NEW QUESTION # 25

Why is it important to implement version control on requirements?

- A. To make it possible to revert a requirement to a previous version.
- B. To provide unique identification to a requirement.
- C. To follow the evolving history of a requirement.
- D. To register the reason why a requirement exists.

Answer: A,C

NEW QUESTION # 26

According to the Kano model, there is a particular category of system attributes that has an almost linear relationship between satisfaction and degree of compliance.

For which category is this so? (1 Point)

- A. Needs
- B. Excitement attributes
- C. Goals
- **D. Performance attributes**
- E. Basic attributes

Answer: D

NEW QUESTION # 27

Which of the following is a disadvantage of template-based work products?

- A. Requirements do not look uniform.
- B. The structure is not reusable.
- C. There are no real disadvantages.
- **D. Not-included aspects are likely to be omitted.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Template-based documents and forms enforce a common structure, making requirements more uniform (contradicting A) and inherently reusable across projects (contradicting B). However, they have notable downsides: people may focus on filling the template rather than thinking deeply about content, and any aspect not explicitly represented by a field in the template tends to be overlooked. This can lead to missing important information. Therefore option D correctly captures a documented disadvantage; C is obviously false because the syllabus explicitly lists cons.

NEW QUESTION # 28

.....

Our company is a professional certificate exam materials provider, and we have worked on this industry for years, therefore we have rich experiences.
