Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q121-Q126):

NEW QUESTION # 121

Which of the below is not a valid category for connector type?

- **A. Gold**
- B. Premium
- C. Community
- D. Select

Answer: A

Explanation:

Gold is not valid category for connector types.

MuleSoft Doc Ref :<https://docs.mulesoft.com/mule-runtime/3.7/anypoint-connectors#connector-support-categories> Text

Description automatically generated with medium confidence

□

NEW QUESTION # 122

Refer to exhibits.

□ What message should be added to Logger component so that logger prints "The city is Pune" (Double quote should not be part of logged message)?

- **A. The city is #[payload.City]**
- B. #["The city is" ++ payload.City]
- C. #[The city is \${payload.City}]
- D. The city is + #[payload.City]

Answer: A

Explanation:

Correct answer is The city is #[payload.City]

Answer can get confused with the option #["The city is" ++ payload.City] But note that this option will not print the space between is and city name. This will print The city isPune

NEW QUESTION # 123

A mule project contains MySQL database dependency . The project is exported from Anypoint Studio so that it can be deployed to Cloudhub. What export options needs to be selected to create the smallest deployable archive that will successfully deploy to Cloudhub?

- A. No need to select any of the below options 1) Attach project sources 2) Include project module and dependencies
- B. Select both the options 1) Attach project sources 2) Include project module and dependencies
- C. Select only below option 1) Attach project sources
- **D. Select only below option 2) Include project module and dependencies**

Answer: D

Explanation:

You can choose Attach Project Sources to include metadata that Studio requires to reimport the deployable file as an open Mule project into your workspace. You must keep the Attach Project Sources option selected to be able to import the packaged JAR file

back into a Studio workspace. But requirement here is to create smallest deployable archive that will successfully deploy to Cloudhub. Hence we can ignore this option.

We need to select Include project module and dependencies

As actual modules and external dependencies required to run the Mule application in a Mule runtime engine Hence correct answer is Select only below option 2) Include project module and dependencies MuleSoft Doc Ref:

<https://docs.mulesoft.com/studio/7.5/import-export-packages#exporting-a-studio-project-to-a-deployable-mule-application>

NEW QUESTION # 124

Refer to the exhibit.

What is the correct way to create a user?

- A. ☐
- B. ☒
- C. ☐
- D. ☐

Answer: B

NEW QUESTION # 125

What HTTP method in a RESTful web service is typically used to completely replace an existing resource?

- A. PUT
- B. PATCH
- C. POST
- D. GET

Answer: A

Explanation:

PUT replaces the original version of the resource, whereas the PATCH method supplies a set of instructions to modify the resource

NEW QUESTION # 126

.....
