Having a good command of professional knowledge for customers related to this 2V0-17.25 exam is of superior condition. However, that is not certain and sure enough to successfully pass this exam. You need efficiency and exam skills as well. Actually, a great majority of exam candidates feel abstracted at this point, wondering which one is the perfect practice material they are looking for. To make things clear, we will instruct you on the traits of our 2V0-17.25 real materials one by one. Here we recommend our 2V0-17.25 guide question for your reference.

## VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.</li> </ul>

## Quiz VMware - Perfect 2V0-17.25 - Valid Test VMware Cloud Foundation 9.0 Administrator Test

Do you want to obtain your certificate as quickly as possible? If you do, just choose us. You can get your downloading link within ten minutes after your payment for 2V0-17.25 training materials, and you can start your learning as quickly as possible. In addition, 2V0-17.25 training materials of us are high quality, and you just need to spend 48 to 72 hours on practicing, and you can pass the exam successfully. If you have any questions about the 2V0-17.25 Exam Dumps, just contact us, we will give you reply as soon as possible.

### VMware Cloud Foundation 9.0 Administrator Sample Questions (Q89-Q94):

#### NEW QUESTION # 89

An administrator is tasked to upgrade an existing VMware vSphere 8 only environment to VMware Cloud Foundation (VCF) 9.0. Which three components must be deployed as part of the upgrade to VCF 9.0? (Choose three.)

- A. VCF Operations collector
- B. VCF Identity Broker
- C. VCF Operations for networks
- D. VCF Operations
- E. VCF Operations for logs
- F. VCF Operations fleet management

**Answer: C,D,F**

Explanation:

References: VMware Cloud Foundation 9.0 Deployment Guide - Core Components for VCF Instance Deployment and Fleet Architecture Overview.

#### NEW QUESTION # 90

An administrator has been tasked with adding a new VI workload Domain to an instance of VMware Cloud Foundation (VCF).

- The administrator only has two prepared ESXi host servers showing in SDDC Manager.

- The new VI Workload Domain must use vSphere Lifecycle Images.

Which three supported principal storage options are available to the administrator when configuring the new VI Workload Domain? (Choose three.)

- A. NFS v3
- B. vVols
- C. iSCSI
- D. VMFS on FC
- E. VSAN
- F. VMFS on local disk

**Answer: A,B,D**

### NEW QUESTION # 91

What is the primary purpose of configuring VM storage policies in a VMware vSphere environment?

- A. To manage network traffic between VMs.
- B. To configure CPU and memory reservations for VMs.
- C. To automate the backup of virtual machines.
- **D. To enforce specific storage requirements such as performance, availability, and redundancy.**

**Answer: D**

Explanation:

The primary purpose of configuring VM storage policies in a VMware vSphere environment is to enforce specific storage requirements such as performance, availability, and redundancy. These policies help ensure that virtual machines are placed on datastores that meet the desired service levels and characteristics.

### NEW QUESTION # 92

Which vSphere feature helps you reclaim idle or unused disk space within guest operating systems by coordinating the hypervisor and OS?

- A. Transparent Page Sharing
- **B. UNMAP / Guest OS trim**
- C. Storage I/O Control
- D. Ballooning

**Answer: B**

Explanation:

The UNMAP feature (sometimes referred to as trim for SSDs) reclaims blocks that guest OSes free, updating the storage system so that this space can be reused.

### NEW QUESTION # 93

An administrator recently incorrectly deployed a new isolated VI workload domain within an existing VMware Cloud Foundation (VCF) instance.

How can the administrator reconfigure the VI workload domain to share the SSO domain from the management workload domain?

- A. From the VI workload domain vCenter Server instance, add the management domain SSO and remove the isolated SSO.
- B. From the SDDC Manager console, migrate the VI workload domain to the management domain.
- C. From the management domain vCenter Server instance, use the rsautil command to add the VI workload domain to the management domain.
- **D. A new VI workload domain must be created through SDDC Manager.**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to VMware Cloud Foundation documentation, once a VI workload domain has been deployed as an isolated domain (with its own SSO), it cannot be reconfigured after deployment to join the management domain's SSO domain. The official guidance states that the only supported approach is to delete the incorrectly configured VI workload domain and create a new one through SDDC Manager, ensuring it is properly configured to share the SSO domain with the management domain during the deployment process. There is no supported process to convert or migrate an existing isolated SSO VI workload domain to a shared SSO configuration after deployment.

### NEW QUESTION # 94
