Latest IAPP CIPT Exam Dumps | CIPT Training Solutions

We promise that using CIPT certification training materials of Pass4Test, you will pass CIPT exam in your first try. If not or any problems in CIPT certification training materials, we will refund fully. What's more, after you purchase our CIPT Certification Training materials, Pass4Test will offer update service in one year.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q205-Q210):

NEW QUESTION # 205

SCENARIO

Please use the following to answer next question:

EnsureClaim is developing a mobile app platform for managing data used for assessing car accident insurance claims. Individuals use the app to take pictures at the crash site, eliminating the need for a built-in vehicle camera. EnsureClaim uses a third-party hosting provider to store data collected by the app. EnsureClaim customer service employees also receive and review app data before sharing with insurance claim adjusters.

The app collects the following information:

- First and last name
- Date of birth (DOB)
- Mailing address
- Email address

Car VIN number
Car model
License plate
Insurance card number
Photo
Vehicle diagnostics
Geolocation

What would be the best way to supervise the third-party systems the EnsureClaim App will share data with?

- **A. Conduct a security and privacy review before onboarding new vendors that collect personal data from the app.**
- B. Anonymize all personal data collected by the app before sharing any data with third-parties.
- C. Develop policies and procedures that outline how data is shared with third-party apps.
- D. Review the privacy notices for each third-party that the app will share personal data with to determine adequate privacy and data protection controls are in place.

Answer: A

Explanation:

Conducting a security and privacy review before onboarding new vendors can help EnsureClaim assess whether these vendors have appropriate measures in place to protect personal data. This can include reviewing their privacy policies and practices as well as their technical security controls.

NEW QUESTION # 206

SCENARIO

Please use the following to answer the next question:

Chuck, a compliance auditor for a consulting firm focusing on healthcare clients, was required to travel to the client's office to perform an onsite review of the client's operations. He rented a car from Finley Motors upon arrival at the airport as so he could commute to and from the client's office. The car rental agreement was electronically signed by Chuck and included his name, address, driver's license, make/model of the car, billing rate, and additional details describing the rental transaction. On the second night, Chuck was caught by a red light camera not stopping at an intersection on his way to dinner. Chuck returned the car back to the car rental agency at the end week without mentioning the infraction and Finley Motors emailed a copy of the final receipt to the address on file.

Local law enforcement later reviewed the red light camera footage. As Finley Motors is the registered owner of the car, a notice was sent to them indicating the infraction and fine incurred. This notice included the license plate number, occurrence date and time, a photograph of the driver, and a web portal link to a video clip of the violation for further review. Finley Motors, however, was not responsible for the violation as they were not driving the car at the time and transferred the incident to AMP Payment Resources for further review. AMP Payment Resources identified Chuck as the driver based on the rental agreement he signed when picking up the car and then contacted Chuck directly through a written letter regarding the infraction to collect the fine.

After reviewing the incident through the AMP Payment Resources' web portal, Chuck paid the fine using his personal credit card.

Two weeks later, Finley Motors sent Chuck an email promotion offering 10% off a future rental.

What should Finley Motors have done to incorporate the transparency principle of Privacy by Design (PbD)?

- A. Obtained verbal consent from Chuck and recorded it within internal systems.
- **B. Provided notice of data sharing practices within the electronically signed rental agreement.**
- C. Signed a data sharing agreement with AMP Payment Resources.
- D. Documented that Finley Motors has a legitimate interest to share Chuck's information.

Answer: B

NEW QUESTION # 207

An organization is considering launching enhancements to improve security and authentication mechanisms in their products. To better identify the user and reduce friction from the authentication process, they plan to track physical attributes of an individual. A privacy technologist assessing privacy implications would be most interested in which of the following?

- **A. The encryption of individual physical attributes.**
- B. The authentication mechanism proposed.
- C. The purpose of the data tracking.
- D. That the individual is aware tracking is occurring.

Answer: A

Explanation:

A privacy technologist would prioritize the encryption of individual physical attributes to ensure that the sensitive biometric data collected for authentication is protected against unauthorized access and breaches. The IAPP's guidelines on data security stress the importance of implementing robust encryption methods to safeguard personal data, especially when dealing with biometric information, which is highly sensitive and could lead to severe privacy violations if compromised.

NEW QUESTION # 208

All of the following topics should be included in a workplace surveillance policy EXCEPT?

- A. What areas can be placed under surveillance.
- **B. Who benefits from collecting surveillance data.**
- C. Who can access surveillance data.
- D. Who can be tracked and when.

Answer: B

Explanation:

A workplace surveillance policy should outline critical aspects such as who can be tracked and when, who can access the surveillance data, and what areas can be placed under surveillance. However, detailing who benefits from collecting the surveillance data is not typically included as it may not directly relate to privacy and security policies but rather to internal policy discussions.

Reference:IAPP CIPT Study Guide, "Surveillance and Monitoring," which describes the necessary elements of an effective surveillance policy.

NEW QUESTION # 209

SCENARIO

Kyle is a new security compliance manager who will be responsible for coordinating and executing controls to ensure compliance with the company's information security policy and industry standards. Kyle is also new to the company, where collaboration is a core value. On his first day of new-hire orientation, Kyle's schedule included participating in meetings and observing work in the IT and compliance departments.

Kyle spent the morning in the IT department, where the CIO welcomed him and explained that her department was responsible for IT governance. The CIO and Kyle engaged in a conversation about the importance of identifying meaningful IT governance metrics. Following their conversation, the CIO introduced Kyle to Ted and Barney. Ted is implementing a plan to encrypt data at the transportation level of the organization's wireless network. Kyle would need to get up to speed on the project and suggest ways to monitor effectiveness once the implementation was complete. Barney explained that his short-term goals are to establish rules governing where data can be placed and to minimize the use of offline data storage.

Kyle spent the afternoon with Jill, a compliance specialist, and learned that she was exploring an initiative for a compliance program to follow self-regulatory privacy principles. Thanks to a recent internship, Kyle had some experience in this area and knew where Jill could find some support. Jill also shared results of the company's privacy risk assessment, noting that the secondary use of personal information was considered a high risk.

By the end of the day, Kyle was very excited about his new job and his new company. In fact, he learned about an open position for someone with strong qualifications and experience with access privileges, project standards board approval processes, and application-level obligations, and couldn't wait to recommend his friend Ben who would be perfect for the job.

Which of the following should Kyle recommend to Jill as the best source of support for her initiative?

- A. Investors.
- B. Corporate researchers.
- C. Regulators.
- **D. Industry groups.**

Answer: D

Explanation:

Jill is leading an initiative to develop a new industry standard for data privacy and security. Kyle should recommend that Jill seek support from industry groups as they are likely to have a vested interest in the development of such a standard and may be able to provide valuable input and resources.
