The society has an abundance of capable people and there is a keen competition. Don't you feel a lot of pressure? No matter how high your qualifications, it does not mean your strength forever. Qualifications is just a stepping stone, and strength is the cornerstone which can secure your status. Juniper JN0-253 certification exam is a popular IT certification, and many people want to have it. With it you can secure your career. TroytecDumps's Juniper JN0-253 Exam Training materials is a good training tool. It can help you pass the exam successfully. With this certification, you will get international recognition and acceptance. Then you no longer need to worry about being fired by your boss.

Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.
Topic 2	<ul style="list-style-type: none">Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.
Topic 3	<ul style="list-style-type: none">Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.
Topic 4	<ul style="list-style-type: none">Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.

Test JN0-253 Dumps Pdf, JN0-253 Trustworthy Exam Content

Thanks to modern technology, learning online gives people access to a wider range of knowledge, and people have got used to convenience of electronic equipment. As you can see, we are selling our JN0-253 learning guide in the international market, thus there are three different versions of our JN0-253 exam materials which are prepared to cater the different demands of various people. We can guarantee that our JN0-253 Exam Materials are the best reviewing material. Concentrated all our energies on the study JN0-253 learning guide we never change the goal of helping candidates pass the exam. Our JN0-253 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our JN0-253 exam materials, and you won't be regret.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q88-Q93):

NEW QUESTION # 88

What are device-specific WAN Edge templates used for in an SD-WAN configuration?

- A. To monitor network events and stop attacks
- B. To automate the WLAN template process
- C. To automatically generate configuration elements specific to device models
- D. To perform traffic inspection for WAN edge devices

Answer: C

Explanation:

In the Juniper Mist SD-WAN solution, device-specific WAN Edge templates are used to streamline the deployment and configuration of Juniper SRX or SSR (Session Smart Router) devices serving as WAN Edge nodes. These templates ensure consistent and accurate configurations across a distributed WAN environment while accounting for differences in hardware models and interface types.

According to the Juniper Mist WAN Assurance and SD-WAN Configuration Guide, device-specific templates:

"Automatically generate configuration elements tailored to the hardware platform, including interfaces, ports, and device capabilities."

They are part of Mist's cloud-managed SD-WAN automation framework, which combines WAN Assurance and AI-driven insights to manage branch connectivity. The templates simplify provisioning by populating device-level parameters such as:

- * Interface naming and mapping based on the device model.
- * Hardware-specific configurations like tunnel endpoints, IP addressing, and routing settings.
- * Security and performance policies consistent with the organization's SD-WAN design.

Options A, C, and D are incorrect because:

- * A (WLAN template automation) pertains to wireless network configuration, not WAN edge devices.
- * C (traffic inspection) relates to firewall or security policies handled by SRX's UTM features, not templates.
- * D (monitoring and attack prevention) falls under Mist's security or analytics capabilities, not the template function.

Therefore, the correct answer is B. To automatically generate configuration elements specific to device models.

NEW QUESTION # 89

Which two statements correctly describe Mist single sign-on (SSO)? (Choose two.)

- A. Mist administrative logins can use SSO.
- B. Mist administrative logins cannot use SSO.
- C. Guest user access can use SSO.
- D. Guest user access cannot use SSO.

Answer: A,C

Explanation:

SSO can be implemented for guest user access, allowing them to authenticate through their existing enterprise identity provider (IdP) instead of creating separate accounts for the Mist network.

Mist supports SSO for administrative logins, enabling IT administrators to use their existing corporate credentials (e.g., Active Directory) to access the Mist cloud management platform.

NEW QUESTION # 90

Referring to the exhibit, which two statements are correct? (Choose two.)

- A. You will need to log in to Mist every 60 minutes as long as you are viewing this organization.
- B. To stay logged in, you will need to perform an action in Mist every 10 minutes as long as you are viewing this organization.
- C. To stay logged in, you will need to perform an action in Mist every 10 minutes regardless of which organization you are viewing.
- D. You will need to log in to Mist every 60 minutes regardless of which organization you are viewing.

Answer: C,D

Explanation:

Session Timeout (60 minutes):

This timeout applies globally, meaning you will be logged out of Mist after 60 minutes of continuous session time, regardless of which organization you are working in.

Inactivity Timeout (10 minutes):

If there is no user activity for 10 minutes, you will be logged out automatically. This also applies globally, regardless of the organization being accessed.

NEW QUESTION # 91

Which statement is correct when a subscription expires?

- A. The devices become inactive and unreachable through the Mist management GUI.
- B. The devices remain operational, but the Mist management GUI functionality related to expired subscriptions is hidden from the user.
- C. The devices remain operational, but you are not allowed to manage the devices using the Mist management GUI.
- D. The devices remain operational, and all functionality remains available for a one-year grace period.

Answer: C

Explanation:

When a Mist subscription expires, the devices associated with that subscription continue to operate normally, ensuring there is no immediate disruption to network operations. However, management capabilities through the Mist management GUI are restricted. This means that while the devices remain functional, you cannot make configuration changes, monitor, or manage them using the Mist management interface until the subscription is renewed. This restriction emphasizes the importance of maintaining active subscriptions for full access to Mist's management features.

NEW QUESTION # 92

Mist cloud supports single sign-on in which two scenarios? (Choose two.)

- A. Wi-Fi guest login access
- B. admin login to the Mist portal
- C. account login used for the RESTful API
- D. account login used for NETCONF

Answer: C,D

NEW QUESTION # 93

.....

TroytecDumps Mist AI, Associate (JNCIA-MistAI) (JN0-253) PDF exam questions file is portable and accessible on laptops, tablets, and smartphones. This pdf contains test questions compiled by experts. Answers to these pdf questions are correct and cover each section of the examination. You can even use this format of Mist AI, Associate (JNCIA-MistAI) questions without restrictions of place and time. This Juniper JN0-253 PdfFormat is printable to read real questions manually. We update our pdf questions collection regularly to match the updates of the Juniper JN0-253 real exam.
