

Realistic HQT-4160 Pass Test Guide - 100% Pass Hitachi Test Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Valid

Exam Type
Qualification

Format
Proctored, closed book exam

Credential
Hitachi Vantara Qualified Professional - VSP 5000 Series Installation

Validity 3 years

Delivery
Kryterion Webassessor System*

Questions 35

Passing Score 65%

Duration 60 minutes

Cost
US \$100 or equivalent in local currency (plus local tax, depending on location)

Supporting Material
• 1990PI - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1 System Architecture	
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
Section 2 System Pre-Installation and Installation	
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
Section 3 System Configuration	
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

Test HQT-4160 Valid & Exam HQT-4160 Questions Fee

The HQT-4160 exam prepare materials of Real4dumps is high quality and high pass rate, it is completed by our experts who have a good understanding of real HQT-4160 exams and have many years of experience writing HQT-4160 study materials. They know very well what candidates really need most when they prepare for the HQT-4160 Exam. They also understand the real HQT-4160

exam situation very well. We will let you know what a real exam is like. You can try the Soft version of our HQT-4160 exam question, which can simulate the real exam.

Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q22-Q27):

NEW QUESTION # 22

You need to add another SBX with 4 drive boxes (DBS2) and 16 drives to a VSP 5100. What is the correct procedure?

- A. Mount the empty DBs in the rack. Insert the drives in the DBs and install them with the Maintenance Utility.
- B. Insert the drives in the DBs. Mount the DBs in the rack and install them with the Maintenance Utility.
- C. Mount the empty DBs in the rack and attach the cables. Install the DBs with the Maintenance Utility. Insert the drives in the DBs and install them with the Maintenance Utility.
- D. Insert the drives in the DBs. Mount the DBs in the rack and attach the cables. Install the drives with the Maintenance Utility.

Answer: A

Explanation:

The correct procedure is to first mount the empty drive boxes (DBs) in the rack, then insert the drives into the DBs, and finally use the Maintenance Utility to install and configure the new hardware. This ensures proper detection and initialization by the system.

NEW QUESTION # 23

A VSP 5500 system is installed with a pair of Controller Boxes (CBXs). How many LAN cables are needed to attach controllers to the switch/HUB located on the Hitachi Service and Network Box-0 (HSNBX-0)?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

Only the "LAN board 1" management ports on each of the two controllers in CBX-0 connect to the switch/hub in HSNBX-0 - one cable per controller - for a total of two LAN cables.

NEW QUESTION # 24

What is the maximum raw storage capacity of the VSP 5800 model?

- A. 4 PB
- B. 12 PB
- C. 16 PB
- D. 8 PB

Answer: B

Explanation:

The Hitachi VSP 5800 is part of the enterprise storage portfolio from Hitachi Vantara. It is designed for high-performance, large-scale enterprise storage environments such as mission-critical databases and large virtualization platforms.

The system supports a maximum raw storage capacity of approximately 12 petabytes (PB) in its configuration, allowing organizations to store extremely large datasets while maintaining high performance and reliability.

NEW QUESTION # 25

You are installing a VSP 5500h with 3 pairs of CBXs. What is the total number of X-PATH cables that will be attached to the ISW ports?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

A VSP 5500h system with 3 pairs of Controller Boxes (CBXs) requires a total of 48 X-PATH cables attached to the Interconnect Switch (ISW) ports. Each CBX pair contributes 16 X-PATH cables (8 per CBX), and with 3 pairs, the total is $3 \times 16 = 48$.

NEW QUESTION # 26

A drive in a VSP 5000 series storage system is blocked. The microcode is now searching for a matching spare drive. What are the three requirements for the spare drive? (Choose three.)

- A. It must have the same rotation speed (RPM).
- B. It must be of the same type (NL-SAS, SSD, FMD etc.).
- C. It must be located in the same DKU.
- D. It must be defined in the SVP Spare Drive Mapping table.
- E. It must have the same or a larger capacity.

Answer: A,B,E

Explanation:

It must have the same or a larger capacity.

The spare drive must be equal to or larger in capacity than the failed drive to ensure data can be fully rebuilt.

It must have the same rotation speed (RPM).

Matching rotation speed is required to maintain consistent performance and RAID group behavior.

It must be of the same type (NL-SAS, SSD, FMD etc.).

The spare drive must be the same drive type as the failed drive to ensure compatibility and maintain system reliability.

NEW QUESTION # 27

.....

The language in our Hitachi HQT-4160 test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether you are a novice or an experienced staff who has abundant experience for many years. It should be a great wonderful idea to choose our HQT-4160 Guide Torrent for sailing through the difficult test.
