Additionally, candidates can also take advantage of study materials and practice exams to help them prepare.

CyberArk Defender - PAM Sample Questions (Q15-Q20):

NEW QUESTION # 15
It is possible to restrict the time of day, or day of week that a [b]verify[/b] process can occur

- A. TRUE
- B. FALSE

Answer: A

Explanation:
Explanation
Password verification can be restricted to specific days. This means that the CPM will only verify passwords on the days of the week specified in the VFExecutionDays parameter. The days of the week are represented by the first 3 letters of the name of the day. Sunday is represented by Sun, Monday by Mon, etc.

NEW QUESTION # 16
Users who have the 'Access Safe without confirmation' safe permission on a safe where accounts are configured for Dual control, still need to request approval to use the account.

- A. TRUE
- B. FALSE

Answer: B

Explanation:
Explanation
Users who have the 'Access Safe without confirmation' safe permission on a safe where accounts are configured for Dual control, do not need to request approval to use the account. The 'Access Safe without confirmation' safe permission is a special permission that allows a user to bypass the Dual control mechanism and access the accounts in the safe without requiring confirmation from other authorized users. This permission can be useful for emergency situations or trusted users who need immediate access to the accounts. However, this permission also increases the risk of unauthorized or malicious access, so it should be granted with caution and monitored closely1.

NEW QUESTION # 17
A new colleague created a directory mapping between the Active Directory groups and the Vault.
Where can the newly Configured directory mapping be tested?

- A. Connect to Sailpoint (or similar tool) to ensure the organizational unit is correctly named; log in to the PVWA with "Administrator" and confirm authentication succeeds.

- B. Connect to the PrivateArk Client with the Administrator Account to see if there is a user in the Vault Admin Group.
- C. Connect to the Active Directory and ensure the organizational unit exists.
- D. Search for members that exist only in the mapping group to grant them safe permissions through the PVWA.

Answer: D

Explanation:
Explanation
The newly configured directory mapping can be tested by searching for members that exist only in the mapping group to grant them safe permissions through the PVWA (Privileged Vault Web Access). This process allows you to verify that the directory mapping is functioning correctly by ensuring that only the intended users, who are part of the specific Active Directory group, are granted access to the safes in the CyberArk Vault12.

NEW QUESTION # 18
You have been asked to turn off the time access restrictions for a safe.
Where is this setting found?

- A. Password Vault Web Access (PVWA)
- B. Vault
- C. PrivateArk
- D. RestAPI

Answer: C

Explanation:
Explanation
The time access restrictions for a safe are configured in the PrivateArk Administrative Client, which is a graphical user interface that allows users to manage safes and their properties. The time access restrictions are set in the Time Access Restrictions tab of the Safe properties window. This tab enables users to specify the days and hours when the safe can be accessed. If the time access restrictions are turned off, the safe can be accessed at any time. References: PrivateArk Safe management, Advanced Safe Management

NEW QUESTION # 19
When are external vault users and groups synchronized by default?

- A. They are not synchronized according to a specific schedule.
- B. They are synchronized every 2 hours.
- C. They are synchronized once every 24 hours between 1 AM and 5 AM. Most Voted
- D. They are synchronized once every 24 hours between 7 PM and 12 AM.

Answer: C

NEW QUESTION # 20
