Free ISC CC Exam Questions | Latest CC Exam Testking

ISC2 CC Exam Questions With 100% Correct Answers 2024/CC ISC2 Flashcards. 139 Questions and Correct Answers, With Complete Solution.

What is MAC (Mandatory Access Control)?

The operating system determines who gets access to resources. Much more restricted, not used as much.

Which of the following is a detection control?:
Bollards
Turnstiles
Firewalls
Smoke sensors

Smoke sensors. By definition, smoke detectors are fire protection devices employed for the early detection of fire. Firewalls are devices that filter incoming traffic, and are a type of logical preventive control. Bollards and turnstiles are types of physical preventive controls.

Which of the following is NOT an ethical canon of the ISC2?
-Advance and protect the profession
-Act honorably, honestly, justly, responsibly and legally
-Protect society, the common good, necessary public trust and confidence, and the infrastructure
-Provide active and qualified service to principal

Provide active and qualified service to principal. In the code of ethics, we read "Provide diligent and competent service to principals", and not "Provide active and qualified service to principals."; all the other options are valid canons of the code of ethics (see ISC2 Study Guide Chapter 1, Module 5).

Which of the following is a data handling policy procedure?
-Transform
-Destroy
-Encode
-Collect

Destroy. The data handling procedures are 'Classify', 'Categorize', 'Label', 'Store', 'Encrypt', 'Backup', and 'Destroy' (see ISC2 Study Guide, chapter 5, module 3).

Which of the following properties is NOT guaranteed by Digital Signatures?
-Non-Repudiation
-Confidentiality
-Authentication
-Integrity

ISC CC Exam Syllabus Topics:

Topic	Details
Topic 1	• Security Principles: This section of the exam measures skills of Security Analysts and Information Assurance Specialists and covers fundamental security concepts such as confidentiality, integrity, availability, authentication methods including multi-factor authentication, non-repudiation, and privacy. It also includes understanding the risk management process with emphasis on identifying, assessing, and treating risks based on priorities and tolerance. Candidates are expected to know various security controls, including technical, administrative, and physical, as well as the ISC2 professional code of ethics. Governance processes such as policies, procedures, standards, regulations, and laws are also covered to ensure adherence to organizational and legal requirements.

Topic 2	• Security Operations: This area targets Security Operations Center (SOC) Analysts and System Administrators. It covers data security with encryption methods, secure handling of data including classification and retention, and the importance of logging and monitoring security events. System hardening through configuration management, baselines, updates, and patching is included. Best practice security policies such as data handling, password, acceptable use, BYOD, change management, and privacy policies are emphasized. Finally, the domain highlights security awareness training addressing social engineering awareness and password protection to foster a security-conscious organizational culture.
Topic 3	• Business Continuity (BC), Disaster Recovery (DR) & Incident Response Concepts: This domain targets Business Continuity Planners and Incident Response Coordinators. It focuses on the purpose, importance, and core components of business continuity, disaster recovery, and incident response. Candidates learn how to prepare for and manage disruptions while maintaining or quickly restoring critical business operations and IT services.
Topic 4	• Network Security: This domain assesses the knowledge of Network Security Engineers and Cybersecurity Specialists. It covers foundational computer networking concepts including OSI and TCP • IP models, IP addressing, and network ports. Candidates study network threats such as DDoS attacks, malware variants, and man-in-the-middle attacks, along with detection tools like IDS, HIDS, and NIDS. Prevention strategies including firewalls and antivirus software are included. The domain also addresses network security infrastructure encompassing on-premises data centers, design techniques like segmentation and defense in depth, and cloud security models such as SaaS, IaaS, and hybrid deployments.
Topic 5	• Access Control Concepts: This section measures skills of Access Control Specialists and Physical Security Managers in understanding physical and logical access controls. Topics include physical security measures like badge systems, CCTV, monitoring, and managing authorized versus unauthorized personnel. Logical access control concepts such as the principle of least privilege, segregation of duties, discretionary access control, mandatory access control, and role-based access control are essential for controlling information system access.
