No matter the worker generation or students, they are busy in dealing with other affairs, so spending much time on a 4A0-113 exam may make a disturb between their work and life. However if you buy our 4A0-113 exam engine, you just only need to spend 20-30 hours to practice training material and then you can feel secure to participate in this exam. We can make sure the short time on 4A0-113 training engine is enough for you to achieve the most outstanding result.

We believe in most cases our 4A0-113 exam study materials are truly your best friend. On one hand, our 4A0-113 learning guide is the combination of the latest knowledge and the newest technology, which could constantly inspire your interest of study. On the other hand, our 4A0-113 test answers can predicate the exam correctly. Through highly effective learning method and easily understanding explanation, you will pass the 4A0-113 Exam with no difficulty. Our slogans are genuinely engraving on our mind that is to help you pass the 4A0-113 exam, and ride on the crest of success!

## 2026 4A0-113 Reliable Test Guide | Latest Nokia 4A0-113 Dump Check: Nokia OSPF Routing Protocol Exam

The 4A0-113 exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the exam thesis focus in the development trend, and summarize all kind of difficulties you will face, highlight the user review must master the knowledge content. Our Nokia OSPF Routing Protocol Exam study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit 4A0-113 Exam Questions. It points to the exam heart to solve your difficulty.

Nokia 4A0-113 Exam is an important certification exam for network engineers and professionals who use Nokia's OSPF (Open Shortest Path First) routing protocol. OSPF is a popular routing protocol used by many companies and organizations to ensure efficient communication between different network devices. 4A0-113 exam is designed to test the candidates' knowledge and understanding of OSPF routing protocol, including its configuration, implementation, and troubleshooting.

Nokia 4A0-113 certification exam is a valuable certification for network professionals who want to demonstrate their expertise in OSPF routing protocols. Nokia OSPF Routing Protocol Exam certification validates individuals' skills in managing and troubleshooting OSPF networks, making them a valuable asset to any organization that relies on complex network infrastructures. With this certification, individuals can enhance their career prospects and demonstrate their commitment to continuous learning and professional development.

## Nokia OSPF Routing Protocol Exam Sample Questions (Q26-Q31):

### NEW QUESTION # 26

What are some of the characteristics of Nokia's implementation of non-stop routing? (Choose two)

- A. Transparent to routing neighbors
- B. Only supported by OSPF and IS-IS
- C. Uses Graceful Restart to inter-operate with other vendors
- D. No protocol extensions required

**Answer: A,D**

### NEW QUESTION # 27

A static route is created using the command "static-route 2.3.4.0/24 next-hop 1.2.3.4". What is the correct traceroute command to test this static route on a Nokia 7750 SR?

- A. traceroute 2.3.4.1
- B. traceroute 2.3.4.0/24 next-hop 1.2.3.4
- C. traceroute does not work on the Nokia 7750 SR
- D. traceroute next-hop 1.2.3.4

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (Static Route Testing):

"Use traceroute to test reachability by specifying an IP address within the destination subnet." The static route points to 2.3.4.0/24, so you select any valid host IP (e.g., 2.3.4.1) inside that subnet.

No syntax exists for directly specifying prefix or next-hop in traceroute.

Thus, correct answer is A.

### NEW QUESTION # 28

Refer to the exhibit.

Assume that OSPFv3 is properly configured on all routers and that R4 advertises its system prefix into Area

0. Which of the following statements best describes how R5 learns R4's IPv6 system prefix?

- A. With an Inter-Area Prefix LSA originated by R4
- B. With a Router LSA originated by R1
- C. With an Inter-Area Prefix LSA originated by R5
- D. With an Inter-Area Prefix LSA originated by R1
- E. With a Router LSA originated by R4
- F. With a Router LSA originated by R5

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPFv3 LSA Types):

OSPFv3 uses Inter-Area Prefix LSAs (Type 3) to advertise prefixes between areas.

R4 originates a Router LSA with its local prefixes into Area 0.

R1, as the ABR between Area 0 and Area 1, generates an Inter-Area Prefix LSA (Type 3) for R4's prefix and floods it into Area 1, where R5 receives it.

Thus, correct answer: D.

-

### NEW QUESTION # 29

What are the ways the RID can be created on an Nokia 7750 SR router? (Choose three)

- A. By using the command "config router ospf rid X.X.X.X"
- B. From the last 32 bits of the chassis MAC address

- C. The loopback IP address
- D. From the first 32 bits of the chassis MAC address
- E. From the system IP address
- F. From the highest interface IP address

**Answer: A,B,E**

### NEW QUESTION # 30

If OSPF is used in a multi-area OSPF network, which of the following statements regarding route summarization is true?

- A. Manual route summarization is done on the ABRs. By default, no route summarization is done and all routes are advertised to all areas.
- B. Manual route summarization can only be done on autonomous system border routers.
- C. Manual route summarization is done on the ABRs. By default, automatic summarization is done; however, it may not be optimal for all networks.
- D. Manual route summarization must be done on all the backbone routers to be effective. Manual route summarization is optional on the routers in non-backbone areas.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS OSPF Guide - Route Summarization Section:

"Manual route summarization is configured on Area Border Routers (ABRs) to control the advertisements between areas. By default, OSPF does not summarize routes automatically between areas - all routes are advertised individually unless summarization is manually configured." Summarization is always optional.

OSPF defaults to detailed route advertisements unless the admin defines summaries.

Thus, correct answer is D.

### NEW QUESTION # 31

.....

In order to gain the 4A0-113 certification quickly, people have bought a lot of 4A0-113 study materials, but they also find that these materials don't suitable for them and also cannot help them. If you also don't find the suitable 4A0-113 test guide, we are willing to recommend that you should use our 4A0-113 Study Materials. Because our products will help you solve the problem, it will never let you down if you decide to purchase and practice our 4A0-113 latest question. And our 4A0-113 exam questions have a high pass rate of 99% to 100%.
