Network Video Exam (ANVE) exam dumps to prepare off-screen and on the go.

Axis Network Video Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

If an installer wants to configure 20 cameras to show the same synchronized date and time in Live View, how can this be achieved?

- A. Synchronize the date and time with a remote NTP server
- B. Adapt the date and time from a client computer when using the camera configuration tool
- C. Synchronize the date and time with a remote FTP server by downloading files from the server
- D. Fetch the date and time from the installed root certificate

Answer: A

Explanation:

To ensure that 20 cameras show the same synchronized date and time in Live View, the best method is to synchronize the date and time with a remote NTP (Network Time Protocol) server. NTP servers are designed to synchronize clocks of network devices, ensuring accurate and consistent timekeeping across all connected devices. This method is reliable and commonly used in networked environments to maintain time synchronization across multiple devices.

NEW QUESTION # 57

Why is it recommended to make a list of the Axis network video product serial numbers in an installation?

- A. It provides an overview of what equipment has been used
- B. It gives the status of the camera or encoder
- C. It make it is easier to identify the camera in AXIS Camera Management
- D. The product name can be found inside the serial number

Answer: C

Explanation:

Making a list of the Axis network video product serial numbers in an installation is recommended because it makes it easier to identify the camera in AXIS Camera Management. The serial number is a unique identifier that allows administrators to quickly locate, configure, and manage specific devices within the management software, streamlining maintenance and troubleshooting processes.

NEW QUESTION # 58

With Axis Coverage Shapes, the designer can

- A. Determine at what distance a person can be identified.
- B. Create a 3D view of the scene the camera will capture.
- C. View how varying lighting conditions affect the image.
- D. See the effect of furniture or other objects blocking field of view.

Answer: A

Explanation:

Axis Coverage Shapes is a tool within Axis' design software that helps determine the optimal placement and specifications of cameras to ensure that identification and surveillance goals are met. It allows the designer to visualize the camera's coverage area and assess the distance at which a person can be identified, ensuring that the camera's placement and specifications align with the security requirements. For more detailed information, refer to Axis Communications' resources on Axis Coverage Shapes.

NEW QUESTION # 59

Which product can typically provide the geographical position of an individual or a vehicle?

- A. A thermal camera
- B. A radar

- C. A modular camera
- D. A positioning camera

Answer: B

Explanation:

"Radar devices provide detection and tracking capabilities, including real-time geographical position and speed of people and vehicles within their coverage area."

- Axis Radar Technology Overview

"Axis security radars accurately detect, classify, and track moving people and vehicles, providing precise GPS coordinates."

- Axis Communications Academy, Network Video Fundamentals, 2022

NEW QUESTION # 60

What is the purpose of an IR-corrected lens?

- A. It compensates for the color distortions caused by the IR light at daytime
- **B. It ensures focus is kept when the camera switches from day to night mode**
- C. It is designed to gather more IR light than white light, for low light performance
- D. It blocks IR light during daytime, and white light during night time

Answer: B

Explanation:

"An IR-corrected lens is designed to keep the image in focus for both visible and infrared light, ensuring the camera stays in focus when switching from day (color) mode to night (IR) mode."

- Axis Communications Academy, Network Video Fundamentals, 2022

"IR-corrected lenses prevent focus shift when the camera switches between visible and infrared illumination."
