

Latest Fortinet FCSS_EFW_AD-7.6 Mock Exam | Reliable FCSS_EFW_AD-7.6 Exam Price

BONUS!!! Download part of DumpStillValid FCSS_EFW_AD-7.6 dumps for free: https://drive.google.com/open?id=1TJrFSxazsU3K1_b45-re6aje3-lQumSy

All these three Fortinet FCSS_EFW_AD-7.6 exam questions formats contain the real and updated FCSS_EFW_AD-7.6 exam questions. These FCSS - Enterprise Firewall 7.6 Administrator (FCSS_EFW_AD-7.6) exam questions are being presented in practice test software and PDF dumps file formats. The FCSS_EFW_AD-7.6 desktop practice test software is easy to use and install on your desktop computers. Whereas the other Fortinet FCSS_EFW_AD-7.6 web-based practice test software is concerned, this is a simple browser-based application that works with all operating systems. Both practice tests are customizable, simulate actual exam scenarios, and help you overcome mistakes.

Students are given a fixed amount of time to complete each test, thus Fortinet Exam Questions candidate's ability to control their time and finish the Fortinet FCSS_EFW_AD-7.6 exam in the allocated time is a crucial qualification. Obviously, this calls for lots of practice. Taking DumpStillValid FCSS_EFW_AD-7.6 Practice Exam helps you get familiar with the FCSS - Enterprise Firewall 7.6 Administrator (FCSS_EFW_AD-7.6) exam questions and work on your time management skills in preparation for the real FCSS - Enterprise Firewall 7.6 Administrator (FCSS_EFW_AD-7.6) exam.

Reliable FCSS_EFW_AD-7.6 Exam Price - FCSS_EFW_AD-7.6 Exam Papers

Our FCSS_EFW_AD-7.6 training materials are famous at home and abroad, the main reason is because we have other companies that do not have core competitiveness, there are many complicated similar products on the market, if you want to stand out is the selling point of needs its own. Our FCSS_EFW_AD-7.6 test question with other product of different thing is we have the most core expert team to update our FCSS_EFW_AD-7.6 Study Materials, the FCSS_EFW_AD-7.6 practice test materials give supervision and update the progress every day, it emphasized the key selling point of the product.

Fortinet FCSS_EFW_AD-7.6 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> VPN: This section of the exam measures the skills of a VPN Solutions Engineer and covers the implementation of various virtual private network technologies. It includes configuring IPsec VPN using IKE version 2 protocols and implementing Automatic Discovery VPN solutions to establish on-demand secure tunnels between multiple sites within an enterprise network infrastructure.
Topic 2	<ul style="list-style-type: none"> Central Management: This section of the exam measures the skills of a Security Operations Manager and covers the implementation of centralized management systems for coordinated control and oversight of distributed Fortinet security infrastructures across enterprise environments.
Topic 3	<ul style="list-style-type: none"> Routing: This section of the exam measures the skills of a Network Infrastructure Engineer and covers the implementation of dynamic routing protocols for enterprise network traffic management. It includes configuring both OSPF and BGP routing protocols to ensure efficient and reliable data transmission across complex organizational networks.
Topic 4	<ul style="list-style-type: none"> System Configuration: This section of the exam measures the skills of a Network Security Architect and covers the implementation and integration of core Fortinet infrastructure components. It includes deploying the Security Fabric, enabling hardware acceleration, configuring high availability operational modes, and designing enterprise networks utilizing VLANs and VDOM technologies to meet specific organizational requirements.
Topic 5	<ul style="list-style-type: none"> Security Profiles: This section of the exam measures the skills of a Threat Prevention Specialist and covers the configuration and management of comprehensive security profiling systems. It includes implementing SSL SSH inspection, combining web filtering and application control mechanisms, integrating intrusion prevention systems, and utilizing the Internet Service Database to create layered security protections for organizational networks.

Fortinet FCSS - Enterprise Firewall 7.6 Administrator Sample Questions (Q45-Q50):

NEW QUESTION # 45

Refer to the exhibit, which shows a corporate network and a new remote office network.

An administrator must integrate the new remote office network with the corporate enterprise network. What must the administrator do to allow routing between the two networks?

- A. The administrator must implement BGP to inject the new remote office network into the corporate FortiGate device
- B. The administrator must implement OSPF over IPsec on both FortiGate devices.**
- C. The administrator must configure virtual links on both FortiGate devices.
- D. The administrator must configure a static route to the subnet 192.168.1.0/24 on the corporate FortiGate device.

Answer: B

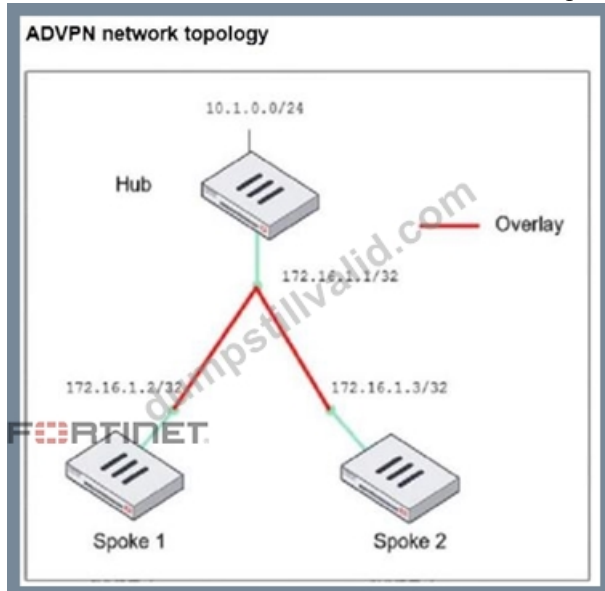

Explanation:

In this scenario, the corporate network and the new remote office network need to communicate over the Internet, which requires a secure and dynamic routing method. Since both networks are using OSPF (Open Shortest Path First) as the routing protocol, the best approach is to establish an OSPF over IPsec VPN to ensure secure and dynamic route propagation. OSPF is already running on the corporate network, and extending it over an IPsec tunnel allows dynamic route exchange between the corporate FortiGate and the remote office FortiGate. IPsec provides encryption for traffic over the Internet, ensuring secure

communication. OSPF over IPsec eliminates the need for manual static routes, allowing automatic route updates if networks change. The new remote office's 192.168.1.0/24 subnet will be advertised dynamically to the corporate network without additional configuration.

NEW QUESTION # 46

Refer to the exhibit, which shows the ADVPN network topology and partial BGP configuration.

Partial BGP configuration

```
Hub # config router bgp
set as 65100
set router-id 172.16.1.1
config neighbor-group
edit "advpn"
set remote-as 65100
end
config neighbor-range
edit 1
end
config network
..
end
```

Which two parameters must an administrator configure in the config neighbor range for spokes shown in the exhibit? (Choose two.)

- A. set max-neighbor-num 2
- B. set prefix 172.16.1.0 255.255.255.0
- C. set neighbor-group advpn
- D. set route-reflector-client enable

Answer: B,C

Explanation:

In the given ADVPN (Auto-Discovery VPN) topology, BGP is being used to dynamically establish routes between spokes. The neighbor-range configuration is crucial for simplifying BGP peer setup by automatically assigning neighbors based on their IP range.

set neighbor-group advpn
The neighbor-group parameter is used to apply pre-defined settings (such as AS number) to dynamically discovered BGP neighbors.
The advpn neighbor-group is already defined in the configuration, and assigning it to the neighbor-range ensures consistent BGP settings for all spoke neighbors.
set prefix 172.16.1.0 255.255.255.0
This command allows dynamic BGP peer discovery by defining a range of potential neighbor IPs (172.16.1.1 - 172.16.1.255).
Since each spoke has a unique /32 IP within this subnet, this ensures that any spoke within the 172.16.1.0/24 range can automatically establish a BGP session with the hub.

NEW QUESTION # 47

What action can be taken on a FortiGate to block traffic using IPS protocol decoders, focusing on network transmission patterns and application signatures?

- A. Configure a web filter profile in flow mode.
- **B. Use application control to limit non-URL-based software handling.**
- C. Enable application detection-based SD-WAN rules.
- D. Use the DNS filter to block application signatures and protocol decoders.

Answer: B

Explanation:

FortiGate's IPS protocol decoders analyze network transmission patterns and application signatures to identify and block malicious traffic. Application Control is the feature that allows FortiGate to detect, classify, and block applications based on their behavior and signatures, even when they do not rely on traditional URLs.

Application Control works alongside IPS protocol decoders to inspect packet payloads and enforce security policies based on recognized application behaviors.

It enables granular control over non-URL-based applications such as P2P traffic, VoIP, messaging apps, and other non-web-based protocols that IPS can identify through protocol decoders.

IPS and Application Control together can detect evasive or encrypted applications that might bypass traditional firewall rules.

NEW QUESTION # 48

An administrator must standardize the deployment of FortiGate devices across branches with consistent interface roles and policy packages using FortiManager.

What is the recommended best practice for interface assignment in this scenario?

- A. Create normalized interface types per-platform to automatically recognize device layer interfaces based on the FortiGate model and interface name.
- **B. Enable metadata variables to use dynamic configurations in the standard interfaces of FortiManager.**
- C. Create interfaces using device database scripts to use them on the same policy package of FortiGate devices.
- D. Use the Install On feature in the policy package to automatically assign different interfaces based on the branch.

Answer: B

Explanation:

When standardizing the deployment of FortiGate devices across branches using FortiManager, the best practice is to use metadata variables. This allows for dynamic interface configuration while maintaining a single, consistent policy package for all branches.

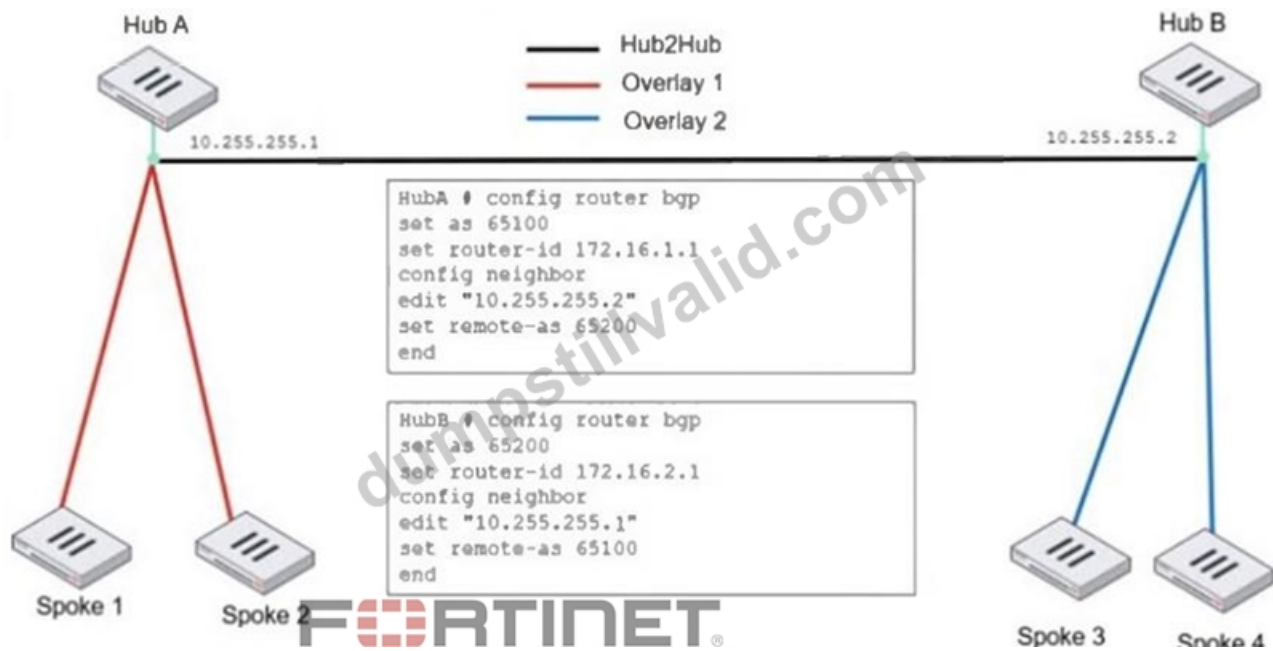

Metadata variables in FortiManager enable interface roles and configurations to be dynamically assigned based on the specific FortiGate device.

This ensures scalability and consistent security policy enforcement across all branches without manually adjusting interface settings for each device.

When a new branch FortiGate is deployed, metadata variables automatically map to the correct physical interfaces, reducing manual configuration errors.

NEW QUESTION # 49

Refer to the exhibit, which shows an ADVPN network

An administrator must configure an ADVPN using IBGP and EBGp to connect overlay network 1 with 2.
What two options must the administrator configure in BGP? (Choose two.)

- A. set ebgp-enforce-multihop enable
- B. set attribute-unchanged next-hop
- C. set next-hop-self enable
- D. set ibgp-enforce-multihop advpn

Answer: A,C

Explanation:

In this ADVPN (Auto-Discovery VPN) network, there are two hubs (Hub A and Hub B) connected via EBGp, while IBGP is used within each overlay. To ensure proper BGP routing between the overlays, the administrator must configure specific BGP options..

set ebgp-enforce-multihop enable

By default, EBGp requires directly connected neighbors. Since Hub A and Hub B are not directly connected but reach each other over an IPsec tunnel, multihop must be enabled for EBGp sessions to work.

set next-hop-self enable

In IBGP, the next-hop attribute does not change by default. When an IBGP route is advertised from a spoke to another hub or spoke, the next-hop needs to be updated to ensure proper reachability. Enabling next-hop-self forces the BGP speaker to advertise itself as the next-hop, ensuring that all spokes properly reach routes across the overlays.

NEW QUESTION # 50

.....

The industry experts hired by FCSS_EFW_AD-7.6 exam materials are those who have been engaged in the research of FCSS_EFW_AD-7.6 exam for many years. They have a keen sense of smell in the direction of the exam. Therefore, they can make accurate predictions on the exam questions. Therefore, our study materials specifically introduce a mock examination function. With FCSS_EFW_AD-7.6 exam materials, you can not only feel the real exam environment, but also experience the difficulty of the exam. You can test your true level through simulated exams. At the same time, after repeated practice of FCSS_EFW_AD-7.6 study braindumps, I believe that you will feel familiar with these questions during the exam and you will feel that taking the exam is as easy as doing exercises in peace. According to our statistics on the data so far, the passing rate of the students who have purchased one exam exceeds 99%, which is enough to see that FCSS_EFW_AD-7.6 test guide is a high-quality product that can help you to realize your dream.
