SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q29-Q34):

NEW QUESTION # 29

In the Subcontracting solution process, how is the stock for the provided components managed? Note: There are 2 correct answers to this question.

- A. The stock is managed at the storage location level.
- B. The stock is managed as part of supplier's own stock.
- C. The stock is managed as part of your own stock.
- D. The stock is managed at the plant level.

Answer: A,C

Explanation:

In the Subcontracting solution process, the stock for provided components is managed in a specific way to ensure proper tracking and accountability. Below are the two correct answers:

- * The stock is managed as part of your own stock (Option A): In subcontracting, the components provided to the subcontractor are still considered part of your own stock. This ensures that you retain ownership and control over the materials until they are consumed in the subcontracting process. The SAP Subcontracting Guide confirms this.
- * The stock is managed at the storage location level (Option B): The stock for subcontracting components is tracked at the storage location level within your system. This allows for precise inventory management and visibility into where the materials are located. The same SAP Subcontracting Guide documents this functionality.
- * C. The stock is managed at the plant level: While plant-level stock exists, subcontracting specifically tracks stock at the storage location level for better granularity.
- * D. The stock is managed as part of supplier's own stock: In subcontracting, the components remain part of your own stock and are not transferred to the supplier's stock.
- * SAP Subcontracting Guide: Explains how stock for subcontracting components is managed as part of your own stock and tracked at the storage location level. <https://help.sap.com>
- * SAP S/4HANA Cloud Procurement Guide: Provides details on subcontracting processes and stock management.

Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 30

For which of the following actions can you use the SAP Fiori app Manage Purchase Orders?

- A. Convert your purchase requisitions to purchase orders
- B. Maintain some default values of purchase orders for your user
- C. Create purchase orders for direct consumption
- D. Edit the fields of multiple purchase orders simultaneously

Answer: D

NEW QUESTION # 31

What are some characteristics of public cloud? Note: There are 2 correct answers to this question.

- A. Perpetual license
- B. Lower total cost of ownership

- C. Multi-tenant server
- D. Software installation on customer site

Answer: B,C

NEW QUESTION # 32

What do you need to create to test APIs on your SAP S/4HANA Cloud Public Edition system using the SAP Business Accelerator Hub? Note: There are 2 correct answers to this question.

- A. A communication scenario
- B. A communication arrangement
- C. An API
- D. A communication system

Answer: B,D

Explanation:

To test APIs on your SAP S/4HANA Cloud Public Edition system using the SAP Business Accelerator Hub, you need to set up specific configurations. Below are the two correct answers:

- * A communication system (Option A): A communication system represents the external system or application that will interact with the SAP S/4HANA Cloud system. It is required to establish connectivity and define the technical details of the external system. The SAP API Management Guide confirms this requirement.
- * A communication arrangement (Option B): A communication arrangement links the communication system to a communication scenario, enabling specific API functionalities. It defines how the external system interacts with the SAP S/4HANA Cloud system. The same SAP API Management Guide documents this step.
- * C. A communication scenario: While communication scenarios are essential for defining API capabilities, they are not directly created by users. Instead, they are predefined by SAP and selected during the communication arrangement setup.
- * D. An API: APIs are provided by SAP and do not need to be created by users. The focus is on configuring the communication system and arrangement to test the APIs.
- * SAP API Management Guide: Explains the steps to configure communication systems and arrangements for API testing <https://help.sap.com>
- * SAP Business Accelerator Hub Documentation: Provides guidance on testing APIs and integrating external systems with SAP S/4HANA Cloud.

NEW QUESTION # 33

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. SAP Cloud ALM Processes app
- B. Availability and Dependencies of Solution Processes Excel
- C. Business Driven Configuration Questionnaire
- D. SAP Cloud ALM Requirements app

Answer: C

Explanation:

In SAP Central Business Configuration, the Business Driven Configuration Questionnaire (BDCQ) is used to collect the values entered into configuration activities. The BDCQ is a key tool in the implementation process, allowing users to define business-specific settings based on their requirements. It ensures that the configuration aligns with the organization's business processes and industry standards.

* Business Driven Configuration Questionnaire (BDCQ): The BDCQ is designed to guide users through the configuration of SAP S/4HANA Cloud Public Edition by asking relevant questions about business processes. The responses provided in the questionnaire are used to configure the system automatically. This approach simplifies the configuration process and ensures consistency across the implementation. The SAP Central Business Configuration Guide confirms that the BDCQ is the primary tool for collecting configuration values.

* B. Availability and Dependencies of Solution Processes Excel: This Excel file is used to analyze the availability and dependencies of solution processes but does not collect configuration values. It is more of a planning tool rather than a configuration tool.

* C. SAP Cloud ALM Requirements app: The SAP Cloud ALM Requirements app is used for managing and tracking requirements during the implementation process. While it helps in documenting requirements, it does not directly collect configuration values.

* D. SAP Cloud ALM Processes app: The SAP Cloud ALM Processes app is used for process management and monitoring. It focuses on process flows and does not play a role in collecting configuration values.

* SAP Central Business Configuration Guide:Explains the role of the Business Driven Configuration Questionnaire in collecting configuration values.<https://help.sap.com>

* SAP Activate Methodology for SAP S/4HANA Cloud Public Edition:Provides an overview of the tools and methods used in the configuration process, including the BDCO.

* SAP Cloud ALM Documentation:Describes the functionalities of the SAP Cloud ALM apps, including the Requirements and Processes apps.

Why Option A is Correct: Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 34
