You can easily use all these three AWS-Certified-Developer-Associate exam questions format. These formats are compatible with all devices, operating systems, and the latest browsers. All three Amazon AWS-Certified-Developer-Associate Exam Questions formats are easy to use and compatible with all devices, operating systems, and the latest browsers.

Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q148-Q153):

NEW QUESTION # 148

An application needs to use the IP address of the client in its processing. The application has been moved into AWS and has been placed behind an Application Load Balancer (ALB).

However, all the client IP addresses now appear to be the same. The application must maintain the ability to scale horizontally. Based on this scenario, what is the MOST cost-effective solution to this problem?

- A. Alter the application code to inspect a custom header. Alter the client code to pass the IP address in the custom header.
- B. Remove the application from the ALB. Create a Classic Load Balancer in its place. Direct traffic to the application using the HTTP protocol.
- C. Remove the application from the ALB. Delete the ALB and change Amazon Route 53 to direct traffic to the instance running the application.
- D. Alter the application code to inspect the X-Forwarded-For header. Ensure that the code can work properly if a list of IP addresses is passed in the header.

Answer: D

NEW QUESTION # 149

A developer tested an application locally and then deployed it to AWS Lambda. While testing the application remotely, the Lambda function fails with an access denied message.

How can this issue be addressed?

- A. Update the Lambda function's resource policy to include the missing permissions.
- B. Include an IAM policy document at the root of the deployment package and redeploy the Lambda function.
- C. Update the Lambda function's execution role to include the missing permissions.
- D. Redeploy the Lambda function using an account with access to the AdministratorAccess policy.

Answer: C

Explanation:

NEW QUESTION # 150

A user is planning to make a mobile game which can be played online or offline and will be hosted on EC2.

The user wants to ensure that if someone breaks the highest score or they achieve some milestone they can inform all their colleagues through email. Which of the below mentioned AWS services helps achieve this goal?

- A. AWS Simple Email Service.
- B. AWS Simple Workflow Service.
- C. Amazon Cognito
- D. AWS Simple Queue Service.

Answer: A

Explanation:
Amazon Simple Email Service (Amazon SES) is a highly scalable and cost-effective email-sending service for businesses and developers. It integrates with other AWS services, making it easy to send emails from applications that are hosted on AWS.

NEW QUESTION # 151

The user has created multiple AutoScaling groups. The user is trying to create a new AS group but it fails. How can the user know that he has reached the AS group limit specified by AutoScaling in that region?

- A. Run the command: as-describe-account-limits
- B. Run the command: as-describe-group-limits
- C. Run the command: as-max-account-limits
- D. Run the command: as-list-account-limits

Answer: A

Explanation:
A user can see the number of AutoScaling resources currently allowed for the AWS account either by using the as-describe-account-limits command or by calling the DescribeAccountLimits action.

NEW QUESTION # 152
A Developer is building a mobile application and needs any update to user profile data to be pushed to all devices accessing the specific identity. The Developer does not want to manage a back end to maintain the user profile data.
What is the MOST efficient way for the Developer to achieve these requirements using Amazon Cognito?

- A. Use Cognito Sync.
- B. Use Cognito events.
- C. Use a Cognito user pool.
- D. Use Cognito federated identities.

Answer: D
