SAP Certified Associate - Validating Business Transformation Sample Questions (Q19-Q24):

NEW QUESTION # 19

What is the SAP Readiness Check used for?

- A. Verifying SAP license usage
- B. Forecasting project revenue
- C. Measuring test coverage
- D. Assessing the landscape's readiness for transformation

Answer: D

Explanation:

SAP Readiness Check is a pre-transformation assessment tool used to evaluate whether an existing SAP system is prepared for a

major transition, such as converting to SAP S/4HANA or adopting cloud-based operations. It reviews key areas like custom code usage, add-on compatibility, simplification items, data volume, and integration impacts. The purpose is to identify risks, scope the transformation effort, and provide a clear understanding of required preparation activities. It is not used for testing coverage, revenue prediction, or license audits.

NEW QUESTION # 20

SAP LeanIX Fact Sheets can represent which of the following?

- A. Survey forms
- B. RACI matrices
- C. Audit logs
- D. Applications, interfaces, and capabilities

Answer: D

Explanation:

Fact Sheets are the central information objects used in SAP LeanIX. They document key architectural components such as applications, interfaces, and business capabilities. Each Fact Sheet provides lifecycle details, ownership, dependencies, and relationships to other IT and business elements. This structure enables organizations to maintain a clear and consistent representation of their enterprise architecture. Survey forms, audit logs, or RACI matrices are not core Fact Sheet types.

NEW QUESTION # 21

What benefit does SAP LeanIX insights provide to stakeholders?

- A. Enhanced survey management
- B. Visibility into current and target architecture alignment
- C. Cost allocation mapping
- D. Lifecycle tag duration tracking

Answer: B

NEW QUESTION # 22

What are the phases of a business transformation process?

- A. Analyze, plan, execute, monitor
- B. Discover, plan, analyze, design, implement, operate
- C. Discover, prepare, explore, realize, deploy, run
- D. Discover, plan, execute, deploy, evaluate, run

Answer: C

Explanation:

These six phases—Discover, Prepare, Explore, Realize, Deploy, and Run—represent the standard SAP Activate-based structure used in transformation projects. Each phase has specific deliverables: discovery focuses on identifying value and readiness; prepare sets the foundation; explore validates fit-to-standard processes; realize configures and tests the solution; deploy transitions the system into production; and run focuses on operations and continuous improvement. This phased approach provides consistency across transformation initiatives.

NEW QUESTION # 23

What component enables application development and integration in the toolchain?

- A. SAP HANA Studio
- B. SAP GUI
- C. SAP S/4HANA
- D. SAP Business Technology Platform and SAP Build

Answer: D

Explanation:

SAP Business Technology Platform (BTP), together with SAP Build, provides the infrastructure for creating extensions, integrations, and custom applications while preserving a clean core. BTP includes integration services, event-driven architecture, workflow automation, and low-code/no-code tools. This enables customers to extend SAP S/4HANA without modifying the core system. The other tools do not serve as the primary integration or extension platform in modern cloud transformation.
