Texas Application for Exemption – Federal and All Others

GLENN HEGAR TEXAS COMPTROLLER OF PUBLIC ACCOUNTS

Texas tax laws provide exemptions from sales, franchise and/or hotel taxes for organizations meeting specific requirements. The exemptions available vary, depending upon the category of exemption under which the organization might qualify.

Please use this application, Form AP-204, to apply for exemption if you are

- applying on the basis of the organization's designation as a qualifying 501(c) organization, or
- applying on any basis OTHER THAN as a religious, charitable, educational organization or a homeowners' association.

Separate applications are available for organizations applying for exemption as a religious (Form AP-209), charitable (Form AP-205), educational (Form AP-207) or homeowners' association (Form AP-206).

The applications, laws, rules and other information about exemptions are online at
www.Comptroller.Texas.Gov/taxes/exempt

You can submit your completed application along with required documentation by mail, fax or email

Mail: Texas Comptroller of Public Accounts
Exempt Organizations Section
P.O. Box 13528
Austin, Texas 78711

FAX: (512) 475-5862
Email: exempt.orgs@cpa.texas.gov

We process applications in the order they are received. To establish claimed exemptions, we may require additional information. After review of the material, we will inform the organization in writing if it qualifies for exemption. The Comptroller, or an authorized representative of the Comptroller, may audit the records of an exempt organization at any time during regular business hours to verify the validity of the organization's exempt status.

If you have questions or need more information, contact us at 800-252-5555.

You have certain rights under Chapters 552 and 559, Government Code, to review, request and correct information we have on file about you. Contact us at the address or phone number listed on this form.

AP-204-1 (Rev. 12-18-12)

P.S. Free 2026 Salesforce AP-204 dumps are available on Google Drive shared by ActualTestsIT: <https://drive.google.com/open?id=15sCQ9O8OEh7xbIviHYM4AFsUpfPwZKIF>

In the course of your study, the test engine of AP-204 actual exam will be convenient to strengthen the weaknesses in the learning process. This can be used as an alternative to the process of sorting out the wrong questions of AP-204 learning guide in peacetime learning, which not only help you save time, but also makes you more focused in the follow-up learning process with our AP-204 learning materials.

Our ActualTestsIT provides the latest and the most complete AP-204 exam questions and answers aimed at becoming the most reliable dumps provider in IT exam software. With the help of our ActualTestsIT, nearly all those who have purchased our dumps have successfully passed the difficult AP-204 Exam, which gives us great confidence to recommend our reliable products to you. We can assure you that we will fully refund the cost you purchased our dump, if you fail AP-204 exam with our dumps. So, just rest assured to prepare for your exam.

Consumer Goods Cloud Accredited Professional training vce pdf & AP-204 latest practice questions & Consumer Goods Cloud Accredited Professional actual test torrent

On the one hand, according to the statistics from the feedback of all of our customers, the pass rate among our customers who

prepared for the exam with the help of our AP-204 guide torrent has reached as high as 98%to 100%. On the other hand, the simulation test is available in our software version, which is useful for you to get accustomed to the AP-204 Exam atmosphere. Please believe us that our AP-204 torrent question is the best choice for you.

Salesforce Consumer Goods Cloud Accredited Professional Sample Questions (Q70-Q75):

NEW QUESTION # 70

Which Lightning component can an admin add to a Consumer Goods assessment task record page?

- A. In-Store Products Check
- B. Planogram Check
- C. Inventory Check
- D. Promotion Check

Answer: C

Explanation:

https://help.salesforce.com/s/articleView?id=sf.retail_task_admin_create_assessment_task_record_page.htm&type=5 Inventory Check is a Lightning component that can be added to a Consumer Goods assessment task record page by an admin. An assessment task is a type of action plan task that allows users to collect data and perform actions related to a retail store. An inventory check is a type of assessment task that allows users to verify the availability and quantity of products in a store. The Inventory Check component displays the products that are associated with the store and allows users to search, scan, and update the product information. Verified Reference: [Salesforce Consumer Goods Cloud Implementation Guide], page 40.

NEW QUESTION # 71

Which methodology does Salesforce Maps offer to facilitate the addition of geocoordinates for each retail store location by an admin?

- A. Create a new map layer containing the desired retail store locations and execute the 'add geocodes' mass action.
- B. Set up a batch job through Salesforce Maps automation to read an address field and add geocoordinates to selected fields,
- C. Under geolocation in setting, enable the 'automate geocoordinate mapping to retail store' option.
- D. Click on the individual retail store marker and copy/paste the coordinates from the tooltip to the corresponding retail store longitude and latitude fields.

Answer: B

NEW QUESTION # 72

A consultant for Northern Trail Outfitters (NTO) retail stores would like to configure inventory checks related to product, that are stocked in the frozen food aisle. What should the consultant do first to ensure the field rep knows that the product is located in the frozen food aisle?

- A. Create a picklist field called 'location' to document the Frozen Food Aisle.
- B. Create a record type called 'Frozen Food Aisle' on the retail store.
- C. Create an In-Store Location called 'Frozen Food Aisle'.
- D. Nothing as Product2 captures that the product is frozen.
- E. Create a record type called 'Frozen Food Aisle' on the task.

Answer: C

Explanation:

To ensure the field rep knows that the product is located in the frozen food aisle when performing an inventory check, the consultant should create an In-Store Location called 'Frozen Food Aisle'. An In-Store Location is an object that represents a specific area within a retail store, such as an aisle, a shelf, or a cooler. By creating an In-Store Location for the frozen food aisle, the consultant can associate it with the products that are stocked in that area and display it on the inventory check task. This way, the field rep can easily locate and verify the products in the frozen food aisle. Verified Reference: [Salesforce Consumer Goods Cloud Implementation Guide], page 20.

NEW QUESTION # 73

ABC Cloud is using Communications Cloud's Order Management for provisioning and activations of services. As part of the integration with ERP, the ERP order identifiers are required to be saved in the synchronous response in the SFI order record for reference and troubleshooting purposes. A Consultant has started their design using existing Velocity Process Libraries. What solution should the Consultant propose to save the ERP order identifiers back to the Salesforce order record?

- A. Configure integration procedure in conjunction with Auto Task to perform CREATE order in ERP and process response to save returned ERP order identifiers using Load DataRaptor.
- **B. Configure the Response DataRaptor Bundle to process CREATE response from ERP and save returned ERP order identifier to SFI order record.**
- C. Enhance OOTB integration adapter to process CREATE response from ERP and save returned ERP order identifier to SFI order record.
- D. Configure GET ERP Order Callout task straight after the callout task that creates an order in ERP. Enhance the out-of-the-box integration adapter to process GET response from ERP and save returned ERP order identifier to SFI order record.

Answer: B

Explanation:

For integrations where the provisioning/ERP system returns an external order ID in a synchronous response, Salesforce recommends using the Response DataRaptor Bundle of the Integration Procedure or Process Library.

The Process Library already includes patterns for handling:

Create Order callouts

Handling synchronous responses

Mapping response fields into Salesforce objects (e.g., SFI Order, Fulfillment records) You simply extend the Response DataRaptor to:

Extract ERP Order Identifier from the response payload.

Save it onto the corresponding Salesforce Order record for audit and troubleshooting.

Why other options are incorrect:

B: Auto Tasks are for async flows; the requirement is synchronous.

C: Enhancing the OOTB adapter is not recommended-declarative DR bundles should be used.

D: Creating a separate GET callout is unnecessary because the identifier is returned in the synchronous CREATE response.

Thus, A is the Salesforce-recommended approach.

NEW QUESTION # 74

Universal Containers (UC) is a Communications Service Provider using Communications Cloud. As part of Internet order fulfillment, UC warehouse agents will use Salesforce to enter a router's barcode and enter the shipping tracking number for the router. How should a Communications Cloud Consultant solve this requirement?

- **A. Configure a Manual Task Orchestration Item that will launch an OmniScript to enter the router's barcode number and shipping tracking number**
- B. Configure a Push Event Orchestration Item that will receive the router's barcode number and shipping tracking number
- C. Configure an Autotask Orchestration Item that will automatically launch an OmniScript to enter the router's barcode number and shipping tracking number
- D. Configure a Manual Task Orchestration Item that will launch a Flow to enter the router's barcode number and shipping tracking number

Answer: A

Explanation:

Warehouse agents manually entering router barcode and shipment tracking numbers requires a human task in Order Management.

Salesforce best practice:

Use a Manual Task Orchestration Item when human input is required.

Launch an OmniScript to capture structured data, validate inputs, and update Fulfillment data.

Why the others are incorrect:

A (Flow) - Flows are not the recommended UI for OM tasks; OmniScripts provide better control, validations, dynamic forms, and DC/CPQ consistency.

B (Push Event) - Push tasks send tasks to external queues/systems, not internal warehouse agents.

C (Autotask) - Auto Tasks run without human interaction, so cannot capture barcodes manually.
