

HP HPE7-J02模擬対策 & HPE7-J02合格体験記

無料でクラウドストレージから最新のShikenPASS HPE7-J02 PDFダンプをダウンロードする：<https://drive.google.com/open?id=16kDLjBe8MhUede7QC3O-upcWpzZlbaLl>

専門的に言えば、試験を受けるに関するテクニックを勉強する必要があります。ShikenPASSというサイトは素晴らしいソースサイトで、HPのHPE7-J02の試験材料、研究材料、技術材料や詳しい解答に含まれています。問題集が提供したサイトは近年で急速に増加しています。あなたは試験の準備をするときに見当もつかないかもしれません。ShikenPASSのHPのHPE7-J02試験トレーニング資料は専門家と受験生の皆様に証明された有効なトレーニング資料で、あなたが試験の合格することを助けられます。

HP HPE7-J02 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Optimization, Monitoring and Management	20%	- Optimize performance, capacity and efficiency - Use HPE OneView, InfoSight and management tools - Troubleshoot and maintain storage infrastructure
Topic 2: Implementation and Integration	20%	- Deploy, configure and integrate HPE storage solutions - Integrate with virtualization, cloud and application environments - Implement data services: replication, snapshots, tiering
Topic 3: HPE Storage Portfolio and Positioning	20%	- Position solutions against competitive offerings - Use HPE tools and resources for solution design - Understand HPE Primera, Alletra, Nimble, StoreOnce and 3PAR products
Topic 4: Planning and Validating Storage Solutions	20%	- Size and design multi-site storage solutions - Evaluate customer requirements and environment - Validate solution against performance, availability and scalability needs
Topic 5: Storage Networking and Transport	20%	- Multi-site connectivity and data transport technologies - SAN, Fibre Channel, iSCSI and NVMe-oF architectures - High availability and disaster recovery design

一生懸命にHPE7-J02模擬対策 & 合格スムーズHPE7-J02合格体験記 | 正確なHPE7-J02受験料過去問

現在の仕事と現在の生活に飽きていますか？ 便利な証明書を入手してください！ HPE7-J02学習ガイドは、目標を達成するのに役立つ最高の製品です。試験に合格し、HPE7-J02学習教材で認定を取得すると、大企業で満足いく仕事に応募し、高い給与と高い利益で上級職に就くことができます。優れたHP HPE7-J02スタディガイドにより、受験者は、余分な時間とエネルギーを無駄にせず効率的にテストを準備するための明確な学習方向を得ることができます。

HP Advanced HPE Storage Integrator Solutions Written Exam 認定 HPE7-J02 試験問題 (Q36-Q41):

質問 # 36

Review the diagram showing an Active Peer Persistence deployment across two arrays.

Question : Which Host Proximity Parameter should be configured for ESX31 to ensure localized access?

- A. All
- B. Secondary
- C. Primary
- D. Exclusive

正解: B

質問 # 37

You are sizing an HPE Alletra 5030. Unless otherwise indicated by the HPE sizer or the customer's requirements, HPE best practices state that you should default to which minimum FDR calculation?

- A. Above 12% for low-read latency
- B. Below 12% for low-read latency
- C. 23% of the smallest drive size
- D. 23% of the largest drive size

正解: D

解説:

In Alletra 5000/6000 sizing, the Failure Domain Reserve (FDR) is used to account for rebuild overhead in case of drive failure. HPE best practices define that, unless otherwise directed by the sizing tool or customer requirements, the minimum FDR value should be set to 23% of the largest drive size. This ensures enough reserve capacity for fault tolerance and sustained performance during rebuilds.

質問 # 38

A customer is replacing their HPE 3PAR 8200 Peer Persistence setup with Alletra 6000. In a recent audit, they were warned that the Quorum Witness VM was missing security updates.

How would you respond regarding the new setup?

- A. Quorum witness appliance can be set to automatically download and apply available updates.
- B. Quorum witness appliance security patch updates follow the array release train updates.
- C. Quorum witness is deployed as a SaaS option, and security updates are applied automatically.
- D. Quorum witness is installed as a service on a supported Linux server, which can be updated as needed.

正解: C

解説:

With Alletra and Primera Peer Persistence, the Quorum Witness is no longer a self-hosted VM. It is delivered as a cloud-based SaaS service managed by HPE. This eliminates customer responsibility for patching and ensures HPE automatically applies updates and security fixes.

This resolves the audit concern.

質問 # 39

Your customer has just gone through a merger and is consolidating datacenters. They are currently using a mix of manufacturers. They are evaluating whether to consolidate on HPE as their new standard. You are helping them size their new virtualized environment. What additional information do you need to decide on an assessment tool?

- A. If any equipment has expired support contracts
- **B. If they are virtualized on VMware or Hyper-V**
- C. If they are using AWS or Azure public cloud storage
- D. If they are only purchasing in a CapEx model

正解: B

解説:

The choice of assessment tool (e.g., HPE CloudPhysics for VMware vs. CloudPhysics.vhdx collector for Hyper-V) depends primarily on the virtualization platform in use. VMware and Hyper-V require different collectors, and this is the deciding factor for tool selection.

質問 # 40

You are sizing an HPE Alletra 5030. Unless otherwise indicated by the HPE sizer or the customer's requirements, HPE best practices state that you should default to which minimum FDR calculation?

- A. Above 12% for low-read latency
- B. Below 12% for low-read latency
- C. 23% of the smallest drive size
- **D. 23% of the largest drive size**

正解: D

解説:

Detailed Explanation:

Rationale for Correct Answer:

In Alletra 5000/6000 sizing, the Failure Domain Reserve (FDR) is used to account for rebuild overhead in case of drive failure. HPE best practices define that, unless otherwise directed by the sizing tool or customer requirements, the minimum FDR value should be set to 23% of the largest drive size. This ensures enough reserve capacity for fault tolerance and sustained performance during rebuilds.

Distractors:

B/C: Low-read latency is influenced by cache and workload profile, not by arbitrary FDR percentages.

D: Using the smallest drive is incorrect - rebuild impact must be sized against the largest drive.

Key Concept: FDR sizing based on 23% of largest drive = HPE best practice.

Reference: HPE Alletra 5000/6000 Sizing and Configuration Guide.

質問 # 41
