## Free PDF Quiz High-quality Esri - EAEP2201 Test Topics Pdf

According to the statistic about candidates, we find that some of them take part in the Esri exam for the first time. Considering the inexperience of most candidates, we provide some free trail for our customers to have a basic knowledge of the EAEP2201 exam guide and get the hang of how to achieve the EAEP2201 exam certification in their first attempt. You can download a small part of PDF demo, which is in a form of questions and answers relevant to your coming EAEP2201 Exam; and then you may have a decision about whether you are content with it. In fact, there are no absolutely right EAEP2201 exam questions for you; there is just a suitable learning tool for your practices. Therefore, for your convenience and your future using experience, we sincere suggest you to have a download to before payment.

The EAEP2201 exam is a challenging exam that requires extensive preparation and experience in GIS administration. It is a

performance-based exam that evaluates an individual's ability to complete real-world tasks that are commonly performed by GIS administrators. EAEP2201 Exam is designed to assess an individual's knowledge and skills in a variety of areas, including installation and configuration of ArcGIS Enterprise, database management, troubleshooting and monitoring, and security and compliance.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q17-Q22):

### NEW QUESTION # 17

ArcGIS Server is installed with its Web Adaptor on the same server. The configuration is as follows:

- \* ArcGIS Server is federated with Portal for ArcGIS
- \* Portal is set up to use Integrated Windows Authentication
- \* The environment was set up using a domain certificate
- \* The attempted login account is a Windows account with admin privileges A GIS administrator tries to connect to ArcGIS Server Manager through ArcGIS Web Adaptor but the connection fails. Why did the connection fail?

- A. The certificate must come from a valid Certificate Authority and not a Domain Certificate Authority
- **B. The Web Adaptor was not set to allow administrative access to the server**
- C. The connection must be made with an internal admin account and not a Windows account

**Answer: B**

Explanation:

When using a Web Adaptor to access ArcGIS Server Manager, administrative access must be explicitly enabled during Web Adaptor configuration. If this setting is not enabled, even valid administrator accounts (including Windows accounts with elevated privileges) will be unable to access ArcGIS Server Manager via the Web Adaptor.

This is a common configuration oversight. The federation, IWA setup, and domain certificate are not the causes here. A domain certificate is valid within trusted enterprise networks, and Windows accounts can access services through IWA once configured correctly.

### NEW QUESTION # 18

A client develops a tiered approach to back up their ArcGIS Enterprise base deployment using the webgisdrtool. The client has no map service or hosted tile layer caches. All spatial data is stored in the ArcGIS Data Store (relational). The client will perform full webgisdr backups every Sunday and incremental webgisdr backups Monday through Saturday. The default settings of an ArcGIS Enterprise deployment must be modified to support this. Which action should the administrator perform?

- **A. Enable point-in-time recovery on the ArcGIS Data Store to support daily backups**
- B. Decrease the max connections during backups to reduce the number of users connected.
- C. Increase the heap size of the ArcGIS Data Store to support incremental backups

**Answer: A**

### NEW QUESTION # 19

A GIS analyst creates a layer in ArcGIS Pro that must be published to the ArcGIS Enterprise portal as a web service that supports editing. The analyst does not have a connection to the ArcGIS Server where the service must be published.

What action should the analyst perform?

- A. Create a service definition file to be published by a portal administrator
- B. Change the privileges on their user role to allow publishing
- **C. Upload the layer to the portal as a layer package file and add it to a web map**

**Answer: C**

### NEW QUESTION # 20

Some members of an ArcGIS Enterprise organization are unable to create web maps and web scenes. The users are only responsible for creating stories with ArcGIS StoryMaps.

What should the GIS administrator do to prevent confusion about non-accessible functionality to those users?

- A. Configure a maintenance notification to explain the access limitation in Portal for ArcGIS
- **B. Configure the ArcGIS Enterprise home page to show only items that are accessible to the signed-in user**
- C. Configure Page visibility settings to remove web maps and web scenes from the navigation bar

**Answer: B**

Explanation:

To prevent confusion among users who do not have access to certain functionalities, such as creating web maps and web scenes, the GIS administrator should configure the ArcGIS Enterprise home page to display only the items and tools that are accessible to the signed-in user. This customization ensures that users see a tailored interface that aligns with their permissions and responsibilities, reducing the likelihood of encountering inaccessible options.

Configuring a maintenance notification (Option A) is more appropriate for temporary service outages or updates, not for managing user interface elements. Adjusting Page visibility settings (Option B) affects the visibility of entire pages but does not provide the granular control needed to tailor the home page based on user roles and permissions.

Reference Source: ArcGIS Enterprise documentation on customizing the home page and user experience

### NEW QUESTION # 21

An organization buys an additional 25 licenses for ArcGIS Pro and needs to assign the licenses to ArcGIS Enterprise users. Which license file is required to make those assignments?

- A. Any existing license file used previously
- B. An updated license file with only the 25 additional ArcGIS Pro licenses
- **C. An updated license file with 25 additional ArcGIS Pro licenses**
- D. New license file with just the 25 ArcGIS Pro licenses

**Answer: C**

Explanation:

When an organization purchases additional licenses (e.g., ArcGIS Pro), a new combined license file must be generated that includes both the existing entitlements and the newly purchased ones. This updated license file reflects the total number of licenses (original + new).

From the ArcGIS Enterprise Licensing documentation:

"When downloading a new license file from My Esri to assign additional licenses, the license file must reflect the complete set of user types and extensions required. You must generate a new license file that includes both the existing and new entitlements."

\* Option A is incorrect because a license file with only the new licenses would overwrite the previous file.

\* Option B is incorrect for the same reason - partial license files are not valid for merging with existing licenses.

\* Option D does not accommodate the new licenses.
