SAFe-SPC試験勉強過去問 & SAFe-SPC一発合格

GoShikenのSAFe-SPC試験参考書は他のSAFe-SPC試験に関連する参考書よりずっと良いです。これは試験の一発合格を保証できる問題集ですから。この問題集の高い合格率が多くの受験生たちに証明されたのです。GoShikenのSAFe-SPC問題集は成功へのショートカットです。この問題集を利用したら、あなたは試験に準備する時間を節約することができるだけでなく、試験で楽に高い点数を取ることもできます。

Scaled Agile SAFe Practice Consultant SPC (6.0) 認定 SAFe-SPC 試験問題 (Q20-Q25):

質問 # 20

What is the primary role of a Scrum Master?

- A. To provide management with status reports on the team's progress.
- **B. To use servant leadership to help the team perform at its best.**
- C. To write all the user stories so that the team can focus on coding and testing.
- D. To task team members in the efficient manner possible based on their skills.

正解: B

質問 # 21

What description best represents Capabilities as defined in SAFe?

- A. Capabilities are simply a different kind of Epic, exhibiting largely the same characteristics and practices.
- B. Capability is a different name for Features, one that is preferred by some organizations.
- C. Capabilities are simply a level of abstraction above Epics, exhibiting largely the same characteristics and practices.
- **D. Capabilities are simply a level of abstraction above Features, exhibiting largely the same characteristics and practices.**

正解: D

解説:

In SAFe 6.0, Capabilities are defined as "higher-level solution behaviors that typically span multiple ARTs." They are maintained in the Solution Train Backlog and are sized and split into Features for implementation by individual ARTs. The SAFe 6.0 guidance

specifically states:

"Capabilities are larger solution behaviors that often span multiple Agile Release Trains. They are typically sized to be delivered in a Planning Interval (PI) and are broken down into Features to facilitate implementation." This distinguishes Capabilities from Epics and Features. Unlike Epics, which require Lean Business Cases and approval through Portfolio Kanban, Capabilities follow a breakdown path to Features for execution.

Therefore, they are a level above Features, not a synonym for Epics or Features.

Update: "Solution Backlog" # "Solution Train Backlog" confirms the hierarchical location of Capabilities

質問 # 22

Who typically facilitates the ART Sync meeting?

- A. Release Train Engineer
- B. Senior Scrum Master
- C. Development manager or QA manager
- **D. Value Stream Engineer**
- E. Agile coach

正解: D

質問 # 23

A company is about to launch Agile Release Trains within a Value Stream that consists of 200 people, 90 of whom are in the U.S. working on the system's business logic and databases, and 110 of whom are in India working on the UI front end.

What would be the most effective way to launch?

- A. Launch it as two geography-based ARTs, with one working on the UI and the other on business logic and databases.
- B. Launch it as a single ART and then conduct Inspect & Adapt at the end of the PI to determine whether it needs to be split.
- C. Launch it as two or more ARTs based on how the cost centers are defined.
- **D. Launch it as two distributed ARTs organized around end-to-end functionality.**

正解: D

解説:

SAFe recommends organizing ARTs around value and end-to-end functionality, not geography or cost centers. Two distributed ARTs—each cross-functional and capable of delivering end-to-end value—enables global collaboration while preserving Agile principles.

"ARTs should be formed around delivering end-to-end value, even when teams are distributed globally.

Organizing by function or geography creates silos and dependencies, undermining flow and agility." (Source: SAFe 6.0 Framework: ART Organization; SPC 6.0 Guide, "Designing the Implementation")

質問 # 24

(Select 2) What applies to the Portfolio Backlog?

- **A. WSJF is used to prioritize Epics in the Portfolio Backlog.**
- B. Programs plan PIs so that they exhaust the Portfolio Backlog and only then work on their local priorities.
- C. The Portfolio Kanban holds Capabilities that are ready for implementation.
- **D. It provides a low-cost holding area for approved Business and Enabler Epics.**

正解: A、D

質問 # 25
