

Microsoft AZ-801 Authorized Exam Dumps & AZ-801 Exam Torrent

What's more, part of that TestPassKing AZ-801 dumps now are free: <https://drive.google.com/open?id=1Fqgflg9hoe6Tyzeza8wJToPCu7Bpp9HH>

In order to meet the demand of most of the IT employees, TestPassKing's IT experts team use their experience and knowledge to study the past few years Microsoft certification AZ-801 exam questions. Finally, TestPassKing's latest Microsoft AZ-801 simulation test, exercise questions and answers have come out. Our Microsoft AZ-801 simulation test questions have 95% similarity answers with real exam questions and answers, which can help you 100% pass the exam. If you do not pass the exam, TestPassKing will full refund to you. You can also free online download the part of TestPassKing's Microsoft Certification AZ-801 Exam practice questions and answers as a try. After your understanding of our reliability, I believe you will quickly add TestPassKing's products to your cart. TestPassKing will achieve your dream.

Microsoft AZ-801 (Configuring Windows Server Hybrid Advanced Services) certification exam is designed to test an IT professional's knowledge and skills when it comes to configuring Windows Server Hybrid advanced services. Configuring Windows Server Hybrid Advanced Services certification is ideal for IT professionals who are looking to advance their careers and be recognized for their expertise in configuring Windows Server Hybrid advanced services. Passing AZ-801 exam is a great way to demonstrate your technical expertise and enhance your career prospects.

Microsoft AZ-801 Exam is a challenging but rewarding certification for IT professionals looking to enhance their skills and demonstrate expertise in configuring and managing advanced hybrid services in a Windows Server environment. Candidates who pass the exam will have a deep understanding of Azure and Windows Server, and will be able to design and implement complex hybrid solutions that meet the needs of their organization.

AZ-801 Exam Torrent - New AZ-801 Test Syllabus

The beauty of life may be that we don't know what will happen in the future, but even so, we are willing to pursue a bright future. Happiness for us may be the life we want to live, and our AZ-801 Study Materials can provide a good foundation for you to achieve this goal. A good job requires good skills, and the most intuitive way to measure your ability is how many qualifications you have

passed and how many qualifications you have.

The Microsoft AZ-801 Exam consists of various topics related to hybrid advanced services, such as implementing Azure Active Directory, managing Azure AD identities and roles, implementing and managing virtual networking, implementing and managing hybrid network connectivity, implementing and managing advanced virtualization, and managing hybrid workloads. Candidates are expected to have a deep understanding of these topics and be able to apply them in real-world scenarios.

Microsoft Configuring Windows Server Hybrid Advanced Services Sample Questions (Q96-Q101):

NEW QUESTION # 96

Your network contains an Active Directory Domain Services (AD DS) domain.

You need to implement a Storage Spaces Direct cluster. The solution must ensure that the cluster supports delimiting the allocation of volumes.

What is the minimum number of servers required, and which type of resiliency is required for the cluster volumes? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Topic 2, Fabrikam inc

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Fabrikam, Inc. is a manufacturing company that has a main office in Chicago and a branch office in Paris.

Existing Environment

Identity Infrastructure

Fabrikam has an Active Directory Domain Services (AD DS) forest that syncs with an Azure Active Directory (Azure AD) tenant.

The AD DS forest contains two domains named corp.fabrikam.com and europe.fabrikam.com.

fabrikam.com

Chicago Office On-Premises Servers

The office in Chicago contains on-premises servers that run Windows Server 2016 as shown in the following table.

All the servers in the Chicago office are in the corp.fabrikam.com domain.

All the virtual machines in the Chicago office are hosted on HV1 and HV2. HV1 and HV2 are nodes in a failover cluster named Cluster1.

WEB1 and WEB2 run an Internet Information Services (IIS) website. Internet users connect to the website by using a URL of <https://www.fabrikam.com>

All the users in the Chicago office run an application that connects to a UNC path of \\Fileserver1\Data.

Paris On-Premises Servers

The office in Paris contains a physical server named dc2.europe.fabrikam.com that runs Windows Server 2016 and is a domain controller for the europe.fabrikam.com domain.

Network Infrastructure

The networks in both the Chicago and Paris offices have local internet connections. The Chicago and Paris offices are connected by using VPN connections.

The client computers in the Chicago office get IP addresses from DHCP1.

Security Risks

Fabrikam identifies the following security risks:

- * Some accounts connect to AD DS resources by using insecure protocols such as NTLMv1, SMB1, and unsigned LDAP.
- * Servers have Windows Defender Firewall enabled. Server administrators sometimes modify firewall rules and allow risky connections.

Requirements

Security Requirements

Fabrikam identifies the following security requirements:

- * Prevent server administrators from configuring Windows Defender Firewalls rules.
- * Encrypt all the data disks on the servers by using BitLocker Drive Encryption (BitLocker).
- * Ensure that only authorized applications can be installed or run on the servers in the forest.
- * Implement Microsoft Sentinel as a reporting solution to identify all connections to the domain controllers that use insecure protocols.

On-Premises Migration Plan

Fabrikam plans to migrate all the existing servers and identifies the following migration requirements:

- * Move the APP1 and APP2 virtual machines in the Chicago office to a new Hyper-V failover cluster named Cluster2 that will run Windows Server 2022.
- * Cluster2 will contain two new nodes named HV3 and HV4.
- * All virtual machine files will be stored on a Cluster Shared Volume (CSV).
- * Migrate Archive1 to a new failover cluster named Cluster3 that will run Windows Server 2022.
- * Cluster3 will contain two physical nodes named Node1 and Node2.
- * The file shares on Cluster3 will be a failover cluster role in active-passive mode.
- * Migrate all users, groups, and client computers from europe.fabrikam.com to corp.fabrikam.com.
- * The migration will be performed by using the Active Directory Migration Tool (ADMT).
- * A computer named ADMTcomputer will be deployed to the corp.fabrikam.com domain to run ADMT migration procedures.
- * User accounts will retain their existing password.
- * Migrate the data share from Fileserver1 to a new server named Fileserver2 that will run Windows Server 2022. After the migration, the data share must be accessible by using the existing UNC path.

Azure Migration Plan

Fabrikam plans to migrate some resources to Azure and identifies the following migration requirements:

- * Create an Azure subscription named Sub1.
- * Create an Azure virtual network named Vnet1.
- * Use ExpressRoute to connect the Paris and Chicago offices to Vnet1.
- * License all servers for Microsoft Defender for servers.
- * Migrate APP3 and APP4 to Azure.
- * Migrate the www.fabrikam.com website to an Azure App Service web app named WebApp1.
- * Decommission WEB1 and WEB2.

DHCP Migration Plan

Fabrikam plans to replace DHCP1 with a new server named DHCP2 and identifies the following migration requirements:

- * Ensure that DHCP2 provides the same IP addresses that are currently available from DHCP1.
- * Prevent DHCP1 from servicing clients once services are enabled on DHCP2.
- * Ensure that the existing leases and reservations are migrated.

NEW QUESTION # 97

You have an Azure subscription that contains an Azure Recovery Services vault.

You have an on-premises physical server that runs Windows Server.

You need to back up the server daily to Azure.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

Graphical user interface, text, application Description automatically generated

NEW QUESTION # 98

You have two file servers named Server1 and Server2 that run Windows Server. Server1 contains a shared folder named Data. Data contains 10 TB of data.

You plan to decommission Server1.

You need to migrate the files from Data to a new shared folder on Server2. The solution must meet the following requirements:

- * Ensure that share, file, and folder permissions are copied.
- * After the initial copy occurs, ensure that changes in \\Server1\Data can be synced to the destination
- * without initiating a full copy.
- * Minimize administrative effort.

What should you use?

- A. xcopy
- **B. Storage Migration Service**
- C. azcopy
- D. Storage Replica

Answer: B

Explanation:

NEW QUESTION # 99

Your network contains an Active Directory Domain Services (AD DS) domain that has the Active Directory Recycle Bin enabled. All domain controllers are backed up daily.

You accidentally remove all the users from a domain group.

You need to get a list of the users that were previously in the group.

Which four actions should you perform in sequence from a domain controller? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

NEW QUESTION # 100

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The functional level of the forest and the domain is Windows Server 2012 R2. The domain contains the domain controllers shown in the following table.

You need to raise the forest functional level to Windows Server 2016. The solution must meet the following requirements:

Ensure that there are three domain controllers after you raises the level.

Minimize how long the FSMO roles are unavailable.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
