additional capability does secret scanning offer for private repositories on GitHub Enterprise Cloud?

- A. Disables any code that contains a secret.
- B. Rewrites history to remove secrets.
- C. Revokes GitHub access tokens automatically.
- D. Allows custom pattern definitions for internal secret formats.

Answer: D

Explanation:
Secret scanning in private repositories on GitHub Enterprise Cloud lets you define and use custom regular-expression patterns - so you can detect internal or proprietary secret formats beyond the default partner-provided types.

NEW QUESTION # 23
.....

When candidates decide to pass the GH-100 exam, the first thing that comes to mind is to look for a study material to prepare for their exam. The most people will consider that choose GH-100 question torrent, because it has now provided thousands of online test papers for the majority of test takers to perform simulation exercises, helped tens of thousands of candidates pass the GH-100 Exam, and got their own dream industry certificates. That is to say, there is absolutely no mistake in choosing our GH-100 test guide to prepare your exam, you will pass your exam in first try and achieve your dream soon.

GH-100 Actual Exam Dumps: https://www.braindumpsit.com/GH-100_real-exam.html

The GH-100 study materials through research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use, What I want to tell you is that for GH-100 preparation materials, this is a very simple matter, We eliminated the filler and simplified the GH-100 Actual Exam Dumps - GitHub Administration exam preparation process so you can ace the Microsoft GH-100 Actual Exam Dumps certification exam on your first try.

However, today the IT infrastructure is distributed and heterogeneous, Executives, managers, consultants, leaders, program managers, and Agile change agents, The GH-100 study materials through research and analysis of the annual questions, found that there GH-100 are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use.

TRY Microsoft GH-100 DUMPS - SUCCESSFUL PLAN TO PASS THE EXAM
