

# Juniper - JN0-351–Efficient Valid Exam Camp

BTW, DOWNLOAD part of PDFVCE JN0-351 dumps from Cloud Storage: [https://drive.google.com/open?id=1ISZm4iSQnBTt7q0GLADs\\_hQOvGoV7uuk](https://drive.google.com/open?id=1ISZm4iSQnBTt7q0GLADs_hQOvGoV7uuk)

PDFVCE makes your investment 100% secure when you purchase JN0-351 practice exams. We guarantee your success in the JN0-351 exam. Otherwise, our full refund policy will enable you to get your money back. The practice exams for JNCIS-ENT are prepared by the JN0-351 subject experts who are well aware of the JN0-351 exam syllabus requirements. Our Customer support team is 24/7 available that you can reach through email or Live Chat for any JN0-351 exam preparation product related question.

## Juniper JN0-351 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Layer 2 Security: This topic introduces Layer 2 protection mechanisms and firewall filters to fortify network security. Practical skills in configuring, monitoring, and troubleshooting these features prepare candidates to address exam objectives and real-world challenges effectively.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>OSPF: The concepts and operational details of OSPF are explored, providing tools for routing efficiency. Configuration and troubleshooting mastery ensure readiness for both the exam and complex enterprise environments.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Layer 2 Switching or VLANs: This topic deepens the understanding of Layer 2 switching operations within the Junos OS, including VLAN concepts and benefits. Experienced networking professionals gain insights into configuration, monitoring, and troubleshooting techniques essential for network segmentation and efficiency.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Spanning Tree: Networking professionals explore the principles and advantages of the Spanning Tree Protocol (STP) to ensure loop-free topologies in Layer 2 networks.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Tunnels: The fundamentals of IP tunneling are emphasized, highlighting their requirements and functionalities. Mastery in configuring, monitoring, and troubleshooting tunnels equips professionals to meet the demands of the JN0-351 Exam.</li></ul>

**100% Pass Quiz Juniper - Accurate Valid JN0-351 Exam Camp**

You may feel astonished and doubtful about this figure; but we do make our JN0-351 exam dumps well received by most customers. Better still, the 98-99% pass rate has helped most of the candidates get the certification successfully, which is far beyond that of others in this field. In recent years, supported by our professional expert team, our JN0-351 test braindumps have grown up and have made huge progress. Our JN0-351 Exam Dumps strive for providing you a comfortable study platform and continuously explore more functions to meet every customer's requirements. We may foresee the prosperous talent market with more and more workers attempting to reach a high level through the Juniper certification.

## Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q57-Q62):

### NEW QUESTION # 57

What is the default keepalive time for BGP?

- A. 60 seconds
- **B. 30 seconds**
- C. 10 seconds
- D. 90 seconds

**Answer: B**

Explanation:

Default BGP keepalive timer in Junos is 30 seconds

The default keepalive time for BGP is 30 seconds, which means that BGP peers send keepalive messages to each other every 30 seconds to verify the liveness of the BGP session. If no keepalive message is received from a peer within the hold time, which is 90 seconds by default, the peer is considered to be unavailable and the BGP session is closed. The keepalive time and the hold time can be configured manually for each BGP peer or peer group, but they must match on both ends of the BGP session. The keepalive time should be one third of the hold time for optimal performance. Therefore, option C is correct and the other options are incorrect.

### NEW QUESTION # 58

Exhibit

You are troubleshooting an issue where traffic to 192.168.10.0/24 is being sent to R1 instead of your desired path through R2. Referring to the exhibit, what is the reason for the problem?

- A. R2 's route is not the best path due to loop prevention.
- B. R2 's route is not the best path due to a lower origin code.
- **C. R1 's route is the best path due to a higher local preference**
- D. R1 's route is the best path due to the shorter AS path.

**Answer: C**

Explanation:

\* The exhibit shows the output of the command `show ip bgp`, which displays information about the BGP routes in the routing table 1. The output shows two routes for the destination 192.168.10.0/24, one from R1 and one from R2.

\* The route from R1 has a local preference of 200, while the route from R2 has a local preference of 100. Local preference is a BGP attribute that indicates the degree of preference for a route within an autonomous system (AS) 2. A higher local preference means a more preferred route 2.

\* BGP uses a best path selection algorithm to choose the best route for each destination among multiple paths. The algorithm compares different attributes of the routes in a specific order of precedence 3. The first attribute that is compared is weight, which is a Cisco-specific attribute that is local to the router 3. If the weight is equal or not set, the next attribute that is compared is local preference 3.

\* In this case, both routes have the same weight of 0, which means that they are learned from external BGP (eBGP) peers 3. Therefore, the next attribute that is compared is local preference. Since R1's route has a higher local preference than R2's route, it is chosen as the best path and installed in the routing table 3. The other attributes, such as origin code and AS path, are not considered in this case.

### NEW QUESTION # 59

Exhibit.

□

You want to verify prefix information being sent from 10.36.1.4.

Which two statements are correct about the output shown in the exhibit? (Choose two.)

- A. The output shows routes that were received prior to the application of any BGP import policies.
- B. The output shows routes that are active and rejected by an import policy.
- C. The routes displayed are being learned from an IBGP peer.
- D. The routes displayed have traversed one or more autonomous systems.

**Answer: C,D**

Explanation:

A). The routes displayed have traversed one or more autonomous systems. True. The AS path attribute shows AS numbers (e.g., 65401 65520.), indicating the route's traversal through various autonomous systems. D.

The routes displayed are being learned from an IBGP peer. True. The absence of the '\* > i' marker before the prefixes indicates they are being learned from an IBGP peer. Therefore, the correct statements are A. The routes displayed have traversed one or more autonomous systems. and D. The routes displayed are being learned from an IBGP peer.

#### NEW QUESTION # 60

Which two statements are true about high availability on Junos devices? (Choose two.)

- A. BFD is faster at detecting failures than default GRE or OSPF timers.
- B. BFD is slower at detecting failures than default GRE or OSPF timers.
- C. NSR is independent of helper routers to assist the routing platform in restoring routing protocol information.
- D. NSR is dependent on helper routers to assist the routing platform in restoring routing protocol information.

**Answer: A,C**

#### NEW QUESTION # 61

You are asked to change the setting for the LSAs age out back to the default value.

In this scenario, which time interval will accomplish this task?

- A. 1800 seconds
- B. 3600 seconds
- C. 300 seconds
- D. 600 seconds

**Answer: B**

Explanation:

<https://www.juniper.net/documentation/us/en/software/junos/cli-reference/topics/ref/statement/lsa-refresh-interval-edit-protocols-ospf.html>

#### NEW QUESTION # 62

.....

To go with the changing neighborhood, we need to improve our efficiency of solving problems, which reflects in many aspect as well as dealing with exams. Our JN0-351 practice materials can help you realize it. To those time-sensitive exam candidates, our high-efficient JN0-351 actual tests comprised of important news will be best help. Only by practicing them on a regular base, you will see clear progress happened on you. Besides, rather than waiting for the gain of our JN0-351 practice materials, you can download them immediately after paying for it, so just begin your journey toward success now.
