Test Certification ITIL-4-CDS Cost, Dump ITIL-4-CDS Check

As the most important element that almost all the candidates will take into consider, the pass rate of our ITIL-4-CDS exam questions is high as 98% to 100%, which is unique in the market and no one has made it. And also the exam passing guarantee that makes our ITIL-4-CDS Study Guide superior in the market. As the best seller, our ITIL-4-CDS learning braindumps are very popular among the candidates. Many of the loyal customers are introduced by their friends or classmates.

Peoplecert ITIL 4 Specialist: Create, Deliver and Support Sample Questions (Q30-Q35):

NEW QUESTION # 30

An organization has experienced difficulties in providing user support at expected levels. The organization has asked one of its relationship managers and a business analyst to gather information about the types of issues which users and customers are experiencing. The organization would also like to understand the operational issues that support teams are experiencing. Which practice is most likely to provide this information?

- A. Monitoring and event management
- B. Release management
- **C. Service desk**
- D. Problem management

Answer: C

NEW QUESTION # 31

A service operations team monitors a critical service. They receive thousands of events every day and operators are trained, so they know which events require a response. Sometimes they miss an important event and this causes service level targets to be breached. What is the BEST approach to resolve this issue?

- **A. Improve filtering of operations data**
- B. Recruit additional operations staff
- C. Improve operations team training
- D. Renegotiate service level targets

Answer: A

NEW QUESTION # 32

A global retailer is shifting its monolithic order-management system to a containerized, microservices-based architecture. Development teams each use different code repositories, branching strategies, build tools and container registries. As a result, integration is laborious, security scans are inconsistent, and production deployments frequently break. Which ONE practice should lead the standardization of coding policies, repository management, CI/CD pipelines and artifact versioning to streamline end-to-end software delivery?

- A. Change Enablement practice
- B. Software Development and Management practice
- C. Service Validation and Testing practice
- **D. Release Management practice**

Answer: D

Explanation:

Release Management practice is responsible for defining and governing how software is built, packaged, and deployed across environments. By establishing standardized CI/CD pipelines, enforcing repository structures, and managing artifact versioning policies, it ensures consistency, repeatability, and traceability from development through production. This central oversight accelerates integration, embeds security and quality gates, and reduces deployment failures. Option B is incorrect because Service Validation and Testing focuses on designing and executing tests; it relies on established pipelines but does not own their standardization or governance.

NEW QUESTION # 33

A technology organization is undergoing a strategic expansion, targeting emerging markets. The organization's current workforce has not had experience in dealing with the innovative products which are part of the new markets. What is the BEST strategic approach that the organization should adopt to resolve this situation?

- A. Increase the total number of employees focusing on new hires with expertise in emerging technologies
- **B. Invest in targeted training programmes for existing staff in relevant emerging technologies**
- C. Restructure the organization to create specialized departments for emerging technologies
- D. Outsource the development of new technology segments to specialized vendors

Answer: B

NEW QUESTION # 34

Which concept focuses on understanding the different levels within systems and ensuring that multiple systems are aligned and unified when designing services?

- A. Robotic process automation
- B. Customer orientation
- C. ICI/CD
- D. Integration and data sharing

Answer: D

NEW QUESTION # 35
