New 1Z1-771 Braindumps Pdf & 1Z1-771 Test Simulator Fee

We think of providing the best services as our obligation. So we have patient colleagues offering help 24/7 and solve your problems about 1Z1-771 training materials all the way. We have considerate services as long as you need us. Do not underestimate your ability, we will be your strongest backup while you are trying with our 1Z1-771 Real Exam. Besides, to fail while trying hard is no dishonor. We will provide the free update of our 1Z1-771 study engine until you pass your exam successfully!

Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details

Topic 1	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 2	• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Topic 3	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 4	• Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
Topic 5	• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 6	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 7	• Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 8	• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 9	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Topic 10	• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 11	• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 12	• Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 13	• Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 14	• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.

Topic 15	• Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Topic 16	• Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.

Oracle APEX Cloud Developer Professional Sample Questions (Q42-Q47):

NEW QUESTION # 42
Which three data types are supported by Oracle APEX Workflow parameters and item types?

- A. NUMBER
- B. VARCHAR
- C. CLOB
- D. Image

Answer: A,B,C

Explanation:
Workflow parameters and page items in APEX support:
B . NUMBER: For numeric values (e.g., 123.45), used in calculations or IDs.
C . CLOB: For large text (e.g., descriptions), stored as character large objects.
D . VARCHAR: For variable-length strings (e.g., EMPLOYEE_NAME), capped at 4000 characters in most cases.
A . Image: Not a supported data type for parameters or items; images are handled as BLOBs or file uploads, not directly as a Workflow parameter type.
These types align with Oracle Database, ensuring robust data handling in workflows.

NEW QUESTION # 43
You created a custom theme for an application. Examine these requirements: (Assuming requirements mandate syncing changes).
Which solution guarantees that any changes to the master theme are reflected in the copied theme?

- A. Refreshing the templates.
- B. Subscribing the copied theme to the master theme and refreshing the theme.
- C. Verifying the theme subscription.
- D. Copying the changes made in the master theme to the copied theme.

Answer: B

Explanation:
Theme subscription links a copied theme to its master:
A . Subscribing and refreshing: Subscribing the copied theme (in Shared Components > Themes) to the master ensures it inherits updates. "Refresh Theme" (via Theme Roller or Utilities) syncs changes (e.g., CSS, templates) from the master, guaranteeing consistency.
B . Refreshing templates: Only updates individual templates, not the entire theme.
C . Copying changes: Manual, error-prone, and not guaranteed.
D . Verifying subscription: Confirms the link but doesn't sync changes.
Use case: Ideal for maintaining branded consistency across apps.

NEW QUESTION # 44
Which two actions does the Create Application Wizard allow?

- A. Uploading JavaScript or CSS files required for an application.
- B. Changing the application authorization.
- C. Adding or deleting application pages.

- D. Reordering application pages.

Answer: C,D

Explanation:
The Create Application Wizard streamlines app creation with:
Adding or deleting application pages: Allows users to define initial pages (e.g., Home, Reports) and remove unwanted ones during the wizard process.
Reordering application pages: Provides drag-and-drop or list-based reordering of pages to set the navigation sequence.
Uploading JavaScript or CSS: This occurs post-creation in Shared Components, not within the wizard.
Changing the application authorization: Authorization schemes are set after creation, not during the wizard.
This wizard is a time-saver for rapid prototyping, offering a guided yet flexible setup.

NEW QUESTION # 45
What do you achieve by performing the "Refresh Working Copy" task?

- A. Merge the Working Copy changes with the Main application.
- B. Update the changes from one Working Copy to another.
- C. Get the latest updates from the Main application.

Answer: C

Explanation:
Working Copies in APEX allow safe experimentation:
C . Get the latest updates from the Main application: "Refresh Working Copy" (in App Builder > Working Copies) pulls changes from the Main application into the Working Copy, ensuring it reflects the latest state (e.g., new pages, fixes) without overwriting Working Copy changes.
A . Merge with Main: Merging is a separate "Merge Working Copy" task.
B . Update between Working Copies: Not supported; refreshing is Main-to-Working only.
Practical note: Use this to sync collaborative development efforts.

NEW QUESTION # 46
You use the Create Page Wizard to create a faceted search page on the EMP table. What is the default report type generated for this page?

- A. Interactive Report
- B. Classic Report
- C. Interactive Grid
- D. Column Toggle Report

Answer: A

Explanation:
When creating a faceted search page via the Create Page Wizard, the default report type is an Interactive Report. This pairs with the faceted search region to provide a searchable, filterable, and customizable report, leveraging the facets for dynamic filtering.

NEW QUESTION # 47
......

Now you have all the necessary information about quick Oracle APEX Cloud Developer Professional (1Z1-771) exam questions preparation. Just take the best decision of your career and enroll in the Oracle 1Z1-771 Exam. Download the Oracle 1Z1-771 exam real dumps now and start this career advancement journey.
