In addition, HCL-HWA-ADM-102 exam braindumps contain most of knowledge points for the exam, and you can master the major knowledge points well by practicing. In order to improve your confidence to HCL-HWA-ADM-102 Exam Materials, we are pass guarantee and money back guarantee. If you fail to pass the exam by using HCL-HWA-ADM-102 exam materials, we will give you full refund.

HCLSoftware Certified Administrator- HWA 10.2 Sample Questions (Q168-Q173):

NEW QUESTION # 168

HCL HWA 10.2 dynamic agent gateway port 31114 accepts JobManager but ssmagent Monbox.msg events timeout. agent.dynamic.gateway.jmFullyQualifiedHostname correct. NetReq.msg LINK pending. What secondary gateway parameter causes monman isolation?

- A. jmPort=31115 conflict
- B. T(ssmCheckFile)=240 excessive
- C. enBrokerRetry=NO setting
- **D. agent.dynamic.gateway.sslEnabled=YES mismatch**

Answer: D

Explanation:

agent.dynamic.gateway.sslEnabled=YES requires matching gateway SSL despite correct jmFullyQualifiedHostname/port 31114, blocking ssmagent-monman Monbox.msg linkage; correcting SSL alignment restores event processing without netman NetReq.msg or unrelated T(ssmCheckFile) changes for dynamic agent workstation processes.

NEW QUESTION # 169

Failed HCL HWA 10.2 backup DDM uninstall leaves Kubernetes Service tws-bddm-svc type LoadBalancer active. kubectl delete svc fails "cannot delete due to finalizers". Force Service deletion preserving LoadBalancer IP?

- A. kubectl delete svc tws-bddm-svc --cascade=orphan; kubectl delete svc --force --grace-period=0
- B. Release LoadBalancer IP manually via cloud provider console first
- **C. kubectl patch svc tws-bddm-svc -p '{"metadata":{"finalizers":null}}' --type=merge**
- D. Backup uninstall kubectl delete removes Services automatically

Answer: C

Explanation:

Kubernetes finalizers prevent Service deletion post-Helm uninstall. kubectl patch service tws-bddm-svc -p '{"metadata":{"finalizers":[]}}' --type=merge removes finalizer allowing deletion. kubectl get svc confirms removal; LoadBalancer IP returns to pool automatically.

NEW QUESTION # 170

Scenario: In HCL Workload Automation 10.2, an administrator needs to customize advanced behavior of the Dynamic Workload Console, such as setting custom URLs for job documentation or adjusting timeouts for z/OS engine connections. Which file must be modified and in which location after installation?

- **A. TdwcGlobalSettings.xml in <DWC_home>/usr/servers/engineServer/configDropins/overrides**
- B. TdwcGlobalSettings.xml in <DWC_home>/usr/servers/engineServer/resources
- C. TdwcGlobalSettings.xml.template in <DWC_home>/usr/servers/engineServer/configDropins/templates
- D. globalSettings.properties in <TWA_home>/TWS/config
- E. advancedSettings.json in <DWC_home>/JazzSM/profile/installedApps

Answer: A

Explanation:

Advanced settings for the Dynamic Workload Console are configured by copying the TdwcGlobalSettings.xml.template file to TdwcGlobalSettings.xml in the configDropins/overrides directory of the console server. This location allows customization of parameters like documentation URLs, user registry settings, and engine timeouts without modifying core templates. Changes require restarting the console server to take effect.

NEW QUESTION # 171

Scenario: Job logs not persisting after monitoring in HCL Workload Automation 10.2. Fix by:

- A. Increase memory limits
- B. Enable file proxy
- C. Audit job logs

- D. Broker joblog persist
- E. Adding `com.ibm.tws.com.plan.output.logtype=file` and restart

Answer: E

Explanation:

The property change forces disk storage of job logs, requiring process restart for the new behavior during plan connections.

NEW QUESTION # 172

Orchestration CLI HCL HWA 10.2 GitOps deployment from private GitLab: `ocli deploy gitops-app.yaml --source git@gitlab.corp.com:infra/app.git` fails SSH_AUTH_FAILED.

What command configures deploy key authentication?

- A. GitLab deploy tokens required
- B. `ocli secrets create gitlab-ssh --type ssh-key --private-key "$(cat /root/.ssh/id_ed25519)"`
- C. `ocli configure repo gitlab-private --ssh-key /root/.ssh/id_ed25519 --known-hosts /root/.ssh/known_hosts`
- D. `ssh-add /root/.ssh/id_ed25519; ocli deploy --git-ssh`

Answer: B

Explanation:

Secret-based SSH authentication for private repos. `ocli secrets create gitlab-ssh --type ssh-key --private-key "$(cat /root/.ssh/id_ed25519)" --public-key "$(cat /root/.ssh/id_ed25519.pub)"`, `ocli deploy gitops-app.yaml --repo git@gitlab.corp.com:infra/app.git --secret gitlab-ssh` authenticates successfully.

NEW QUESTION # 173

.....

To get better condition of life, we all need impeccable credentials of different exams to prove individual's capacity. However, weak HCL-HWA-ADM-102 practice materials may descend and impair your ability and flunk you in the real exam unfortunately.
