Free Web-Development-Applications Study Material | Latest Web-Development-Applications Test Answers

What's more, part of that ExamPrepAway Web-Development-Applications dumps now are free: https://drive.google.com/open?id=1T6JbQlv2bIPbebeGGW6iZCcTvnYmAMaG

We have dedicated staff to update all the content of Web-Development-Applications exam questions every day. So you don't need to worry about that you buy the materials so early that you can't learn the last updated content. And even if you failed to pass the exam for the first time, as long as you decide to continue to use WGU Web Development Applications torrent prep, we will also provide you with the benefits of free updates within one year and a half discount more than one year. Web-Development-Applications Test Guide use a very easy-to-understand language.

WGU Web-Development-Applications Exam Syllabus Topics:

Topic	Details
Topic 1	• Responsive Web Design (RWD) for Browsers and Apps: This section of the exam measures skills of Front-End Designers and covers concepts related to mobile-first layout planning, responsive frameworks, and techniques used to ensure compatibility with modern browsers and applications. Candidates must demonstrate how to adjust elements for better usability on mobile devices and apply responsive strategies that allow a single design to function seamlessly across various environments.

Topic 2	• HTML5, CSS3, and JavaScript Foundations: This section of the exam measures skills of Web Developers and covers the essential ability to manually code using HTML5, CSS3, and JavaScript to create structured, visually styled, and interactive web content. It focuses on building accurate page layouts, applying modern styling rules, and writing basic scripts that support user interaction. The aim is to ensure candidates can construct professional web documents using current standards and properly integrate all three technologies.
Topic 3	• Validation, Testing, and Form Development: This section of the exam measures skills of Web Developers and covers the ability to validate code, test web pages for accuracy, and build form components. It includes understanding how to detect errors, ensure compliance with standards, and implement form fields with inline validation to improve user experience. The focus is on creating forms that work reliably, meet usability expectations, and maintain proper data entry flow.
Topic 4	• Creating Adaptive Web Documents and Pages: This section of the exam measures skills of Front-End Designers and covers the techniques needed to make websites display correctly across traditional desktops and mobile devices. It emphasizes adaptive page layout, flexible formatting, and user-friendly presentation so that content remains readable and functional on screens of different sizes. Candidates are expected to show an understanding of how to create consistent designs that respond smoothly to device changes.

100% Pass Web-Development-Applications - WGU Web Development Applications Updated Free Study Material

The Web-Development-Applications web-based practice exam requires no installation so you can start your preparation instantly right after you purchase. With thousands of satisfied customers around the globe, questions of the WGU Web Development Applications (Web-Development-Applications) exam dumps are real so you can pass the WGU Web Development Applications (Web-Development-Applications) certification on the very first attempt. Hence, it reduces your chances of failure and you can save money and time as well. WGU exam questions come in three formats i.e., web-based practice test, desktop practice test software, and PDF dumps.

WGU Web Development Applications Sample Questions (Q72-Q77):

NEW QUESTION # 72
What is an advantage that a mobile has over a mobile app?

- A. It has full control of the user interface
- B. It is automatically available to all users
- C. It is fully functional offline.
- D. It is automatically awe to access all device capabilities

Answer: B

Explanation:
A mobile website has the advantage of being automatically available to all users without the need for installation. Users can access it through their web browsers on any device with internet connectivity.
* Accessibility: Mobile websites can be accessed by simply entering a URL in a web browser. There is no need to visit an app store and install an application.
* Cross-Platform Compatibility: Mobile websites are designed to work across various devices and platforms, ensuring a broader reach.
* Automatic Updates: Updates to mobile websites are immediately available to users without requiring them to download and install new versions.

NEW QUESTION # 73
Given the following JavaScript code:
What happens when this code is executed?

- A. The object with the demo is changed to 6.
- B. The object with the id innerHTML is changed to x.
- C. The object with the id demo is changed to x.
- D. The object with the id innerHTML is changed to 6.

Answer: A

Explanation:
The provided JavaScript code sets a variablexto 6 and then assigns this value to theinnerHTMLof the HTML element with the iddemo.
var x;
x = 6;
document.getElementById("demo").innerHTML = x;
Explanation:
* Variable Declaration:var x;declares the variablex.
* Variable Assignment:x = 6;assigns the value 6 to the variablex.
* DOM Manipulation:document.getElementById("demo").innerHTML = x;finds the element with iddemoand sets itsinnerHTMLto the value ofx, which is 6.
Outcome:
* The content of the HTML element with the iddemowill be changed to6.

NEW QUESTION # 74
What represents the value of the pattern attribute of an input element in an HTML

- A. A JavaScript function
- B. A regular expression
- C. A style sheet
- D. A SQL statement

Answer: B

Explanation:
The value of thepatternattribute in an input element is a regular expression. This regular expression is used to define what constitutes a valid value for the input.
* Regular Expressions: Regular expressions (regex) are sequences of characters that define search patterns. They are commonly used for string matching and validation.
* Usage Example:
<input type="text" pattern="\d{5}" placeholder="Enter a 5-digit number"> Here, thepatternattribute value is a regular expression that validates a five-digit number.

NEW QUESTION # 75
Which HTML elements support the `<script>` tag to invoke JavaScript code?
Choose 2 answers:

- A. meta
- B. title
- C. form

- D. body
- E. head

Answer: D,E

Explanation:
> "The `<script>` element is permitted within the `<head>` and `<body>` sections of an HTML document.
These are the two valid locations for including or referencing JavaScript code."
>
> "It is not valid to place `<script>` inside `<form>`, `<meta>`, or `<title>` elements, as those are not meant for scripting."
References:
* HTML5 Specification: The `<script>` element
* W3C: HTML content categories

NEW QUESTION # 76
What should a developer correct before revalidating after a code validator reports multiple errors in code?

- A. Only JavaScript errors
- B. The first reported error
- C. The last reported error
- D. Only CSS errors

Answer: B

Explanation:
When using a code validator to check your HTML, CSS, or JavaScript code, it's essential to address errors in a systematic manner. The correct approach is to correct the first reported error before revalidating. This method is recommended because often, the first error can cause a cascade of subsequent errors or warnings.
By fixing the first error, you may automatically resolve other errors that were reported later.
* Reasoning:
* Cascading Errors: The first error in the code might lead to multiple subsequent errors. Fixing it can sometimes resolve those cascading errors, reducing the overall number of errors in the next validation.
* Logical Flow: Addressing errors in the order they appear maintains a logical flow and makes debugging more manageable.
* Steps to Follow:
* Step 1: Run the code through the validator.
* Step 2: Identify the first reported error.
* Step 3: Correct the first error.
* Step 4: Revalidate the code to check if the error count has reduced or if new errors appear.
* Step 5: Repeat the process until all errors are resolved.
