

# 關於SPLK-2002題庫資訊： Splunk Enterprise Certified Architect， 輕鬆通過考試

P.S. Fast2test在Google Drive上分享了免費的、最新的SPLK-2002考試題庫：[https://drive.google.com/open?id=1oISLawkzVNgdzzpSjY91\\_8QWmaRL6Rq](https://drive.google.com/open?id=1oISLawkzVNgdzzpSjY91_8QWmaRL6Rq)

Fast2test是一個專門提供IT認證考試資料的網站，它的考試資料通過率達到100%，這也是大多數考生願意相信Fast2test網站的原因之一，Fast2test網站一直很關注廣大考生的需求，以最大的能力在滿足考生們的需要，Fast2test Splunk的SPLK-2002考試培訓資料是一個空前絕後的IT認證培訓資料，有了它，你將來的職業生涯將風雨無阻。

考試旨在測試各種技能和知識，包括Splunk架構和部署、數據引入和管理、搜索和報告、高級儀表板和可視化開發以及分散式部署和管理。此外，考試還測試有關Splunk最佳實踐和行業標準的知識，以及排除故障和優化Splunk環境的能力。通過此考試可表明在Splunk架構和部署方面具有高度的專業知識和能力，有助於個人在大數據和分析領域推進職業發展。

## SPLK-2002題庫資訊 - 您最好的助力Splunk Enterprise Certified Architect 考古題分享

人生充滿選擇，選擇不一定給你帶來絕對的幸福，但選擇給了你絕對的機會，而一旦錯過選擇，只能凝望。Fast2test Splunk的SPLK-2002考試培訓資料是每個IT人士通過IT認證必須的培訓資料，有了這份考試資料就等於手握利刃，所有的考試難題將迎刃而解。Fast2test Splunk的SPLK-2002考試培訓資料是針對性強，覆蓋面廣，更新快，最完整的培訓資料，有了它，所有的IT認證都不要害怕，你都會順利通過的。

Splunk SPLK-2002 認證考試是一項業界公認的認證，適用於希望展示他們在 Splunk Enterprise 方面專業知識的 IT 專業人士。此認證考試旨在測試 IT 專業人員在 Splunk 架構、部署和管理領域的知識和技能。SPLK-2002 考試適用於已經具備 Splunk 基礎知識並有使用 Splunk Enterprise 的經驗的個人。

Splunk SPLK-2002: Splunk Enterprise 認證架構師考試是一項有價值的認證，旨在驗證個人在使用 Splunk Enterprise 方面的知識和技能。該認證在全球範圍內得到認可，並受到雇主高度重視。該認證提供許多優點，如增加工作機會、更高的薪資和在行業中的認可。該認證是想提升自己成為 Splunk 專業人員的個人和使用 Splunk 以確保員工具備必要技能和知識的組織的必要認證。

## 最新的 Splunk Enterprise Certified Architect SPLK-2002 免費考試真題 (Q98-Q103):

### 問題 #98

When adding or rejoining a member to a search head cluster, the following error is displayed:

Error pulling configurations from the search head cluster captain; consider performing a destructive configuration resync on this search head cluster member.

What corrective action should be taken?

- A. Run the clean raft command on all members of the search head cluster.

- B. Run the splunk apply shcluster-bundle command from the deployer.
- **C. Run the splunk resync shcluster-replicated-config command on this member.**
- D. Restart the search head.

答案: C

解題說明:

Explanation

<https://community.splunk.com/t5/Deployment-Architecture/How-to-resolve-error-quot-Error-pulling-configurati>

問題 #99

Which Splunk cluster feature requires additional indexer storage?

- **A. Index Summarization**
- B. Indexer Acknowledgement
- C. Search Head Clustering
- D. Indexer Discovery

答案: A

解題說明:

Splunk's documentation on summary indexing and data-model acceleration clarifies that summary data is stored as additional indexed data on the indexers. Summary indexing produces new events-aggregations, rollups, scheduled search outputs-and stores them in summary indexes. Splunk explains that these summaries accumulate over time and require additional bucket storage, retention considerations, and sizing adjustments.

The documentation for accelerated data models further confirms that acceleration summaries are stored alongside raw data on indexers, increasing disk usage proportional to the acceleration workload. This makes summary indexing the only listed feature that strictly increases indexer storage demand.

In contrast, Search Head Clustering replicates configuration and knowledge objects across search heads-not on indexers. Indexer Discovery affects forwarder behavior, not storage. Indexer Acknowledgement controls data-delivery guarantees but does not create extra indexed content.

Therefore, only Index Summarization (summary indexing) directly increases indexer storage requirements.

References:Splunk Summary Indexing Documentation; Splunk Data Model Acceleration Guidelines; Splunk Storage and Capacity Planning Documentation.

問題 #100

Splunk Enterprise platform instrumentation refers to data that the Splunk Enterprise deployment logs in the `_introspection` index. Which of the following logs are included in this index? (Select all that apply.)

- A. `audit.log`
- **B. `resource_usage.log`**
- C. `metrics.log`
- **D. `disk_objects.log`**

答案: B,D

解題說明:

The following logs are included in the `_introspection` index, which contains data that the Splunk Enterprise deployment logs for platform instrumentation:

\* `disk_objects.log`. This log contains information about the disk objects that Splunk creates and manages, such as buckets, indexes, and files. This log can help monitor the disk space usage and the bucket lifecycle.

\* `resource_usage.log`. This log contains information about the resource usage of Splunk processes, such as CPU, memory, disk, and network. This log can help monitor the Splunk performance and identify any resource bottlenecks. The following logs are not included in the `_introspection` index, but rather in the

`_internal` index, which contains data that Splunk generates for internal logging:

\* `audit.log`. This log contains information about the audit events that Splunk records, such as user actions, configuration changes, and search activity. This log can help audit the Splunk operations and security.

\* `metrics.log`. This log contains information about the performance metrics that Splunk collects, such as data throughput, data latency, search concurrency, and search duration. This log can help measure the Splunk performance and efficiency. For more

information, see About Splunk Enterprise logging and [About the \_introspection index] in the Splunk documentation.

### 問題 #101

A multi-site indexer cluster can be configured using which of the following? (Select all that apply.)

- A. Via Splunk Web.
- B. Directly edit SPLUNK\_HOME/etc/system/default/server.conf
- C. Run a splunk edit cluster-configcommand from the CLI.
- D. Directly edit SPLUNK\_HOME/etc/system/local/server.conf

答案：A,D

解題說明：

Explanation/Reference: <https://docs.splunk.com/Documentation/Splunk/7.3.2/Indexer/Enableclustersindetail>

### 問題 #102

Which Splunk log file would be the least helpful in troubleshooting a crash?

- A. splunk\_instrumentation.log
- B. splunkd\_stderr.log
- C. splunkd.log
- D. crash-2022-05-13-11:42:57.1log

答案：A

解題說明：

The splunk\_instrumentation.log file is the least helpful in troubleshooting a crash, because it contains information about the Splunk Instrumentation feature, which collects and sends usage data to Splunk Inc. for product improvement purposes. This file does not contain any information about the Splunk processes, errors, or crashes. The other options are more helpful in troubleshooting a crash, because they contain relevant information about the Splunk daemon, the standard error output, and the crash report 12
