In addition, we offer you free demo for Plat-Arch-201 Exam Dumps for you to have a try, so that you can know what the complete version is like. We have online and offline service for Plat-Arch-201 exam dumps, and if you are bothered by any questions, you can have a conversation with us, and we will give you the professional advice.

Salesforce Certified Platform Data Architect Sample Questions (Q121-Q126):

NEW QUESTION # 121

Which relationship enforces cascade delete?

- A. Lookup

- B. External lookup
- C. Indirect lookup
- **D. Master-detail**

Answer: D

Explanation:

In master-detail, deleting the parent deletes all child records.

NEW QUESTION # 122

Northern Trail Outfitters has these simple requirements for a data export process:

- File format should be in CSV.
- Process should be scheduled and run once per week.
- The export should be configurable through the Salesforce UI.

Which tool should a data architect leverage to accomplish these requirements?

- A. Data loader
- B. Bulk API
- **C. Data export wizard**
- D. Third-party ETL tool

Answer: C

Explanation:

The correct answer is B, data export wizard. The data export wizard is a tool that allows you to export your data in CSV format, schedule the export process to run once per week, and configure the export settings through the Salesforce UI. The data export wizard can handle up to 51 million records per export. The bulk API, third-party ETL tools, and data loader are also tools that can export data, but they are not as simple or user-friendly as the data export wizard.

NEW QUESTION # 123

UC has migrated its Back-office data into an on-premise database with REST API access. UC recently implemented Sales cloud for its sales organization. But users are complaining about a lack of order data inside SF. UC is concerned about SF storage limits but would still like Sales cloud to have access to the data. Which design patterns should a data architect select to satisfy the requirement?

- A. Develop a bidirectional integration between the on-premise system and Salesforce.
- B. Build a UI for the on-premise system and iframe it in Salesforce
- **C. Use SF Connect to virtualize the data in SF and avoid storage limits.**
- D. Migrate and persist the data in SF to take advantage of native functionality.

Answer: C

Explanation:

The best design pattern to satisfy the requirement of accessing order data from an on-premise database with REST API access without consuming SF storage limits is to use SF Connect to virtualize the data in SF and avoid storage limits. SF Connect is an integration tool that allows users to access and integrate data from external sources using external objects. External objects are similar to custom objects, except that the data resides in another system and is accessed in real time via web service callouts. SF Connect supports various adapters to connect to different types of external data sources, such as OData, cross-org, or Apex custom adapter. Migrate and persist the data in SF to take advantage of native functionality is not a good option because it would consume SF storage limits and require data synchronization between systems. Develop a bidirectional integration between the on-premise system and Salesforce is not a good option because it would be complex and costly to implement and maintain, and it would also consume SF storage limits. Build a UI for the on-premise system and iframe it in Salesforce is not a good option because it would not provide a seamless user experience and it would not allow users to search, report, or perform actions on the external data.

NEW QUESTION # 124

A health care provider wishes to use salesforce to track patient care. The following actions are in Salesforce

1. Payment Providers: Orgas who pay for the care
- 2 patients.

2. Doctors: They provide care plan for patients and need to support multiple patients, they are provided access to patient information.
 3. Patients: They are individuals who need care.
- A data architect needs to map the actor to Sf objects. What should be the optimal selection by the data architect?

- A. Patients as Accounts, Payment providers as Accounts, & Doctors as Person Accounts
- B. Patients as Contacts, Payment providers as Accounts, & Doctors as Accounts
- C. Patients as Person Accounts, Payment providers as Accounts, & Doctors as Contacts
- **D. Patients as Person Accounts, Payment providers as Accounts, & Doctors as Person Account**

Answer: D

Explanation:

Patients as Person Accounts, Payment providers as Accounts, & Doctors as Person Accounts is the optimal selection by the data architect to map the actor to Salesforce objects. This is because Person Accounts are a special type of accounts that can store both business and personal information for individual customers. Payment providers are organizations that pay for the care of patients, so they can be modeled as Accounts. Doctors are also individuals who provide care plans for patients and need access to patient information, so they can also be modeled as Person Accounts.

NEW QUESTION # 125

Universal Containers (UC) is in the process of selling half of its company. As part of this split, UC's main Salesforce org will be divided into two org:org A and org B, UC has delivered these requirements to its data architect

1. The data model for Org B will drastically change with different objects, fields, and picklist values.
2. Three million records will need to be migrated from org A to org B for compliance reasons.
3. The migrate will need occur within the next two month, prior to be split.

Which migrate strategy should a data architect use to successfully migrate the data?

- A. Write a script to use the Bulk API
- B. Use Data Loader for export and Data Import Wizard for import
- **C. use as ETL tool to orchestrate the migration.**
- D. Use the Salesforces CLI to query, export, and import

Answer: C

Explanation:

Using an ETL tool to orchestrate the migration is the best strategy for this scenario, as it can handle the data model changes, the large volume of records, and the tight timeline.

NEW QUESTION # 126

.....

TrainingDump cares for your queries also, there is a competition going on in market who is offering Plat-Arch-201 Study Material, but to remove all the ambiguities, TrainingDump offers you to try a free demo of actual Plat-Arch-201 exam questions. The free demo will give you a clear image of what exactly TrainingDump offers you. You may buy the product if you are satisfied with the demo.
