**Answer: A**

#### NEW QUESTION # 18

Which of the following tasks can you perform using the SAP Application Interface Framework?

Note: There are 3 correct answers to this question.

- A. Correct data directly without special authorization
- B. View a message summary based on the interface
- C. Change the color of a message status
- D. Navigate from an error message to the associated SAP transaction code
- E. Change the name of a field

**Answer: C,D,E**

Explanation:

Detailed Explanation: The SAP Application Interface Framework (AIF) is designed to handle errors in data integration between systems, especially in the Central Finance context. It allows users to change field names and adjust message status colors to provide clarity during error handling. Additionally, users can navigate from error messages directly to related SAP transaction codes, facilitating error correction. These functionalities enhance user interaction and efficiency in troubleshooting data replication issues.

#### NEW QUESTION # 19

Which of the following SAP System Landscape Transformation (SLT) staging tables should be populated to connect third-party legacy systems to the Central Finance system?
