

# Exam 300-620 Testking & 300-620 Valid Test Syllabus

Exam Cisco 300-620 Learning - Latest 300-620 Exam Papers

Free & New 300-620 dumps are available on Google Drive shared by ExamTurnout: <https://drive.google.com/open?id=1QDzAESuSj7wEwzZFuOz1h1Ja-0I8Ecxl>

People always tend to expect the great power of accumulation, thus the 300-620 study materials are not only useful, but also learning materials that also help provide services & good kind of preventing danger. We have full confidence to ensure that you will have an enjoyable study experience with our 300-620 Study Materials, which are designed to answer your interest and help you pass the exam more easily. You will have a better understanding after reading the following advantages:

**Cisco 300-620 Exam Topics:**

Section	Weight	Objectives
ACI Management	25%	1. Implement use of based web on based 2. Update system and setup services 3. Implement configuration backup (manage existing support reports) 4. Implement user and RBAC 5. Configure an interface
Integration	15%	1. Implement VMware vCenter vSphere integration 2. Configure vSphere monitoring on VMs 3. Implement service patch (managed on a vSphere)
ACI Packet Forwarding	15%	1. Configure endpoint learning 2. Implement bridge domain configuration *** (related routing, Layer 2 resources hardware entry, ADP, Source IP)

## Pass Guaranteed 2026 Cisco 300-620 –High Pass-Rate Exam Testking

Our 300-620 practice dumps compiled by the most professional experts can offer you with high quality and accuracy practice materials for your success. Up to now, we have more than tens of thousands of customers around the world supporting our 300-620 Exam Questions. If you are unfamiliar with our 300-620 study materials, please download the free demos for your reference, and to some unlearned exam candidates, you can master necessities by our 300-620 training guide quickly.

The Cisco 300-620 DCACI exam is also called Implementing Cisco Application Centric Infrastructure. It is associated with the CCNP Data Center certification and tests a candidate's understanding of Cisco switches in relation to the ACI mode, which includes the processes like integration, management, and others.

Cisco 300-620 certification exam covers a wide range of topics, including ACI architecture, policies and automation, fabric discovery and initialization, application network profiles, endpoint groups, service graphs, and contract enforcement. 300-620 Exam also assesses the candidates' understanding of advanced ACI features such as virtual port channels (vPC), Layer 3 outside connectivity, and Multi-Pod architecture. Passing 300-620 exam demonstrates that the candidate has the skills and knowledge required to design and implement ACI solutions that meet the needs of modern data centers.

## Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q266-Q271):

### NEW QUESTION # 266

The engineer notices frequent MAC and IP address moves between different leaf switch ports. Which action prevents this problem from occurring?

- A. Enable rogue endpoint control.
- B. Disable IP bridge domain enforcement.
- C. Disable enforce subnet check.
- D. Enable endpoint loop protection.

**Answer: A**

Explanation:

To prevent frequent MAC and IP address moves between different leaf switch ports, enabling rogue endpoint control is the recommended action. This feature helps in identifying and mitigating the movement of endpoints that could potentially cause loops or other issues within the network.

### NEW QUESTION # 267

A Cisco ACI leaf switch learns the source IP address of a packet that enters the front panel port of the switch. Which bridge domain setting is used?

- A. L2 Unknown Unicast - Hardware proxy
- B. L3 Unknown Multicast Flooding - Flood
- C. Unicast Routing
- D. ARP Flooding

**Answer: C**

### NEW QUESTION # 268

An engineer must allow multiple external networks to communicate with internal ACI subnets. Which action should the engineer take to assign the prefix to the class ID of the external Endpoint Group?

- A. Enable the Export Route Control Subnet for the External Endpoint Group flag.
- B. Configure subnets with the Import Route Control Subnet flag enabled.
- C. Enable an L3out with Shared Route Control Subnet.
- D. Configure subnets with the External Subnets for External EPG flag enabled.

**Answer: D**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/ACI\\_Best\\_Practices/b\\_ACI\\_Best\\_Practices/b\\_ACI\\_Best\\_Practices\\_chapter\\_01001.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/ACI_Best_Practices/b_ACI_Best_Practices/b_ACI_Best_Practices_chapter_01001.html)

□

### NEW QUESTION # 269

Refer to the exhibit.

□

An engineer must implement the inter-tenant service graph. Which set of actions must be taken to accomplish this goal?

- A. \* Define the contract in the provider tenant and export it to the consumer tenant.  
\* Define the L4-L7 device and service graph template in the provider tenant and the ASA bridge domains in the consumer tenant.
- B. \* Define the contract in the provider tenant and export it to the consumer tenant.  
\* Define the L4-L7 device, service graph template, and ASA bridge domains in the provider tenant.
- C. \* Define the contract in the provider tenant and export it to the provider tenant.  
\* Define the L4-L7 device, service graph template, and ASA bridge domains in the consumer tenant.
- D. \* Define the contract in the provider tenant and export it to the provider tenant.  
\* Define the L4-L7 device and service graph template in the provider tenant and the ASA bridge domains in the consumer tenant.

**Answer: A**

Explanation:

To implement the inter-tenant service graph, the set of actions that must be taken are:

Define the contract in the provider tenant and export it to the consumer tenant (Option B).

Define the L4-L7 device and service graph template in the provider tenant and the ASA bridge domains in the consumer tenant (Option B).

This approach allows for the proper configuration and association of the service graph between the provider and consumer tenants, ensuring that the services are correctly applied to the traffic flowing between them.

#### NEW QUESTION # 270

Refer to the exhibit. A customer must back up the current Cisco ACL configuration securely to the remote location using encryption and authentication. The backup job must run once per day. The customer's security policy mandates that any sensitive information including passwords, must not be exported from the device. Which set of steps meets these requirements?

- A. Export destination using SCP protocol.  
Use XML format.
- B. Export destination using FTP protocol.  
Disable Global AES Encryption.
- C. Export destination using SCP protocol.  
Disable Global AES Encryption.
- D. Export destination using FTP protocol.  
Use XML format.

**Answer: C**

#### NEW QUESTION # 271

.....

If your time is so tight, and have little time to prepare for your exam, then 300-620 training materials will be your best choice. Our 300-620 exam dumps are high-quality, you just need to spend 48 to 72 hours on practicing, and you can pass the exam in your first time. If you do fail the exam, we will give you refund, therefore you don't need to worry about that you will waste your money. In addition, we offer you free demo to have a try before buying 300-620 Exam Materials, so that you can know what the complete version is like. We have online and offline chat service for 300-620 exam materials, if you have any questions, you can contact us.
