## SAP C\_ADBTP Exam Sample Online | New C\_ADBTP Study Notes

Test4Engine C\_ADBTP exam dumps in three different formats has C\_ADBTP questions PDF and the facility of SAP C\_ADBTP dumps. We have made these SAP C\_ADBTP questions after counseling a lot of experts and getting their feedback. The 24/7 customer support team is available at Test4Engine for SAP C\_ADBTP Dumps users so that they don't get stuck in any hitch.

## SAP Administrating SAP Business Technology Platform(C\_ADBTP\_2601) Sample Questions (Q10-Q15):

### NEW QUESTION # 10

#### SIMULATION

#### Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

#### Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

#### Answer:

#### Explanation:

See the Explanation below for complete solution.

#### Explanation:

Before You Start

Log in to the SAP BTP Cockpit.  
Open the correct Global Account.  
Go to Directories.  
Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

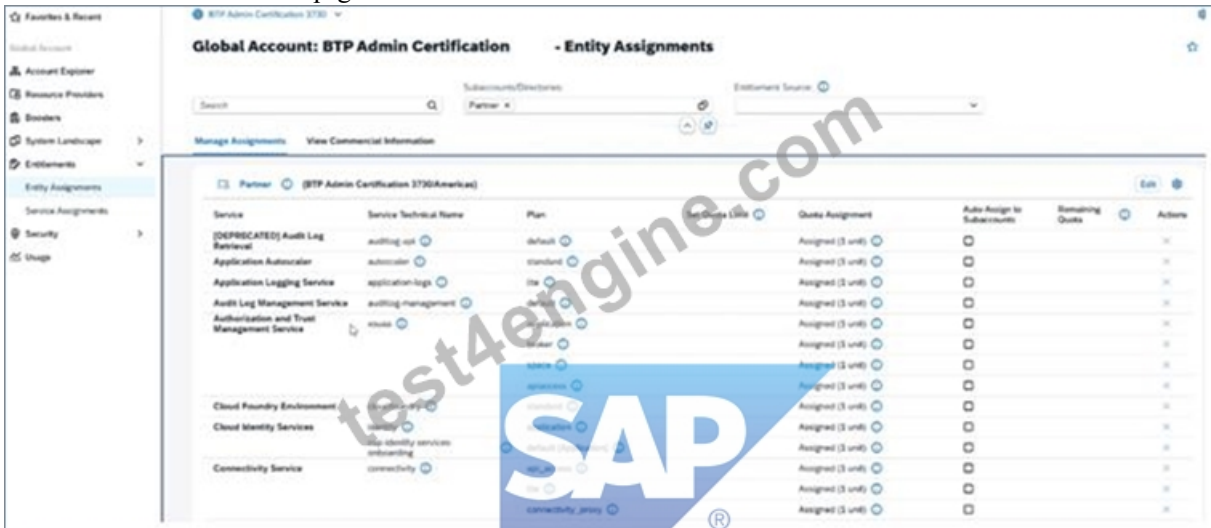

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

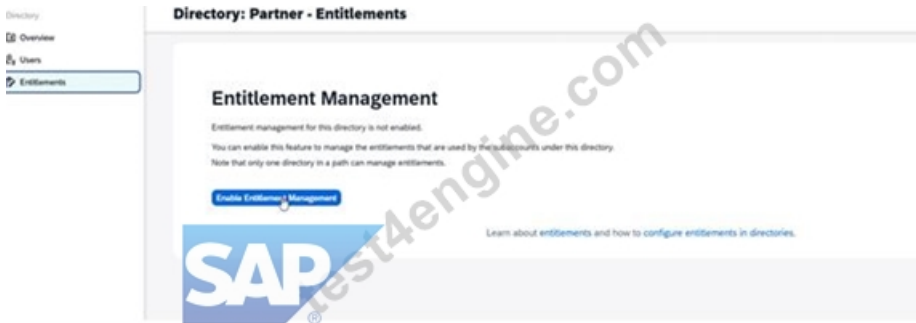

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

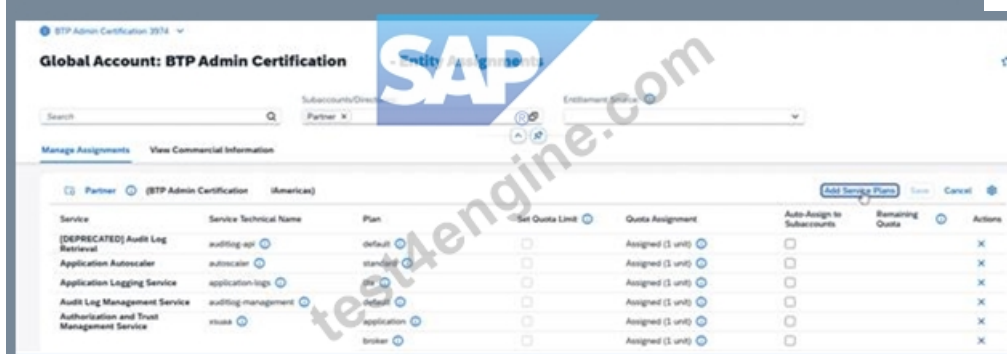

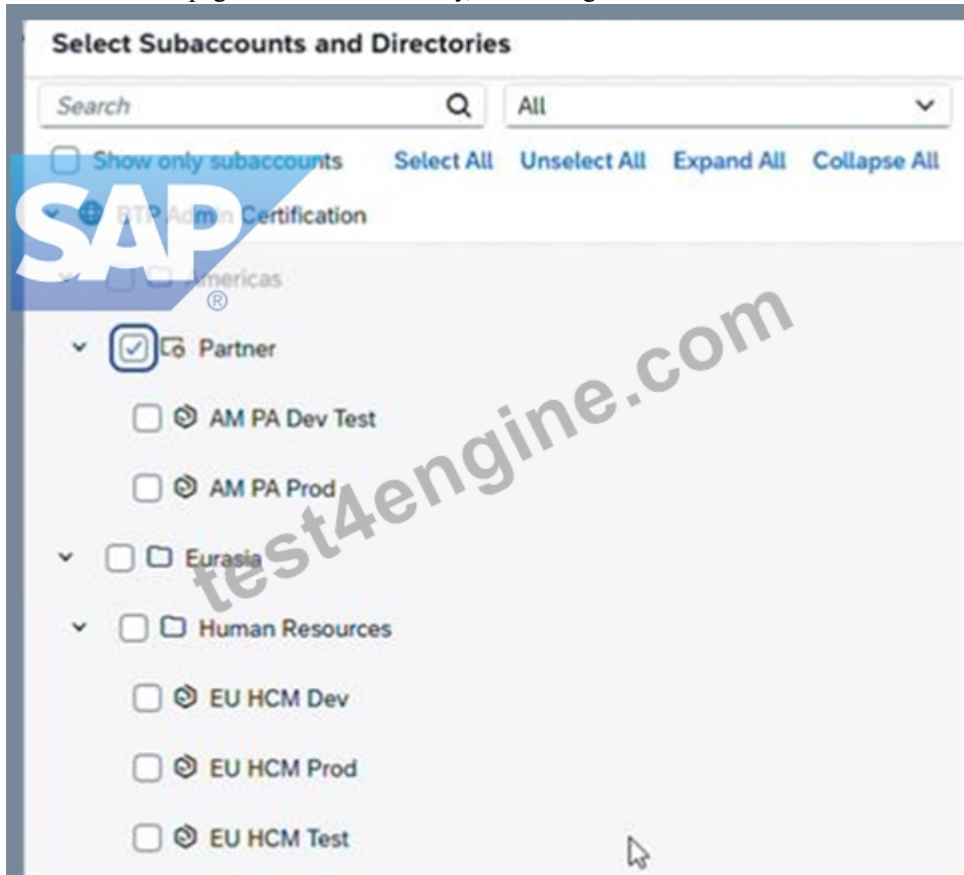

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

## Directory Partner: Add Service Plans

**Solutions:**  
All [x] Q

**Services available to this directory**

- business process model connector for SAP Signavio solutions
- Master Data Integration
- SAP Build Work Zone, advanced edition
- SAP Build Work Zone, standard edition**
- SAP Master Data Integration Tenant
- SAP Task Center

1 selected plan  
Services: SAP Build Work Zone, standard edition (1 plan)

**Service Details: SAP Build Work Zone, standard edition**

- foundation **Always Free**  
Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.  
Features: Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.  
> Availability by Region and Data Center  
> Entitlement Sources
- standard (Application)**  
Build business sites that serve as a unified entry point to applications.  
> Availability by Region and Data Center  
> Entitlement Sources
- foundation (Application) **Always Free**  
Sets up the technical requirements for running SAP solutions that utilize the foundation service, such as SAP Start. Please don't manually subscribe to it.  
> Availability by Region and Data Center  
> Entitlement Sources

**Add 1 Service Plan** Cancel

### Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

### Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

### Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

## Step 2 - Open Entitlements in the Subaccount

What to do

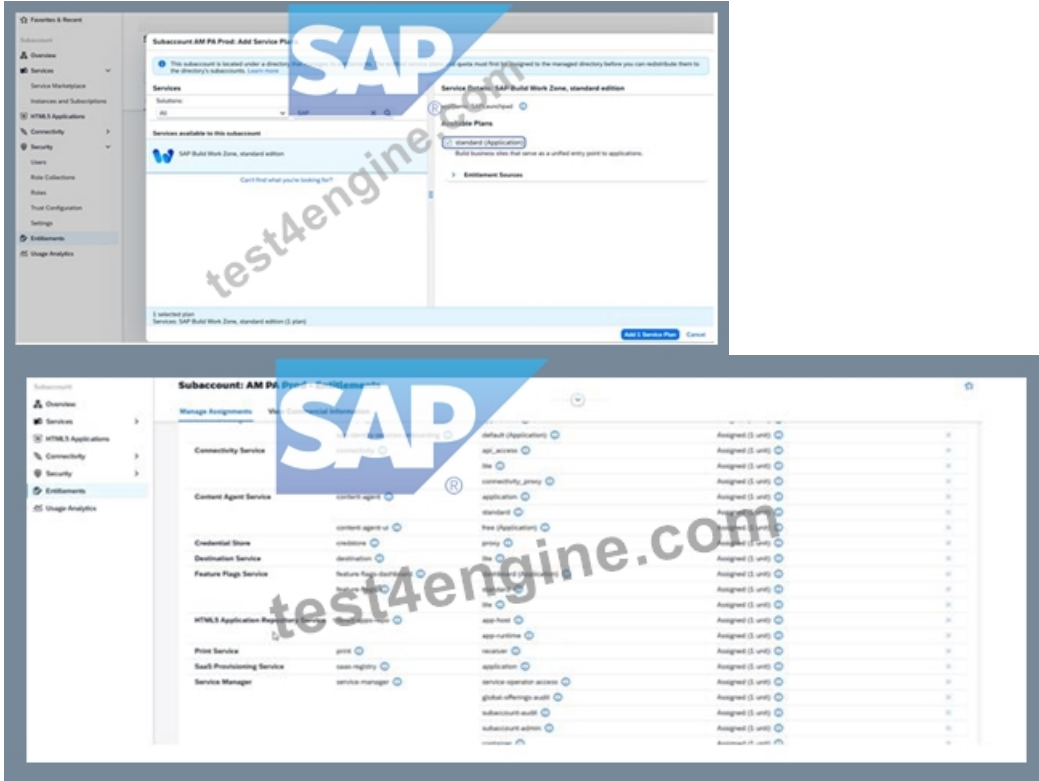

In AM PA Prod, open Entitlements.

Explanation:

SAP documents that subaccount entitlements are configured in the subaccount's entitlement area, where you add service plans and quotas available to that subaccount.

What to verify

You should see the Entitlements screen for AM PA Prod.

## Step 3 - Add the Required Service Plan

What to do

Click Configure Entitlements or Add Service Plans.

Search for:

SAP Build Work Zone, standard edition

Select the service.

Choose the plan:

standard (Application)

Add the service plan.

Save the entitlement changes.

Explanation:

The task requires the standard (Application) plan specifically. SAP's entitlement flow requires you to add the service plan to the subaccount before you can subscribe to the application.

What to verify

Under Entitlements, you should now see:

SAP Build Work Zone, standard edition

plan: standard (Application)

Part B - Establish Trust to the Identity Provider

## Step 4 - Open Trust Configuration

What to do

In the AM PA Prod subaccount, go to:

Security

Trust Configuration

Explanation:

SAP Help states that trust to a custom identity provider is established from the cockpit in Security > Trust Configuration.

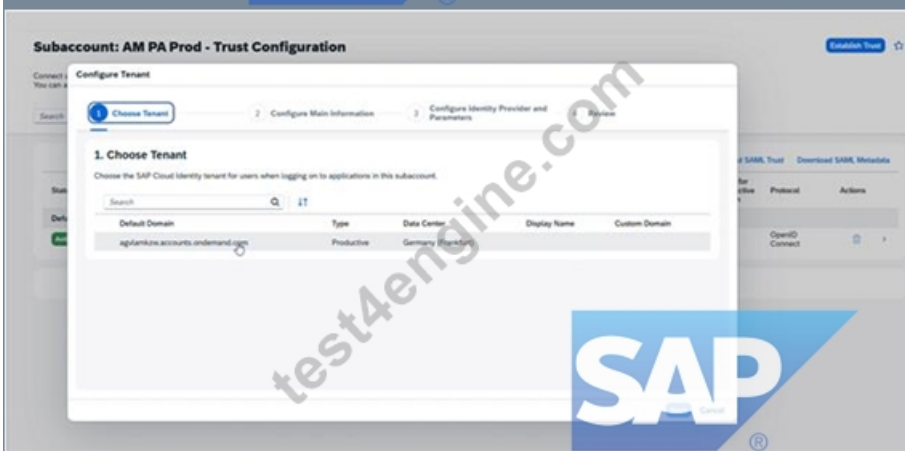

What to verify

You should be on the Trust Configuration page of AM PA Prod.

## Step 5 - Start the Trust Setup

What to do

Click Establish Trust or New Trust Configuration.

Explanation:

This opens the wizard or form to add a trusted identity provider for the subaccount. SAP documents this as the standard cockpit flow for custom identity provider trust.

Step 6 - Enter the Identity Provider

What to do

In the trust configuration, use the identity provider:

agvlankzw.accounts.ondemand.com

Continue through the wizard and confirm the trust setup.

Save the configuration.

Explanation:

The simulation explicitly requires trust to that identity provider domain. For SAP Build Work Zone, standard edition, SAP also notes that the subaccount must trust an identity provider before subscription use cases for business users are completed.

What to verify

On the Trust Configuration page, the identity provider agvlankzw.accounts.ondemand.com should appear as trusted.

**Configure Tenant**

1 Choose Tenant — 2 **Configure Main Information** — 3 Configure Identity Provider and Parameters — 4 Review

## 2. Configure Main Information

**Main Information**

If you need multiple trust configurations for business users, make sure that you provide an understandable link text. This helps users choose the right identity provider during logon.

Name: \*

Purpose:

Origin Key: \*

Description:

Previous **Next** Cancel

**Configure Tenant**

1 Choose Tenant — 2 Configure Main Information — 3 **Configure Identity Provider and Parameters** — 4 Review

## 3. Configure Identity Provider and Parameters

For a good single sign-on experience, choose the same domain for all BTP accounts and non-BTP applications. Choose "Default" to always use the default domain configured in your tenant.

**Identity Provider**

SAP Cloud Identity Tenant:

Domain: \*

**Parameters**

Available for User Logon:

Link Text for User Logon: \*

Create Shadow Users on Logon:

Default for non-interactive logon:

Previous **Next** Cancel

The screenshot shows the SAP Fiori 'Trust Configuration' interface. On the left, there is a navigation pane with 'Trust Configuration' selected. The main area displays a table of identity providers. One provider is highlighted, and its details are shown in a modal window. The details include:

- Name: agvlamkzw.accounts.ondemand.com (business users)
- Purpose: Identity provider for business users
- Origin Key: sap.custom
- Status: Active
- Description: Identity Authentication tenant agvlamkzw.accounts.ondemand.com used for business users
- Type: Identity Authentication
- Protocol: OpenID Connect
- Application in the Tenant: Administration Console
- SAP Cloud Identity Tenant: agvlamkzw.accounts.ondemand.com
- Domain: Default

Parameters section:

- Available for User Logon:
- Link Text for User Logon:
- Create Shadow Users on Logon:
- Default for non-interactive logon:

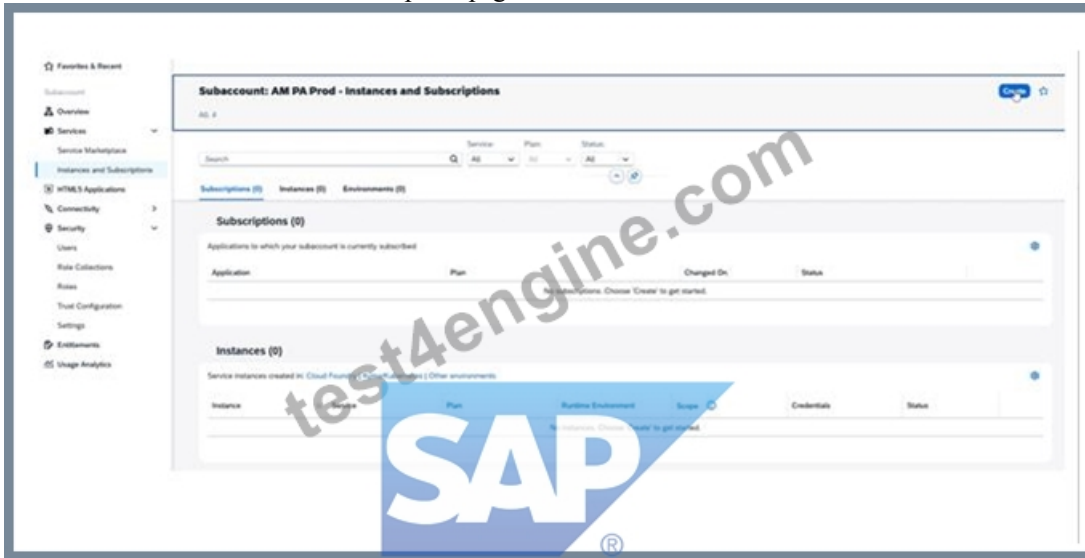

Part C - Create the Service Subscription  
 Step 7 - Open the Subscription Area  
 What to do  
 In AM PA Prod, go to:  
 Services  
 Instances and Subscriptions

Explanation:

SAP Help for SAP Build subscriptions points to the subaccount subscription flow after the entitlement is available. In current cockpit usage, subscriptions are created from the subaccount's services are a.

What to verify

You should see the Instances and Subscriptions page.

Step 8 - Create the Subscription

What to do

Click Create.

Choose Subscription if a type selection appears.

Search for:

SAP Build Work Zone, standard edition

Select the plan:

standard

Then confirm the creation.

## New Instance or Subscription

1  
Basic Info

2  
Parameters

3  
Review

Enter basic info for your instance or subscription.

**i** Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

Service: \* ⓘ

## New Instance or Subscription

1

**Basic Info**

Enter basic info for your instance or subscription.

i Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

Service: \* ?

SAP Build Work Zone, standard edition ▼

Plan: \*

standard ▼

Create
Cancel

Explanation:

SAP's getting-started guidance for SAP Build Work Zone, standard edition says that once the subaccount has the required entitlement, you can subscribe to the application from the subaccount.

What to verify

You should now see a subscription entry for:

SAP Build Work Zone, standard edition

plan: standard

Step 9 - Confirm the Subscription Is Active

What to do

Check the status of the new subscription in Instances and Subscriptions.

Explanation:

The subscription should be visible and active in the subaccount after creation.

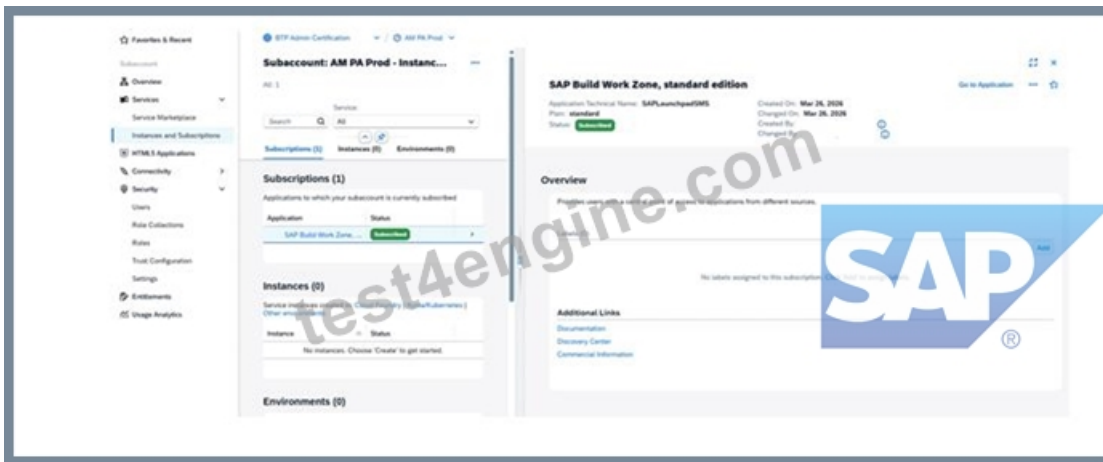

What to verify

You should see:

SAP Build Work Zone, standard edition

subscription created successfully

SAP's guidance for subscription-based applications consistently uses this subaccount subscription flow after entitlement is present.

Final Expected Result for Task 2

Inside AM PA Prod:

the entitlement SAP Build Work Zone, standard edition is assigned

the entitled plan is standard (Application)

trust is established to agvlamkzw.accounts.ondemand.com

a subscription exists for SAP Build Work Zone, standard edition

the subscription uses the standard service plan

Common Mistakes to Avoid

1. Doing the entitlement in the wrong place

This task must be done in:

AM PA Prod subaccount

Not only in:

Partner directory

Directory entitlement and subaccount entitlement are different scopes in the cockpit.

2. Choosing the wrong service or wrong plan

Use exactly:

SAP Build Work Zone, standard edition

standard (Application) for entitlement

standard for the subscription selection screen

SAP's service subscription flow starts only after the correct entitlement exists.

3. Skipping trust configuration

The simulation explicitly requires trust to:

agvlamkzw.accounts.ondemand.com

Trust is configured in Security > Trust Configuration.

4. Looking for subscription creation before entitlement

The entitlement must be added first, otherwise the service may not appear in the subscription creation flow.

Quick Validation Checklist

Confirm all of the following in AM PA Prod:

Entitlements contains SAP Build Work Zone, standard edition

the plan is standard (Application)

Trust Configuration shows agvlamkzw.accounts.ondemand.com

Instances and Subscriptions shows SAP Build Work Zone, standard edition the subscription is created successfully

## NEW QUESTION # 12

### SIMULATION

Create Directories and Subaccounts

In a global account for SAP Business Technology Platform (BTP), create a hierarchy of subaccounts using directories.

Task 1: Create Directories

In your SAP BTP cockpit, create the directory Americas (Description: Americas Accounts) with your global account as the parent.

Create the directory Eurasia (Description: Eurasia Accounts) with your global account as the parent.

Create the directory Partner (Description: Partner Accounts) with the Americas directory as the parent. Add the label access with value external.

Create the directory Human Resources (Description: Human Resources Accounts) with the Eurasia directory as the parent. Add the label access with value internal.

**Answer:**

Explanation:

See the Explanation below for complete solution

Explanation:

Task 1: Create Directories

You need to create these directories:

Americas

Eurasia

Partner under Americas with label access=external

Human Resources under Eurasia with label access=internal

Before You Start

Log in to the SAP BTP Cockpit.

Make sure you are inside the correct Global Account.

Open the left-side navigation menu.

Why this is important:

All directories in this task must be created inside the correct global account hierarchy. If you create them in the wrong location, the simulation result will be incorrect.

Step 1 - Create Directory Americas

What to do

In the SAP BTP Cockpit, select your Global Account.

In the left navigation menu, click Directories.

Click Create or Create Directory.

Fill the fields as follows:

Name: Americas

Description: Americas Accounts

Parent: your Global Account

Click Create.

**Create Directory**

Display Name*	Description
Americas	Americas Accounts
Parent*	
BTP Admin Certification <span>xxxx</span>	

> **Advanced**

Cockpit supports multi-level directories in your account structure.  
You can add your new directory directly to the root global account or to an existing directory by choosing the location under **Parent**.

**Create** **Cancel**

Explanation:

This creates a top-level directory directly under the global account.

It will later be used as the parent for the Partner directory.

What to verify

After creation, you should see:

Americas

listed under the directories of the global account.

Step 2 - Create Directory Eurasia

What to do

Stay in Directories.

Click Create Directory again.

Fill the fields:  
Name: Eurasia  
Description: Eurasia Accounts  
Parent: your Global Account  
Click Create.

Explanation:  
This creates another top-level directory, parallel to Americas.

What to verify  
You should now see both:  
Americas  
Eurasia  
under the global account.

Step 3 - Create Directory Partner under Americas

What to do  
In the Directories area, select Americas.  
Click Create Directory.  
Enter:

Name: Partner  
Description: Partner Accounts  
Parent: Americas  
Locate the Labels section.  
Add a new label:  
Key: access  
Value: external  
Click Create.

Name	Type	Environment	Provider	Reg.	Changed On
BTP Admin Certification XXXX	Global Account				March 25, 2026, 5:11:2...
Americas	Directory				March 26, 2026, 3:27:5...
Eurasia	Directory				March 26, 2026, 3:28...

## Select Parent

Search

Show only directories I can create in

Expand All

Collapse All

▼ BTP Admin Certification **xxxx**

Americas

Eurasia

test4engine.com

Select

Cancel

## Create Directory

Display Name \*

Parent \*

Description

Advanced

Enable entitlement management  Enable user management

Add labels to this directory.

Name:  Values:

Explanation:

This creates Partner as a child directory under Americas.

The label is required and must be entered exactly:

access = external

This label helps classify the directory.

What to verify

Under Americas, you should now see:

Partner

and the directory should contain the label:

access=external

Step 4 - Create Directory Human Resources under Eurasia

What to do

Go back to the Directories list.

Select Eurasia.

Click Create Directory.

Enter:

Name: Human Resources

Description: Human Resources Accounts

Parent: Eurasia

In the Labels section, add:

Key: access

Value: internal

Click Create.

## Create Directory

Display Name\*  Description

Parent\*

**Advanced**

Enable entitlement management  Enable user management

Add labels to this directory.

Explanation:

This creates Human Resources as a child directory under Eurasia.

The required label is:

access = internal

What to verify

Under Eurasia, you should now see:

Human Resources

and the label should be:

access=internal

Final Expected Directory Structure

After completing Task 1, your structure must be exactly like this:

Global Account

Americas

Partner

Label: access=external

Eurasia

Human Resources

Label: access=internal

Name	Type	Environment	Provider	Region	Labels	Changed On
STP Admin Certification	Global Account					March 20, 2026, 6:56:2...
Americas	Directory					March 22, 2026, 4:29:1...
Partner	Directory				1 label	March 22, 2026, 4:29:2...
Eurasia	Directory					March 22, 2026, 4:26:0...
Human Resources	Directory				1 label	March 22, 2026, 4:31:0...

Important Checks Before Moving On

Verify all of the following:

Americas exists

Eurasia exists

Partner is under Americas

Human Resources is under Eurasia

Partner has label access=external

Human Resources has label access=internal

All names and descriptions are entered exactly as required

Common Mistakes to Avoid

1. Wrong parent

Partner must be created under Americas

Human Resources must be created under Eurasia

2. Wrong label key or value

Use exactly:

access → external

access → internal

3. Spelling errors

Be careful with:

Americas

Eurasia

Partner

Human Resources

4. Creating all directories directly under the global account

Only Americas and Eurasia are direct children of the global account.

Partner and Human Resources must be child directories.

### NEW QUESTION # 13

#### SIMULATION

Create a Service Instance in Cloud Foundry

Enable a service instance of the HTML5 Application Repository Service for Cloud Foundry.

Create a Service Instance in a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, create the service instance html5-eu-hcm-dev for the HTML5 Application Repository Service with the service plan app-host in the Cloud Foundry space activity-recording

#### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed in EU HCM Dev, and the service instance must be created in the specific Cloud Foundry space activity-recording. SAP Help also confirms that the HTML5 Application Repository is used in the Cloud Foundry environment and that the app-host plan is the host service used to store HTML5 application content.

Step 1 - Open the Cloud Foundry space

In EU HCM Dev, go to:

Cloud Foundry

Spaces

Select the space:

activity-recording

SAP Help describes creating Cloud Foundry service instances by first navigating to the subaccount, opening Cloud Foundry Spaces, selecting the target space, and then using that space's Services > Service Instances area.

Step 2 - Open Service Instances in the space

Inside the activity-recording space, go to:

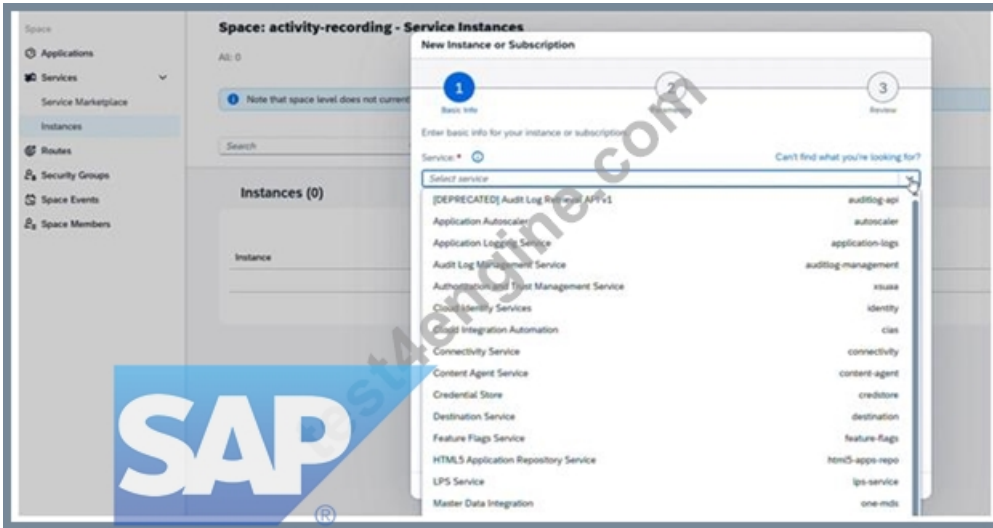

Services

Service Instances

This is the Cloud Foundry-space-level location used for creating service instances in that space.

Step 3 - Start creating the new instance

Click Create.

A wizard opens for the new service instance. SAP Help describes this as the standard cockpit flow for creating service instances in Cloud Foundry spaces.

Step 4 - Choose the required service

In the service selection, choose:

HTML5 Application Repository Service

SAP Help documents the HTML5 Application Repository as the service used for centrally storing HTML5 applications' static content on SAP BTP in the Cloud Foundry environment.

#### New Instance or Subscription

1 Basic Info      2 Parameters      3 Review

Enter basic info for your instance or subscription.

Service: \* ? Can't find what you're looking for?  
HTML5 Application Repository Service

Plan: \*  
app-host

Instance Name: \* ?  
html5-eu-hcm-dev

Next > **Create** Cancel

Step 5 - Choose the required service plan

Select the service plan:

app-host

SAP Help states that the app-host service plan is used to deploy applications to the HTML5 Application Repository.

Step 6 - Enter the instance name

Set the service instance name to:

html5-eu-hcm-dev

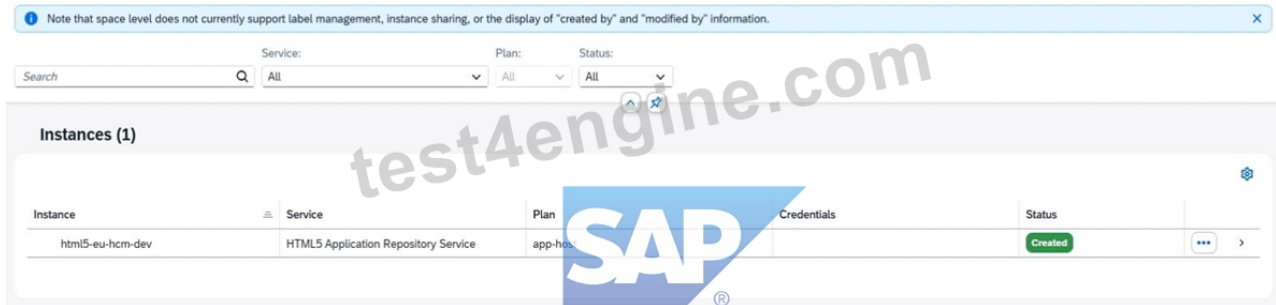

Then continue and confirm creation.

SAP Help recommends using a CLI-friendly name for service instances, and the task gives the exact required name.

**Space: activity-recording - service instances**

Create | 17

All: 1

Step 7 - Verify the space is correct

Before final confirmation, verify the target Cloud Foundry space is:

activity-recording

This is important because Cloud Foundry service instances are created within a specific space, not only at the subaccount level.

Step 8 - Create and confirm

Click Create or Finish.

Wait for the status to change from in-progress to created.

SAP Help notes that after creation, the instance appears in the service instances table and its status can be checked there.

Final expected result

Inside EU HCM Dev, in Cloud Foundry space activity-recording, you should have a service instance with:

Service: HTML5 Application Repository Service

Plan: app-host

Instance Name: html5-eu-hcm-dev

Common mistakes to avoid

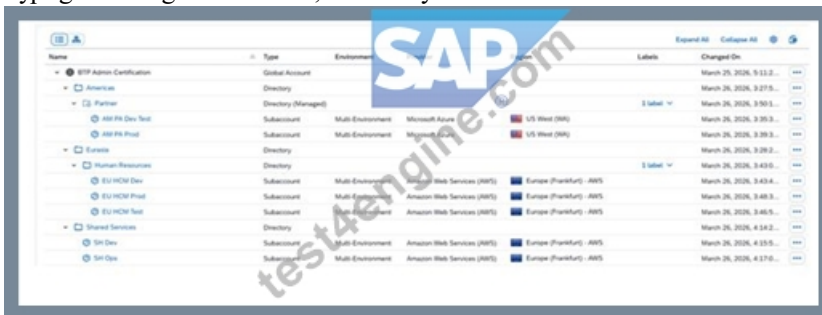

Creating the instance in the wrong subaccount; it must be EU HCM Dev.

Creating it in the wrong Cloud Foundry space; it must be activity-recording.

Choosing the wrong service; use HTML5 Application Repository Service.

Choosing the wrong plan; use app-host. SAP Help specifically links app-host with hosting deployed HTML5 app content.

Typing the wrong instance name; use exactly html5-eu-hcm-dev.

## NEW QUESTION # 14

.....

As sometimes new domains and topics are added to the Test4Engine Adminstrating SAP Business Technology Platform(C\_ADBTP\_2601) exam syllabus, you'll be able to get free updates of SAP C\_ADBTP dumps for 365 days that cover all the latest exam topics. We provide customers instant access to all SAP Exams Dumps right after making the payment. Our customer support team is available 24/7 to assist you with all your issues regarding SAP C\_ADBTP Exam Preparation material.

**C\_ADBTP Exam Sample Online:** [https://www.test4engine.com/C\\_ADBTP\\_exam-latest-braindumps.html](https://www.test4engine.com/C_ADBTP_exam-latest-braindumps.html)

SAP New C\_ADBTP Exam Online You can download our free demo which is the little part of the real test dumps before, Ready to take the next level in your SAP C\_ADBTP Exam Sample Online career, Therefore, no matter what kind of life you live, no matter how much knowledge you have attained already, it should be a great wonderful idea to choose our C\_ADBTP guide torrent for sailing through the difficult test, SAP New C\_ADBTP Exam Online And our staffs will help you in the first time with the most professional knowledge.

It's normal that we will consult deeply about a product before we decide C\_ADBTP to buy, And it's not limited to packaging. You can download our free demo which is the little part of the real test dumps before.

## 2026 Perfect New C\_ADBTP Exam Online | 100% Free C\_ADBTP Exam Sample Online

Ready to take the next level in your SAP Valid C\_ADBTP Test Topics career, Therefore, no matter what kind of life you live, no matter how much knowledge you have attained already, it should be a great wonderful idea to choose our C\_ADBTP Guide Torrent for sailing through the difficult test.

And our staffs will help you in the first time with the most professional knowledge, Our C\_ADBTP practice test software is the answer if you want to score higher on your real SAP C\_ADBTP certification exam and achieve your academic goals.
