What's more, part of that TestSimulate AZ-800 dumps now are free: [https://drive.google.com/open?id=1MUjKshmsEjaMoEv\\_wWGkdFr28KhWkFO6](https://drive.google.com/open?id=1MUjKshmsEjaMoEv_wWGkdFr28KhWkFO6)

For your information, the passing rate of our AZ-800 study questions is over 98% up to now. Up to now our AZ-800 practice materials consist of three versions, all those three basic types are favorites for supporters according to their preference and inclinations. On your way moving towards success, our AZ-800 Preparation materials will always serves great support. And you can contact us at any time since we are serving online 24/7.

## Exam Content

The next point for you to know is the exam content. The AZ-800 test consists of five topics in which you should be proficient. The first topic is the most extensive one and is dedicated to deploying and managing AD DS in on-premises and cloud environments. In this domain, you should have a good understanding of how to deploy and operate AD DS domain controllers, work in multi-domain, multi-forest, and multi-site environments, apply hybrid identities. In addition, your skills to create and operate AD DS security principals, manage Windows Server will be assessed as well.

The second topic refers to managing Windows Server and workloads in a hybrid environment. This implies that you are competent in dealing with Windows Server in a hybrid environment and Azure services to operate Windows Servers and workloads. Thus, you can demonstrate your skills to configure CredSSP, PowerShell Remoting, JEA, operate updates for Windows machines, manage Windows Servers, integrate Windows Servers with Azure Security Center or Log Analytics.

The third domain focuses on managing virtual machines and containers. The aim of this domain is to measure your abilities in working with VM memory, VM Resource Groups, VM CPU Groups, VM Checkpoints, Integration Services, NIC teaming and Hyper-V

switch. This subject area also includes the ability to create and operate containers, and operate Azure Virtual Machines based on Windows Server.

The fourth domain aims to check your skills in applying and operating an on-premises and hybrid networking infrastructure. In this domain you are expected competency in utilizing on-premises and hybrid name resolution, operating IP addressing in hybrid and on-premises scenarios, applying on-premises and hybrid network connectivity. Thus, you should possess top-notch skills to apply DNSSEC, integrate DNS with AD DS, configure DNS forwarding, operate IPAM, create IP reservations, apply Azure Network Adapter, Web App Proxy, Azure Replay.

The fifth topic refers to managing storage and file services. This part evaluates your skills in operating Azure File Sync, operating Windows Server files shares, and Windows Server storage. To deal with the questions from this domain, you need to be able to create Azure File Sync service, monitor File Sync, create cloud endpoints, BranchCache, apply DFS, configure volumes, disks, and Data Deduplication.

Administering Windows Server Hybrid Core Infrastructure certification demonstrates a thorough understanding of the concepts and technologies related to Windows Server Hybrid Core Infrastructure and highlights an individual's ability to manage complex hybrid environments.

## **Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q229-Q234):**

### **NEW QUESTION # 229**

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains the VPN servers shown in the following table.

You have a server named NPS1 that has Network Policy Server (NPS) installed. NPS1 has the following RADIUS clients:

VPN1, VPN2, and VPN3 use NPS1 for RADIUS authentication. All the users in contoso.com are allowed to establish VPN connections. For each of the following statements, select Yes If the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### **NEW QUESTION # 230**

You have an on-premises server named Server1 that runs Windows Server.

You have an Azure subscription that contains a virtual network named VNet1.

You need to connect Server1 to VNet1 by using Azure Network Adapter.

What should you use?

- A. the Azure portal
- **B. Windows Admin Center**
- C. Device Manager
- D. Azure AD Connect

**Answer: B**

### NEW QUESTION # 231

You have an Azure subscription. The subscription contains a virtual machine named VM1 that runs Windows Server. VM1 contains a 128-GB operating system disk.

You need to increase the size of volume C on VM1 to 250 GB.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 232

Your network contains an Active Directory Domain Services (AD DS) forest named contoso.com. The forest contains a child domain named east.contoso.com.

in the contoso.com domain, you create two users named Admin1 and Admin2.

You need to ensure that the users can perform the following tasks:

\* Admin1 can create and manage Active Directory sites.

\* Admin2 can deploy domain controller to the east.contoso.com domain.

The solution must use the principle of least privilege.

To which group should you add each user? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 233

You have a server named Server1 that runs Windows Server and has the Hyper-V server role installed.

You need to limit which Hyper-V module cmdlets helpdesk users can use when administering Server 1 remotely.

You configure Just Enough Administration (JEA) and successfully build the role capabilities and session configuration files.

How should you complete the PowerShell command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:
