

# Benefits of Taking Microsoft AI-102 Practice Exams (Desktop and Web-Based)

BTW, DOWNLOAD part of TorrentValid AI-102 dumps from Cloud Storage: <https://drive.google.com/open?id=1rJqZlHXnPLz2-RqefXoW96Y-6qvE1K8Z>

For candidates who want to start learning immediately, choosing us will be your best choice. Because you can get the downloading link within ten minutes after purchasing, so that you can begin your study right now. What's more, AI-102 training materials of us are also high-quality, and they will help you pass the exam just one time. We are pass guaranteed and money back guaranteed for your failure. We also have a professional service stuff to answer any your questions about AI-102 Exam Dumps.

The Microsoft AI-102 exam is designed to test the candidate's proficiency in various areas related to designing and implementing Azure AI solutions. AI-102 exam covers topics such as developing AI solutions, designing and implementing AI apps and agents, and integrating AI services with Azure solutions. AI-102 Exam also covers advanced topics such as natural language processing (NLP), computer vision, and knowledge mining.

## Providing You Authoritative AI-102 Sample Test Online with 100% Passing Guarantee

Our desktop-based Designing and Implementing a Microsoft Azure AI Solution (AI-102) practice exam software needs no internet connection. The web-based Designing and Implementing a Microsoft Azure AI Solution (AI-102) practice exam is similar to the desktop-based software. You can take the web-based Designing and Implementing a Microsoft Azure AI Solution (AI-102) practice exam on any browser without needing to install separate software. In addition, all operating systems also support this web-based Microsoft AI-102 Practice Exam. Both Designing and Implementing a Microsoft Azure AI Solution (AI-102) practice exams track your performance and help to overcome mistakes. Furthermore, you can customize your Building Designing and Implementing a Microsoft Azure AI Solution (AI-102) practice exams according to your needs.

Microsoft AI-102 is an exam that is designed for IT professionals who are interested in Microsoft Azure and artificial intelligence technologies. The purpose of AI-102 exam is to test the candidate's knowledge and skills in designing and implementing an AI solution using Microsoft Azure technologies. AI-102 exam is a part of the Microsoft Certified: Azure AI Engineer Associate certification.

Another important objective of the Microsoft AI-102 Exam is to test candidates' knowledge of natural language processing (NLP) and computer vision. This includes understanding how to build custom models for tasks such as sentiment analysis, language translation, and image recognition. Candidates will also be tested on their ability to deploy these models using Azure Cognitive Services.

## Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q312-Q317):

NEW QUESTION # 312

You are building a bot and that will use Language Understanding.

You have a LUDown file that contains the following content.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Reference:

<https://github.com/solliancenet/tech-immersion-data-ai/blob/master/ai-exp1/README.md>

### NEW QUESTION # 313

You are building a transcription service for technical podcasts.

Testing reveals that the service fails to transcribe technical terms accurately.

You need to improve the accuracy of the service.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Answer:**

Explanation:

Explanation:

<https://learn.microsoft.com/en-us/azure/cognitive-services/speech-service/custom-speech-overview#how-does-it-work> With Custom Speech, you can upload your own data, test and train a custom model, compare accuracy between models, and deploy a model to a custom endpoint.

- Create a project and choose a model. Use a Speech resource that you create in the Azure portal. If you will train a custom model with audio data, choose a Speech resource region with dedicated hardware for training audio data.
- Upload test data. Upload test data to evaluate the speech to text offering for your applications, tools, and products.
- Train a model. Provide written transcripts and related text, along with the corresponding audio data. Testing a model before and after training is optional but recommended.
- Deploy a model. Once you're satisfied with the test results, deploy the model to a custom endpoint. With the exception of batch transcription, you must deploy a custom endpoint to use a Custom Speech model.

### NEW QUESTION # 314

You have a Language Understanding solution that runs in a Docker container.

You download the Language Understanding container image from the Microsoft Container Registry (MCR).

You need to deploy the container image to a host computer.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

- 1 - From the Language Understanding portal, export...
- 2 - From the host computer, move the package file...
- 3 - From the computer, build the container and....

### NEW QUESTION # 315

Select the answer that correctly completes the sentence.

**Answer:**

Explanation:

Explanation

□

### NEW QUESTION # 316

You are building a social media messaging app.

You need to identify in real time the language used in messages.

Which SDK package should you install?

- A. azure-ai-translation-document
- **B. azure-ai-translation-text**
- C. azure-ai-translation-speech
- D. azure-cognitiveservices-speech

**Answer: B**

Explanation:

The "azure-ai-translation-text" SDK is a client library for using the Azure AI Translator service, which includes the Language Detection API. This API allows you to determine the language of a given text string. The SDK simplifies integration of this API into applications, providing tools and libraries for various programming platforms like C#/.NET, Java, JavaScript, and Python.
