- C. Hostname www.example.com will redirect to www.example.com/us
- D. Hostname www.example.de will redirect to www.example.com/de.

Answer: C

Explanation:

In the provided configuration, the incorrect statement is B. While it appears that the hostname www.example.

com should redirect to www.example.com/us based on the "if-site-path": "us" entry, this assumes that the default path or redirect isn't overridden by other configurations within the hostname alias file not visible in the snapshot provided. Typically, in Salesforce B2C Commerce, such a direct statement about redirection should align with explicit mapping rules that include hostname and path directives, which are not detailed for www.
