Now passing DevOps-Foundation exam is not easy, so choosing a good training tool is a guarantee of success to get the DevOps-Foundation certificate. If you choose our DevOps-Foundation exam materials, we will free update within one year after you purchase. That is to say we can ensure that we will provide you with exam information and exam practice questions and answers immediately. It can let you be fully prepared for exam, and almost have 100% pass rate of DevOps-Foundation Exam. We can not only allow you for the first time to participate in DevOps-Foundation exam to pass it successfully, but also help you save a lot of valuable. Don't miss such a good opportunity because of your hesitation.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.
Topic 2	<ul style="list-style-type: none"> Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Topic 3	<ul style="list-style-type: none"> Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.
Topic 4	<ul style="list-style-type: none"> Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.

Topic 5	<ul style="list-style-type: none"> Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 6	<ul style="list-style-type: none"> Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.
Topic 7	<ul style="list-style-type: none"> Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.

Reliable DevOps-Foundation Braindumps | Exam DevOps-Foundation Course

With years of experience in the field, Itbraindumps are always striving hard to provide customers with genuine PeopleCert DevOps Foundation v3.6 Exam (DevOps-Foundation) exam dumps so that they crack their PeopleCert DevOps Foundation v3.6 Exam (DevOps-Foundation) exam in less time. Itbraindumps also offer the best self-assessment software so besides memorizing DevOps-Foundation Exam Questions, applicants put their learning to the test and reduce their chances of failure in the real PeopleCert DevOps Foundation v3.6 Exam (DevOps-Foundation) examination.

Peoplecert PeopleCert DevOps Foundation v3.6 Exam Sample Questions (Q63-Q68):

NEW QUESTION # 63

Who are the PRIMARY stakeholders for DevOps?

- A. Business representatives
- B. All of the Above
- C. Software engineers and operational teams
- D. Security and QA testers

Answer: B

Explanation:

In DevOps, success depends on collaboration between all key stakeholders across the software delivery value stream. This includes:

* Software Engineers & Operations Teams: Responsible for designing, building, deploying, and maintaining applications and services.

* Business Representatives: Define requirements, prioritize work, and ensure alignment with organizational goals.

* Security and QA Testers: Ensure that quality, compliance, and security are built into the delivery pipeline from the start (shift-left approach).

PeopleCert emphasizes the idea of "BizDevOps" and "DevSecOps," highlighting the need for business, development, operations, and security to work as an integrated team. The removal of silos and the inclusion of all perspectives ensure that value is delivered faster and more reliably, while maintaining quality and compliance.

Choosing only one group would miss the cross-functional nature of DevOps. Hence, the correct answer is D - All of the Above.

NEW QUESTION # 64

Which of the following metrics relates to The Third Way?

- A. Change lead times
- B. Change cycle times
- C. Change fail rate
- **D. Hypothesis or experiments log**

Answer: D

Explanation:

The Third Way in DevOps emphasizes continuous learning and experimentation. It's about fostering a culture where teams test hypotheses, take calculated risks, and learn from both successes and failures.

A hypothesis or experiments log directly supports this principle by capturing:

- * The changes or experiments attempted
- * The hypothesis behind them
- * The results and insights gained

Metrics like A, B, and C are more aligned with the First Way (flow) and Second Way (feedback). They measure speed and stability but not the experimental learning process itself.

By tracking experiments, organizations can make data-driven decisions, reinforce a learning culture, and continuously refine practices-core aspects of the Third Way.

NEW QUESTION # 65

Which of the following does NOT make DevOps important now?

- A. Enterprises have young, nimble start-up competitors
- B. Time to value must accelerate
- **C. IT must continue to operate in a silo culture**
- D. Consumers have "app" mentalities and expectations

Answer: C

Explanation:

The urgency for DevOps adoption is driven by increasing market competition, evolving customer expectations, and the need for rapid delivery of value.

* B: Nimble start-ups often deliver faster and more innovatively, putting pressure on established enterprises.

* C: Customers expect continuous improvement and seamless digital experiences ("app mentality").

* D: Reducing time-to-value is essential for staying competitive and meeting business demands.

However, A describes a siloed culture-something DevOps actively works to eliminate, not a reason for its importance. In fact, remaining siloed is an obstacle to achieving DevOps benefits, not a driver for adoption.

Therefore, A is the correct "NOT" choice.

NEW QUESTION # 66

Which of the following sets of skills are essential for a DevOps professional?

- A. Business, Agile, ITSM, Lean and networking
- B. Business, development, cloud and containers, core skills
- C. Business, Agile, infrastructure, communication
- **D. Business, technical, core (soft) skills, self-management**

Answer: D

Explanation:

A DevOps professional needs:

Business skills: Understanding the business context and value.

Technical skills: Automation, coding, cloud, infrastructure.

Core (soft) skills: Collaboration, communication, empathy, learning.

Self-management: Time, priorities, feedback.

Other options miss the full blend or focus too much on tech or process.

Extract-style reference:

"DevOps success requires a blend of business, technical, and core (soft) skills, as well as the ability to self-manage and continuously learn."

- DevOps Handbook; Accelerate

PeopleCert DevOps Foundation v3.6: Holistic skillsets are emphasized for cross-functional teams.

NEW QUESTION # 67

Which of the following is NOT a characteristic of DevOps?

- A. World-class stability, reliability, availability and security
- B. Fast flow of unplanned work into production
- C. Working towards a common goal
- D. Ensuring overall organizational success

Answer: B

Explanation:

A fast flow of unplanned work into production is not a characteristic of DevOps. In fact, DevOps practices strive to minimize unplanned work (like emergency changes or outages) through automation, testing, collaboration, and rigorous change control. The other options—ensuring organizational success, working toward a common goal, and world-class stability/reliability—are all key DevOps characteristics.
