It conveys more important information with less answers and questions, thus the learning is easy and efficient. The language is easy to be understood makes any learners have no obstacles.

## CompTIA A+ Certification Exam: Core 2 Sample Questions (Q115-Q120):

### NEW QUESTION # 115

After a recent mobile OS upgrade to a smartphone, a user attempts to access their corporate email, but the application does not

open. A technician restarts the smartphone, but the issue persists. Which of the following is the most likely way to resolve the issue?

- A. Registering the smartphone with an MDM solution
- **B. Updating the failed software**
- C. Clearing the cache partition
- D. Installing a third-party client

**Answer: B**

Explanation:

After a major OS upgrade, existing applications often require updates to maintain compatibility with new APIs and system libraries. Updating the corporate email app to its latest version ensures it's built against the updated OS and can launch properly.

### NEW QUESTION # 116

Multiple users are reporting audio issues as well as performance issues after downloading unauthorized software. You have been dispatched to identify and resolve any issues on the network using best practice procedures.

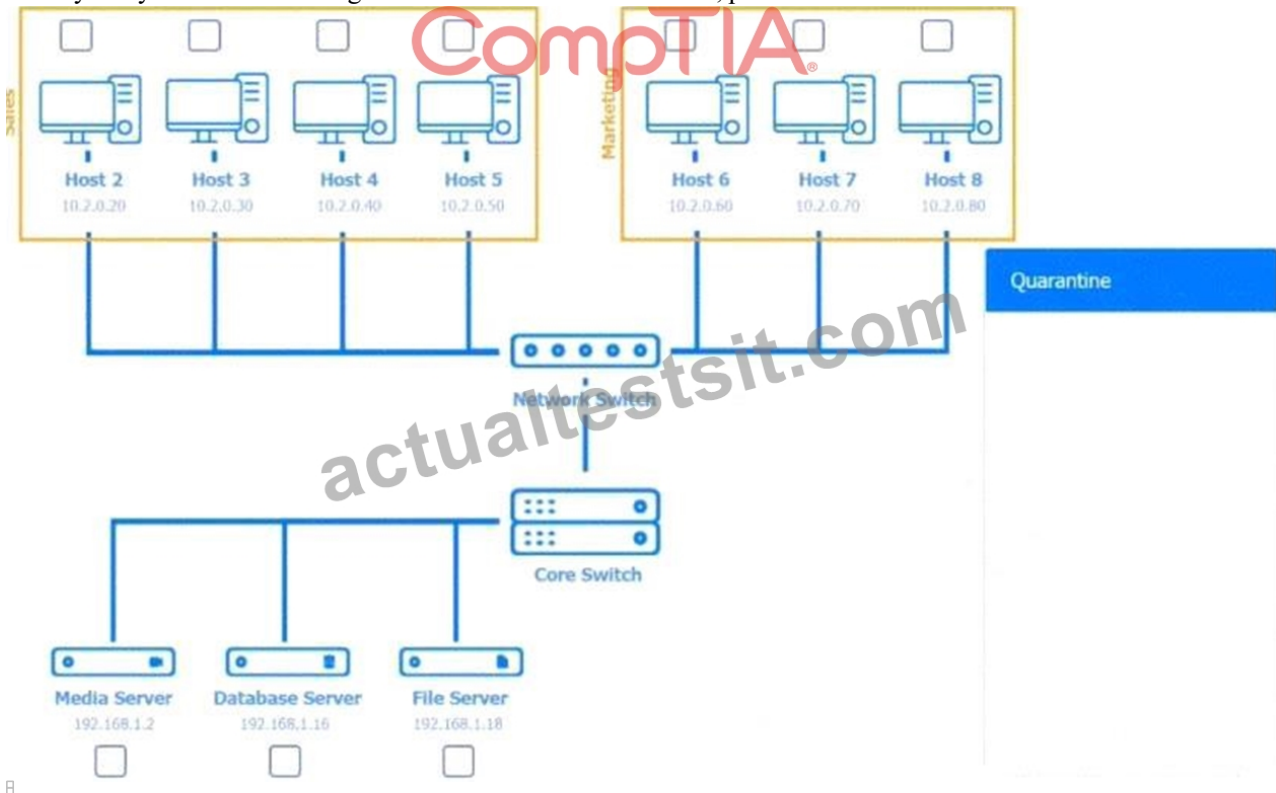

#### INSTRUCTIONS

Quarantine and configure the appropriate device(s) so that the users' audio issues are resolved using best practice procedures.

Multiple devices may be selected for quarantine.

Click on a host or server to configure services.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

**Answer:**

Explanation:

Host 2, Host 3, Host 4, Host 5, Host 6, Host 7, Host 8, Media Server - Stop All unwanted and malicious service (Persistence.j1zpxn Installer Service) from all the listed host and Media servers Refer screenshot below on the required service started/stopped on host2, same service to be started and stopped across all host servers.

- A screenshot of a computer AI-generated content may be incorrect.
- A screenshot of a computer AI-generated content may be incorrect.

#### NEW QUESTION # 117

A user called the help desk to report an issue with the internet connection speed on a laptop. The technician thinks that background services may be using extra bandwidth. Which of the following tools should the technician use to investigate connections on the laptop?

- A. netstat
- B. nslookup
- C. net user
- D. net use

**Answer: A**

Explanation:

The netstat tool displays active network connections and listening ports, allowing the technician to identify background services and processes that may be using extra bandwidth on the laptop.

### NEW QUESTION # 118

The battery on a user's smartphone discharges quickly when the user travels. The smartphone was replaced two weeks ago. Which of the following should a technician do first?

- A. Ensure that the charging port is working as expected
- **B. Look for applications that are reporting the highest utilization**
- C. Replace the battery with a higher capacity option
- D. Provide an external battery to extend the usage time

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

High battery drain is often due to apps running in the background or using GPS during travel. The first step should always be to check battery usage statistics to see if an application is misbehaving.

From All-in-One Exam Guide:

"Travel conditions can increase app activity, especially navigation or social media. Check app battery usage before assuming hardware faults."

### NEW QUESTION # 119

A technician is 3-D printing high-strength, carbon fiber-based filament parts for a customer order. Which of the following is the most important for the technician to use?

- **A. Air filter mask**
- B. Antistatic bags
- C. Steel-toed boots
- D. ESD mat

**Answer: A**

Explanation:

An air filter mask is most important because 3-D printing carbon fiber-based filaments can release fine particles and fumes that are hazardous if inhaled.

### NEW QUESTION # 120

.....
