

# Valid Veeam VMCE\_v12 Exam Cram, New VMCE\_v12 Test Pattern

P.S. Free & New VMCE\_v12 dumps are available on Google Drive shared by ActualtestPDF: <https://drive.google.com/open?id=1EO-y4F6rKpNRz7lryHRGzql5niny44Op>

Many clients may worry that their privacy information will be disclosed while purchasing our VMCE\_v12 quiz torrent. We promise to you that our system has set vigorous privacy information protection procedures and measures and we won't sell your privacy information. The VMCE\_v12 Quiz prep we sell boost high passing rate and hit rate so you needn't worry that you can't pass the exam too much. But if you fail in please don't worry we will refund you. Take it easy before you purchase our VMCE\_v12 quiz torrent.

## Veeam VMCE\_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Initial security considerations: This section defines ways and tools to secure the Veeam backup server.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Transport modes: This section aims to analyze different methods to collect and read data from the production environment.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Data protection strategies: This section of the exam covers an overview of data protection strategies.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.</li> </ul>

## New VMCE\_v12 Test Pattern & Interactive VMCE\_v12 Testing Engine

Preparing with outdated VMCE\_v12 exam questions results in failure and loss of time and money. You can get success in the exam on first attempt and save your resources with the help of updated exam questions. We offer Veeam VMCE\_v12 real questions to help pupils in getting ready for the exam in a short time. Students who choose ActualtestPDF will get the latest and updated exam questions they need to prepare for the VMCE\_v12 examination in a short time.

### Veeam Certified Engineer v12 Sample Questions (Q173-Q178):

#### NEW QUESTION # 173

A request to protect some new domain controllers has been submitted in the ticketing system The engineer creates a backup job with the following steps:

1. Right-clicks on the Jobs navigation item on the left
2. Selects VMware vSphere from the menu
3. Enters a name for the job.
4. Selects workloads to protect.
- 5 Defines a job schedule.
6. Clicks the Finish button.

When testing restores, the engineer finds that the backups are crash-consistent.

Which set of steps should the engineer use to avoid crash-consistent backups for the domain controllers?

- A. Launch the New Backup Job Wizard. Enter a name and a description. Select a resource pool to protect. Specify a backup repository with copy-mode enabled. Define a job schedule. Click the Finish button.
- **B. Launch the New Backup Job Wizard. Enter a name for the job. Select workloads to protect. Choose a destination. Enable the Application-Aware checkbox and configure settings. Define a job schedule. Click the Finish button.**
- C. Launch the New Backup Job Wizard Enter a name for the job Specify a backup repository. Specify Guest Processing settings. Define a job schedule Click the Finish button.
- D. Launch the New Backup Job Wizard Enter a name or description for the job. Select the vSphere environment to protect. Choose the Default Backup Repository Check the box labelled 'Run the job when I click Finish'. Specify Guest Processing settings. Define a job schedule.

**Answer: B**

Explanation:

Application-aware processing is a feature in Veeam Backup & Replication that creates transactionally consistent backup images of VMs. For domain controllers, this feature ensures that backups are consistent with the applications running on the VM, like Active Directory services. To avoid crash-consistent backups and ensure application consistency, the engineer must enable the Application-Aware Processing option during the job configuration. References:

\* Veeam Backup & Replication User Guide: Application-Aware Processing

\* Veeam Best Practices: Protecting Active Directory Domain Controllers

#### NEW QUESTION # 174

A Veeam proxy server is configured as follows. No modifications are allowed to the transport mode.

When performing a restore of a VMware virtual disk using this proxy server, the restore fails.

What is a possible cause?

- **A. The virtual disk is thin-provisioned.**
- B. The virtual disk is thick-provisioned
- C. CBT is disabled on the virtual disk.
- D. CBT is enabled on the virtual disk.

**Answer: A**

Explanation:

Given the provided transport modes and the fact that no modifications are allowed to these settings, a possible cause for the restore of a VMware virtual disk to fail using this proxy server is C: The virtual disk is thin-provisioned. In the transport modes shown, the

Direct storage access and Virtual appliance options would require the VM disk files to be accessible in a certain way that might not be compatible with thin-provisioned disks depending on the storage configuration and the current state of the VM. If the storage integration specifics or the snapshot handling do not support the thin-provisioned format, the restore operation could fail. It's important to ensure that the transport mode selected is compatible with the type of virtual disk being restored to prevent such issues.

#### NEW QUESTION # 175

A company experienced a catastrophic data loss at their primary data center. The administrator had implemented Veeam's best practices 3-2-1-1-0 Rule as part of the disaster recovery strategy.

In reviewing the incident, the administrator needs to identify which portion of the disaster recovery strategy played the most crucial role in ensuring that data was protected and recoverable.

Which feature significantly enhanced data protection and disaster recovery in this scenario?

- A. Backup copy jobs
- B. U-AIR wizard
- C. Forever forward incremental backup
- D. Customizable email notifications

**Answer: A**

Explanation:

The key element of the 3-2-1-1-0 strategy that ensured data survivability in the face of a full site loss is the off-site copy, accomplished via Backup Copy Jobs. By continuously copying your primary backups to a secondary, geographically separate location (and optionally to an immutable, air-gapped tier), Backup Copy Jobs provided the "1-offsite" (and "1-offline") component that kept your data safe and recoverable.

#### NEW QUESTION # 176

A backup administrator must enable guest file system indexing for a backup job of a Microsoft Windows file server VM. All required credentials are added to the Veeam Backup & Replication server. VMware Tools (VIX) cannot be used due to security regulations. What should be done to make it possible in the following environment?

- A. Install a file system indexing plugin on the Microsoft Windows file server
- B. Use the proxy server as a guest interaction proxy
- C. Connect the ESXi host to the VM network
- D. Use the Veeam Backup & Replication server as a guest interaction proxy

**Answer: B**

Explanation:

If VMware Tools (VIX) cannot be used due to security regulations, the backup administrator can use the proxy server as a guest interaction proxy to enable guest file system indexing for a backup job. The guest interaction proxy is responsible for the deployment and coordination of guest processing tasks, such as guest file system indexing, which does not require VIX. References:

\* Veeam Backup & Replication User Guide: Guest Interaction Proxy

\* Veeam Knowledge Base: Configuring Guest Interaction Proxies

#### NEW QUESTION # 177

An engineer has used a Linux Hardened Repository as the backup repository. The immutability period is set to 60 days.

The backup settings are:

- Retention Policy: 14 days
- GFS Weekly full backup: 1 week
- GFS Monthly full backup: 6 months

If a full backup is created on 27th May 2023 with a monthly GFS flag, when will this restore point be automatically deleted?

- A. 28th November 2023
- B. 2V June 2023
- C. 5th August 2023
- D. 28th July 2023
