

Pass Guaranteed 2026 Reliable Forcepoint DSPM-Deploy-and-Administer: Certified Forcepoint DSPM - Professional: Deploy and Administer Exam Practice Test Pdf

As the saying goes, to sensible men, every day is a day of reckoning. Time is very important to people. People often complain that they are wasting their time on study and work. They do not have time to look at the outside world. Now, DSPM-Deploy-and-Administer exam guide gives you this opportunity. DSPM-Deploy-and-Administer test prep helps you save time by improving your learning efficiency. At the same time, DSPM-Deploy-and-Administer Test Prep helps you to master the knowledge in the course of the practice. And at the same time, there are many incomprehensible knowledge points and boring descriptions in the book, so that many people feel a headache and sleepy when reading books. But with DSPM-Deploy-and-Administer learning question, you will no longer have these troubles.

You may feel astonished and doubtful about this figure; but we do make our DSPM-Deploy-and-Administer exam dumps well received by most customers. Better still, the 98-99% pass rate of DSPM-Deploy-and-Administer exam questions has helped most of the candidates get the certification successfully, which is far beyond that of others in this field. In recent years, supported by our professional expert team, our DSPM-Deploy-and-Administer Test Braindumps have grown up and have made huge progress. You can totally rely on our DSPM-Deploy-and-Administer learning material for your future learning path.

Guaranteed DSPM-Deploy-and-Administer Questions Answers | DSPM-Deploy-and-Administer Reliable Study Guide

Getting an authoritative IT certification will make a great difference to your career like DSPM-Deploy-and-Administer exam tests. The difficulty and profession of real questions need much time and energy to prepare, which can be solved by our DSPM-Deploy-and-Administer dumps torrent. The latest training materials are tested by IT experts and certified trainers who studied DSPM-Deploy-and-Administer Exam Questions for many years. The high quality of our vce braindumps are the guarantee of high passing score.

Forcepoint Certified Forcepoint DSPM - Professional: Deploy and Administer Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which of the following are actions that can be performed from the Enterprise Search page? Select three.

- A. Exporting reports.
- B. Manually verifying ML classification.
- C. Manually changing the assigned risk.
- D. Moving risky files to a private folder.
- E. Revoking user permissions.

Answer: A,B,E

Explanation:

The correct selections are Revoking user permissions , Exporting reports , and Manually verifying ML classification . The Enterprise Search page is the primary file-level investigation view in Forcepoint DSPM.

It lists scanned and cataloged files, allows filtering through standard filters or GQL, and provides operational actions against the returned results. Forcepoint states that Enterprise Search allows users to filter file data, save frequently used filters, customize columns, and generate meaningful reports. It also provides an EXPORT button that creates a CSV or JSON download of the filtered data.

Revoking permissions is also supported as a data-governance action. Forcepoint documents that administrators can view or modify file permissions and access rights from the file Actions menu, and supporting documentation identifies required permissions for revoke operations in Microsoft repositories.

Manual classification validation is explicitly available from the Enterprise Search hamburger menu.

Forcepoint states that to adjust a file's machine-learning classification, the user selects Manually verify classification , modifies the ML-suggested classification, and saves the change.

The incorrect choices are outside this specific Enterprise Search action set. Moving risky files to a private folder is not the standard named Enterprise Search action in this workflow, and assigned risk is not manually changed from the page. References/topics: Enterprise Search, Exporting Data, Permissions & Access Rights, Manual ML Classification Verification .

NEW QUESTION # 19

Which of the following is NOT a widget type available in Forcepoint DSPM dashboards?

- A. Text
- B. Heatmap
- C. Counter
- D. Chart

Answer: B

Explanation:

The correct answer is B. Heatmap . Forcepoint DSPM dashboards are built from configurable widgets that present scan, access, classification, and risk data in different visual formats. The official Forcepoint DSPM widget list includes Counter , Chart , Map , Text , Table , Incidents , Dual Data Grouping , and Multi Counter . Heatmap is not listed as an available dashboard widget type. The other answer choices are valid widget types. Counter widgets provide quick numerical summaries, such as counts of sensitive files, risky users, or matching records from selected datasets. Forcepoint describes Counter widgets as useful for at-a-glance metrics and supports aggregation functions such as count, sum, average, min, max, and median. Chart widgets visualize grouped data using supported chart formats, including horizontal bar, vertical bar, line, area, or pie charts. Text widgets are also part of the documented widget list and are used for static explanatory or contextual information on a board.

Therefore, Heatmap is the non-valid option. References/topics: Analytics, Dashboards, Widgets, Counter, Chart, Text, Dashboard Components .

NEW QUESTION # 20

Geoff is configuring the Data Asset Inventory. Which Security Posture Policy Control options are available for him to use? Select three.

- A. GQL query
- B. Select
- C. Text
- D. Yes/No
- E. Checkbox

Answer: B,C,D

Explanation:

The correct options are Yes/No, Select, and Text . In Forcepoint DSPM, Security Posture Policy Controls are configured under Policy Center > Compliance Hub > Data Mapping . These controls define the metadata fields that appear in the Data Asset Inventory , allowing data owners to describe and govern critical data assets using consistent business and compliance attributes. Forcepoint describes Data Mapping as the framework used to define fields available in the Data Asset Inventory so data owners can assign metadata tags to critical data. Examples include retention period, business owner, regulatory scope, review status, and project name.

The documented control types are Text , Yes/No , and Select . Text creates a free-form text field, useful for values such as project name or business context. Yes/No creates a binary drop-down, appropriate for simple governance questions such as whether a

review is required. Select creates a predefined selection menu aligned with common data governance frameworks. GQL query is not a Data Mapping control type; GQL is used elsewhere for search and Controls Orchestration rule conditions. Checkbox is also not listed as a supported Security Posture Policy Control option. References/topics: Compliance Hub, Data Mapping, Security Posture Policy Controls, Data Asset Inventory, Metadata Governance .

NEW QUESTION # 21

When creating a Detector, which field allows you to exclude specific criteria from the search?

- A. Not Add
- B. Exclude
- C. Except
- **D. Not contain**

Answer: D

Explanation:

The correct answer is A. Not contain . In Forcepoint DSPM, detector creation uses inclusion and exclusion logic to control what should trigger a detector match. The Contain field defines the positive match criteria: the keywords, phrases, regular expressions, extensions, or path terms that the detector should search for. The Not Contain field provides the negative condition: terms or criteria that should be ignored even when the broader detector logic would otherwise match.

Forcepoint's DSPM documentation for Content Detectors states that if there are terms the detector should ignore, they are set in the Not Contain field. The same concept appears in Path Detectors , where administrators define the search method, populate Contain with triggering terms, and then use Not Contain to exclude terms from matching.

This matters operationally because detectors can otherwise generate excessive or misleading matches. For example, a detector looking for payroll-related content may include "salary" or "compensation" in Contain , while excluding harmless template, archive, or test terms in Not Contain . Not Add , Except , and Exclude are not the documented detector-configuration field names.

References/topics: Administration > Detectors, Content Detectors, Path Detectors, Contain/Not Contain logic, AI Mesh detector contribution .

NEW QUESTION # 22

What is the first step in configuring the Data Register in Forcepoint DSPM?

- A. Reviewing policies in the Data Asset Inventory.
- B. Configuring Data Mapping.
- C. Enabling Pattern Matching.
- **D. Creating Security Posture Policies.**

Answer: D

Explanation:

The first step in configuring the Data Register is Creating Security Posture Policies . In Forcepoint DSPM, the Data Register is the governance workspace where an organization defines and manages its most important data assets, commonly described as "crown jewels." Forcepoint's Data Register structure lists three main areas in order: Security Posture Policies , Data Asset Inventory , and Review Status , making Security Posture Policies the starting point for register configuration.

A Security Posture Policy creates the formal representation of a governed data asset. The documented workflow is to navigate to Policy Center > Data Register > Security Posture Policies , click Add new Security Posture Policy , and define required details such as Asset Name , Department , Data Owner , and Data Mapping using a GQL query.

The other choices are not the first Data Register configuration step. Pattern Matching belongs to detection and classification logic, not Data Register setup. Data Mapping is important, but it is configured under Compliance Hub as the framework for Data Asset Inventory metadata fields. Reviewing policies in the Data Asset Inventory occurs after policies and asset definitions exist.

References/topics: Policy Center, Data Register, Security Posture Policies, Data Asset Inventory, Data Mapping, Data Ownership .

NEW QUESTION # 23

.....

Our DSPM-Deploy-and-Administer study materials include 3 versions and they are the PDF version, PC version, APP online

version. You can understand each version's merits and using method in detail before you decide to buy our DSPM-Deploy-and-Administer learning guide. And the content of the three different versions is the same, but the displays are totally different according to the study interest and hobbies. And it is quite enjoyable to learn with our DSPM-Deploy-and-Administer Exam Questions.

Guaranteed DSPM-Deploy-and-Administer Questions Answers: <https://www.trainingquiz.com/DSPM-Deploy-and-Administer-practice-quiz.html>

Forcepoint DSPM-Deploy-and-Administer Practice Test Pdf It is worth noticing that some people who do not use professional anti-virus software will mistakenly report the virus, Our DSPM-Deploy-and-Administer study materials have gone through strict analysis and verification by senior experts and are ready to supplement new resources at any time, Therefore, DSPM-Deploy-and-Administer Question bank is a handy tool that helps you prepare more objectively.

As a matter of basic portfolio management, every investor needs a secondary DSPM-Deploy-and-Administer Reliable Test Experience list of stocks that would be used to replace sold stocks from the current portfolio, During evening visitation, a visitor brings a basket of fruit.

Desktop-Based Forcepoint DSPM-Deploy-and-Administer Practice Test Software

It is worth noticing that some people who do not use professional anti-virus software will mistakenly report the virus, Our DSPM-Deploy-and-Administer Study Materials have gone through strict analysis DSPM-Deploy-and-Administer and verification by senior experts and are ready to supplement new resources at any time.

Therefore, DSPM-Deploy-and-Administer Question bank is a handy tool that helps you prepare more objectively, Being an exam candidate in this area, we believe after passing the exam by the help of our DSPM-Deploy-and-Administer practice materials, you will only learn a lot from this DSPM-Deploy-and-Administer exam but can handle many problems emerging in a long run.

This way, the test taker can use DSPM-Deploy-and-Administer Reliable Study Guide his or her best score on his or her college application.
