SAP C-S4EWM-2023 Test King & C-S4EWM-2023 Valid Test Answers

2026 Latest Prep4cram C-S4EWM-2023 PDF Dumps and C-S4EWM-2023 Exam Engine Free Share: https://drive.google.com/open?id=1wSnRE15w6jkNNhVQB43N30ovpkxZa4U_

Do you worry about not having a long-term fixed study time? Do you worry about not having a reasonable plan for yourself? C-S4EWM-2023 exam dumps will solve this problem for you. Based on your situation, including the available time, your current level of knowledge, our study materials will develop appropriate plans and learning materials. Whatever you want to choose, you want to learn from which stage. In our study materials, you can find the right one for you. At the same time, the C-S4EWM-2023 Exam Prep is constantly updated. After you have finished learning a part, you can choose a new method according to your own situation. Our study materials are so easy to understand that no matter who you are, you can find what you want here.

SAP C-S4EWM-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Warehouse Structure, Resource Management and SAP EWM Master Data: This topic encompasses defining the warehouse structure and setting up resource management, along with creating SAP EWM master data like storage bins and products, packaging specifications, supply chain units, and business partners.
Topic 2	• Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).
Topic 3	• Managing Clean Core: It covers evaluating and applying clean core principles to ERP to maximize business process agility, reduce adaptation efforts, and accelerate innovation.
Topic 4	• Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.
Topic 5	• Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.
Topic 6	• System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.
Topic 7	• Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.
Topic 8	• Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.

Topic 9	• Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.

C-S4EWM-2023 Valid Test Answers | C-S4EWM-2023 Cert Exam

As is known to us, getting the newest information is very important for all people to pass the exam and get the certification in the shortest time. In order to help all customers gain the newest information about the C-S4EWM-2023 exam, the experts and professors from our company designed the best C-S4EWM-2023 test guide. The experts will update the system every day. If there is new information about the exam, you will receive an email about the newest information about the C-S4EWM-2023 Learning Materials. We can promise that you will never miss the important information about the C-S4EWM-2023 exam.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q46-Q51):

NEW QUESTION # 46
What can you do with a storage group? Note: There are 2 correct answers to this question.

- A. Use it in process-oriented and layout-oriented storage control.
- B. Assign it as an intermediate storage group.
- C. Assign it to multiple storage bins.
- D. Use it to define a logical or physical breakdown of a storage type.

Answer: A,C

Explanation:
A storage group in SAP EWM provides the following functionalities:
* B. Assign it to Multiple Storage Bins:
* Storage groups can group multiple bins for logical or operational purposes.
* C. Use it in Process-Oriented and Layout-Oriented Storage Control:
* Storage groups are critical for defining steps in process-oriented or layout-oriented storage control, especially when managing complex storage operations.
Incorrect Options:
* A: Storage types are defined independently, and storage groups do not directly break them down.
* D: There is no direct configuration for assigning a storage group as an intermediate storage group.
References:
* SAP EWM Documentation: Storage Group Configuration
* SAP Help Portal: Using Storage Groups in Storage Control

NEW QUESTION # 47
How do you control the physical inventory procedures which can be done in a specific part of the warehouse?

- A. You define a storage section and assign this to the physical inventory area
- B. You define a queue and assign this to the physical inventory area
- C. You assign bins directly to the physical inventory area
- D. You define an activity area and assign this to the physical inventory area

Answer: D

Explanation:
Comprehensive and Detailed In-Depth Explanation:
In SAP EWM, physical inventory (PI) procedures can be restricted to specific warehouse areas. Option C ("You define an activity area and assign this to the physical inventory area") is correct because the activity area, which groups storage bins for specific activities (e.g., counting), is linked to a PI area in SPRO: SCM Extended Warehouse Management > Physical Inventory > Define

Physical Inventory Area. This controls where PI procedures apply. Option A (queue) relates to resource management, option B (direct bin assignment) bypasses the PI area concept, and option D (storage section) is a lower-level structure not directly tied to PI control.

NEW QUESTION # 48

What can a mobile user do when working with semi-system-guided processing?

- A. Select the warehouse order to be processed
- B. Select the handling unit to be processed
- C. Select the batch to be processed
- D. Create ad hoc warehouse tasks

Answer: A

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Semi-system-guided processing in SAP EWM (via RF, e.g., /SCWM/RFUI) provides flexibility. Option A ("Select the warehouse order to be processed") is correct as users can choose from a list of orders, configured in SPRO: SCM Extended Warehouse Management > Mobile Data Entry > Define Semi-System-Guided Processing. Options B, C, and D are either system-driven or not standard in this mode.

NEW QUESTION # 49

You define new SAP Extended Warehouse Management (SAP EWM) delivery document types for inbound delivery processes. Which additional customizing step is required in SAP EWM?

- A. Create a new system profile for the field control.
- B. Define a delivery item type for the inbound process.
- C. Map an SAP ERP document type to the delivery document type
- D. Define a document category for the inbound process.

Answer: C

Explanation:
When defining new delivery document types for inbound processes in SAP EWM, an essential customizing step is:
* C. Map an SAP ERP document type to the delivery document type:
* This ensures that the delivery document type in SAP ERP is correctly linked to the corresponding delivery document type in SAP EWM.
* Mapping is critical for seamless integration and data consistency between ERP and EWM systems.
Incorrect Options:
* A: System profiles for field control do not need to be newly created for delivery document types.
* B: Document categories are predefined and do not need customization.
* D: Delivery item types are relevant but not directly required for document type definition.
References:
* SAP Help Portal: Delivery Document Type Customization
* SAP EWM Documentation: ERP-EWM Integration for Inbound Deliveries

NEW QUESTION # 50

What can a warehouse order include? Note: There are 2 correct answers to this question.

- A. Warehouse requests
- B. Wave items
- C. Warehouse tasks
- D. Physical inventory items

Answer: A,D

Explanation:
Warehouse Orders

* A warehouse order groups operations to be performed in the warehouse, such as putaway or picking. It can include:
* Warehouse Requests (A): These are requests for inbound, outbound, or internal operations.
* Physical Inventory Items (B): Items flagged for counting during physical inventory processes.
Excluded Options
* Warehouse Tasks (C): Tasks are detailed operations but are not directly part of a warehouse order.
* Wave Items (D): Wave items are part of planning waves, not directly included in orders.
SAP S/4HANA Cloud Private Edition Reference
* Refer to Warehouse Order Management and Structure in SAP EWM Help documentation for comprehensive details.

NEW QUESTION # 51
......

With pass rate reaching 96%, our C-S4EWM-2023 exam materials have gained popularity in the market, and many candidates choose us for this reason. We can help you pass the exam just one time. What's more, C-S4EWM-2023 exam materials are high quality, and you can improve your efficiency by using them. You can receive your downloading link and password within ten minutes after payment, so that you can start your learning by using C-S4EWM-2023 Exam Dumps. Free update for one year is available, and our system will send the latest version to your email automatically, you just need to check your email for the latest version.
