Explanation:
In SAP S/4HANA Transportation Management, a consignment order is a logical grouping document used primarily in logistics service provider (LSP) scenarios to manage communication between shippers and consignees. According to the SAP documentation, its functions include:
* Subcontracting (B): Consignment orders can trigger subcontracting processes by assigning transportation tasks to carriers, often through freight orders or bookings.

* Tendering (A) is performed at the freight order or freight booking level, not directly by consignment orders.
