SPLK-1002 Test King - SPLK-1002 Exam Test

TrainingDump are stable and reliable exam questions provider for person who need them for their exam. We have been staying and growing in the market for a long time, and we will be here all the time, because the excellent quality and high pass rate of our [SPLK-1002 Exam Questions](#). As for the safe environment and effective product, there are thousands of candidates are willing to choose our SPLK-1002 study question, why don't you have a try for our study question, never let you down!

Splunk Core Certified Power User Exam Sample Questions (Q109-Q114):

NEW QUESTION # 109

Which of the following searches would return a report of sales by product-name?

- A. stats sum(price) as sales over product_name
- B. timechart list(sales), values(product_name)
- C. chart sum(price) as sales by product_name
- D. chart sales by product_name

Answer: A

NEW QUESTION # 110

Which of the following is one of the pre-configured data models included in the Splunk Common Information Model (CIM) add-on?

- A. Authentication
- B. Access
- C. Authorization
- D. Accounting

Answer: A

NEW QUESTION # 111

When using the transaction command, what does the argument maxspan do?

- A. Sets the maximum length that any single event can reach to be included in the transaction.
- B. Sets the maximum length of all events within a transaction.
- C. Sets the maximum total time between events in a transaction.
- D. Sets the maximum total time between the earliest and latest events in a transaction.

Answer: D

Explanation:

P.S. Free & New SPLK-1002 dumps are available on Google Drive shared by Braindumpsqa: <https://drive.google.com/open?id=1PduPSAZbJmtSAAwbKDSNPyez3TwwfRQIh>

Our professional experts are very excellent on the compiling the content of the SPLK-1002 exam questions and design the displays. Moreover, they impart you information in the format of the SPLK-1002 questions and answers that is actually the format of your real certification test. Hence not only you get the required knowledge, but also you find the opportunity to practice real exam scenario. We have three versions of the SPLK-1002 Training Materials: the PDF, Software and APP online. And the Software version can simulate the real exam.

As we all know, the influence of SPLK-1002 exam guides even have been extended to all professions and trades in recent years. Passing the SPLK-1002 exam is not only for obtaining a paper certification, but also for a proof of your ability. Most people regard Splunk certification as a threshold in this industry, therefore, for your convenience, we are fully equipped with a professional team with specialized experts to study and design the most applicable SPLK-1002 Exam prepare. We have organized a team to research and study question patterns pointing towards various learners.

100% Pass Splunk - SPLK-1002 - Splunk Core Certified Power User Exam – Reliable Exam Reviews

We promise you that if you fail to pass the exam in your first attempt after using SPLK-1002 training materials of us, we will give you full refund. And we are also pass guarantee and money back guarantee. In addition, SPLK-1002 exam dumps are edited by skilled experts, and they are quite familiar with the exam center, therefore, if you choose us, you can know the latest information for the exam timely. We provide you with free update for 365 days for SPLK-1002 Exam Training materials and the update version will be sent to your email address automatically.

Splunk Core Certified Power User Exam Sample Questions (Q253-Q258):

NEW QUESTION # 253

What is the relationship between data models and pivots?

- A. Pivots and data models have no relationship.
- B. Pivots and data models are the same thing.
- C. Pivots provide the datasets for data models.
- **D. Data models provide the datasets for pivots.**

Answer: D

Explanation:

The relationship between data models and pivots is that data models provide the datasets for pivots. Data models are collections of datasets that represent your data in a structured and hierarchical way. Data models define how your data is organized into objects and fields. Pivots are user interfaces that allow you to create data visualizations that present different aspects of a data model. Pivots let you select options from menus and forms to create charts, tables, maps, etc., without writing any SPL code. Pivots use datasets from data models as their source of data. Pivots and data models are not the same thing, as pivots are tools for visualizing data models. Pivots do not provide datasets for data models, but rather use them as inputs. Therefore, only statement A is true about the relationship between data models and pivots.

NEW QUESTION # 254

When creating a data model, which root dataset requires at least one constraint?

- **A. Root event dataset**
- B. Root child dataset
- C. Root transaction dataset
- D. Root search dataset

Answer: A

Explanation:

The correct answer is B. Root event dataset. This is because root event datasets are defined by a constraint that filters out events that are not relevant to the dataset. A constraint for a root event dataset is a simple search that returns a fairly wide range of data, such as `sourcetype=access_combined`. Without a constraint, a root event dataset would include all the events in the index, which is not useful for data modeling. You can learn more about how to design data models and add root event datasets from the Splunk documentation¹. The other options are incorrect because root transaction datasets and root search datasets have different ways of defining their datasets, such as transaction definitions or complex searches, and root child datasets are not a valid type of root dataset.

NEW QUESTION # 255

What commands can be used to group events from one or more data sources?

- A. eval, coalesce
- B. stats, format
- C. top, rare
- **D. transaction, stats**

Answer: D

Explanation:

The transaction and stats commands are two ways to group events from one or more data sources based on common fields or time

ranges. The transaction command creates a single event out of a group of related events, while the stats command calculates summary statistics over a group of events. The eval and coalesce commands are used to create or combine fields, not to group events. The format command is used to format the results of a subsearch, not to group events. The top and rare commands are used to rank the most or least common values of a field, not to group events.

1: Splunk Core Certified Power User Track, page 9. 2: Splunk Documentation, transaction command. 3: Splunk Documentation, stats command.

NEW QUESTION # 256

After manually editing a regular expression (regex), which of the following statements is true?

- A. Changes made manually can be reverted in the Field Extractor (FX) UI.
- B. It is not possible to manually edit a regular expression (regex) that was created using the Field Extractor (FX) UI.
- C. It is no longer possible to edit the field extraction in the Field Extractor (FX) UI.
- D. The Field Extractor (FX) UI keeps its own version of the field extraction in addition to the one that was manually edited.

Answer: C

Explanation:

Explanation

After manually editing a regular expression (regex) that was created using the Field Extractor (FX) UI, it is no longer possible to edit the field extraction in the FX UI. The FX UI is a tool that helps you extract fields from your data using delimiters or regular expressions. The FX UI can generate a regex for you based on your selection of sample values or you can enter your own regex in the FX UI. However, if you edit the regex manually in the props.conf file, the FX UI will not be able to recognize the changes and will not let you edit the field extraction in the FX UI anymore. You will have to use the props.conf file to make any further changes to the field extraction. Changes made manually cannot be reverted in the FX UI, as the FX UI does not keep track of the changes made in the props.conf file. It is possible to manually edit a regex that was created using the FX UI, as long as you do it in the props.conf file.

Therefore, only statement B is true about manually editing a regex.

NEW QUESTION # 257

Based on the macro definition shown below, what is the correct way to execute the macro in a search string?

- A. Convert_sales (euro, €, .79)
- B. Convert_sales (\$euro, \$€\$,S,79\$)
- C. Convert_sales (\$euro,\$€\$,s79\$)
- D. Convert_sales (euro, €, 79)"

Answer: A

NEW QUESTION # 258

.....

We talked with a lot of users about our SPLK-1002 practice engine, so we are very clear what you want. For the needs of users, our SPLK-1002 exam braindumps are constantly improving. You know that the users of our SPLK-1002 training materials come from all over the world. And our SPLK-1002 Exam Questions are easy to be understood. For our professional experts have simplified the content and language of the SPLK-1002 preparation quiz, so it is global.
