Trend Deep-Security-Professional Exam Prep Solutions

Failure makes people depressed especially for working engineers. If your test score effects your work and you make mistakes, it is

lost than gained. The best method for working people is to purchase valid Trend Deep-Security-Professional test questions and answers. It only takes you a little money to solve a big difficult for you. Also once you pass this subject, the certification is coming to you. Our passing rate of Deep-Security-Professional Test Questions and answers is normally 100% just one shot. It is worth buying.

Becoming a Trend Micro Certified Professional for Deep Security is an excellent way for IT professionals to advance their careers in the cybersecurity industry. Trend Micro Certified Professional for Deep Security certification demonstrates to employers and clients that the individual has the necessary skills and knowledge to implement and manage Trend Micro's Deep Security solution effectively. Additionally, this certification provides individuals with access to exclusive resources and support from Trend Micro, which can help them stay up-to-date with the latest trends and developments in the cybersecurity field.

Trend Micro Certified Professional for Deep Security Sample Questions (Q34-Q39):

NEW QUESTION # 34

How can you prevent a file from being scanned for malware?

- A. Edit the "Scan Exclusions" section of the dsa.properties configuration file on the Deep Security Agent computer to include the file name. Save the configuration file and restart the Deep Security Agent service.
- **B. Add the file to the Exclusions list in the Malware Scan Configuration.**
- C. Enable "File Types scanned by IntelliScan" in the Malware Scan Configuration properties in the Deep Security Manager Web console. Click "Scan All Except" and type the filename to exclude from the scan.
- D. Add the file to the Exclusions list in the "Allowed Spyware/Grayware Configuration".

Answer: B

NEW QUESTION # 35

Which of the following statements is true regarding Intrusion Prevention protection?

- **A. Intrusion Prevention protection can drop or reset a connection.**
- B. Intrusion Prevention protection only works in conjunction with the Anti-Malware Protection Module.
- C. Intrusion Prevention protection can only work on computers where a Deep Security Agent is installed; agentless protection is not supported.
- D. Intrusion Prevention protection can drop malicious packets but cannot reset the connection.

Answer: A

NEW QUESTION # 36

Which of the following correctly describes the Firewall rule Action of Force Allow?

- A. Force Allow explicitly allows traffic that matches the Firewall rule to pass, and implicitly denies all other traffic.
- B. Force Allow permits traffic to bypass analysis by all Deep Security Protection Modules.
- **C. Force Allow permits traffic that would otherwise be denied by other Firewall rules to pass, but still enforces filtering by the Intrusion Prevention Protection Module.**
- D. Force Allow permits traffic to bypass analysis by both the Firewall and Intrusion Prevention Protection Modules.

Answer: C

NEW QUESTION # 37

A collection of servers protected by Deep Security do not have Internet access. How can Smart Scan be used on these computers.

- A. Smart Scan must contact the Smart Protection Network to function. Any servers without Internet access will be unable to use Smart Scan.
- B. Smart Scan can be configured to use a local pattern file containing the same information as the Smart Protection Network.
- **C. Install a Smart Protection Server in the environment and set it as the source for File Reputation information.**
- D. Promote one of the Deep Security Agents on the air gapped computers to become a Re-lay.

Answer: C

Explanation:
Agent-airgapped

NEW QUESTION # 38

Which of the following statements is true regarding Firewall Rules?

- A. Firewall Rules applied through a parent-level Policy cannot be unassigned in a child-level policy.
- B. Firewall Rules applied to Policy supersede similar rules applied to individual computers.
- C. When traffic is intercepted by the network filter, Firewall Rules in the policy are always applied before any other processing is done.
- D. Firewall Rules are always processed in the order in which they appear in the rule list, as displayed in the Deep Security manager Web console.

Answer: A
